Apple - Valid Exam DEP-2025 Questions Pdf

IT exam become more important than ever in today's highly competitive world, these things mean a different future. Apple DEP-2025 exam will be a milestone in your career, and may dig into new opportunities, but how do you pass Apple DEP-2025 Exam? Do not worry, help is at hand, with NewPassLeader you no longer need to be afraid. NewPassLeader Apple DEP-2025 exam

questions and answers is the pioneer in exam preparation.

Apple Deployment and Management Exam Sample Questions (Q72-Q77):

NEW QUESTION # 72

Which type of enrollment is ideal for devices you need to distribute to multiple users in multiple regions?

- A. User Enrollment
- **B. Automated Device Enrollment**
- C. Device Enrollment

Answer: B

Explanation:

Automated Device Enrollment (ADE) is ideal for distributing devices to multiple users across multiple regions because it allows enrollment in an MDM solution without physically handling the devices. Devices are pre-registered in Apple Business Manager or Apple School Manager, and upon setup, they automatically enroll in MDM, streamlining deployment at scale. Device Enrollment (option A) requires manual profile installation, impractical for large, dispersed deployments. User Enrollment (option B) is suited for BYOD, not organization-owned devices distributed widely. The Apple Platform Deployment Guide recommends ADE for such scenarios.

NEW QUESTION # 73

Which type of device supports Profile Manager?

- A. Apple Watch with watchOS 6 or later
- B. iPad with iPadOS 13 or later
- **C. Mac with macOS 10.14 or later**
- D. iPhone with iOS 13 or later

Answer: C

Explanation:

Profile Manager, a feature for creating and managing configuration profiles, is supported on Mac computers running macOS 10.14 (Mojave) or later, following the integration of macOS Server features into the OS.

iPads (option A), iPhones (option B), and Apple Watches (option D) don't host Profile Manager, though they can receive profiles from it. The Apple Platform Deployment Guide specifies macOS as the platform for Profile Manager.

Reference: Apple Platform Deployment Guide (Chapter: Profile Manager).

NEW QUESTION # 74

A user signed in to their iPhone with their personal Apple Account in Settings. Then they enrolled the same iPhone using their Managed Apple Account. iCloud is enabled in the organization and the user turned on iCloud Drive. Which of these could be a result? Choose the best answer.

- A. The personal iCloud Drive is unavailable until the device is unenrolled
- B. The user is prompted to keep personal iCloud Drive data or remove it from iPhone
- **C. An additional iCloud Drive appears in Files**
- D. Personal iCloud Drive data is merged with organization data

Answer: C

Explanation:

With User Enrollment, personal and managed iCloud Drives coexist separately. The iOS Deployment Reference explains, "When a device is enrolled with a Managed Apple ID via User Enrollment and iCloud Drive is enabled, an additional iCloud Drive appears in the Files app, separating personal data (linked to the personal Apple ID) from managed data (linked to the Managed Apple ID)."

Option B is incorrect as data doesn't merge, C is false as personal data remains accessible, and D doesn't occur during this process.

References:

iOS Deployment Reference, "User Enrollment and iCloud" section.

Apple Platform Deployment Guide, "Data Separation with iCloud" section.

NEW QUESTION # 75

What do you need for account-driven User Enrollment?

- A. An enrollment profile from a customized URL, mail message, or other means
- B. An enrollment certificate assigned to the account
- C. A Managed Apple Account
- D. A personal Apple Account with a signed enrollment profile

Answer: C

Explanation:

Apple's User Enrollment workflow is specifically designed for BYOD scenarios, and account-driven User Enrollment makes this even simpler. Apple Learning specifies that the required element is a Managed Apple Account issued through Apple Business Manager or Apple School Manager. When a user signs into Settings with their Managed Apple Account, the iOS or iPadOS device automatically recognizes the account type and begins the enrollment process. This streamlines the workflow by removing the need for downloaded configuration profiles or certificates. Unlike Device Enrollment, User Enrollment establishes a cryptographically separated environment where organizational data and personal data remain isolated. This balance gives IT control of apps, calendars, and email while protecting the user's privacy. Thus, the Managed Apple Account is the key to enabling account-driven User Enrollment.

NEW QUESTION # 76

Which Terminal command can you use to test network responsiveness inside and outside your network?

- A. networkUsage
- B. netstat
- C. networksetup
- D. networkQuality

Answer: D

Explanation:

The networkQuality command tests responsiveness. The macOS Deployment Reference states, "Introduced in macOS Monterey, the networkQuality command measures upload and download responsiveness, providing insight into network performance inside and outside your local network." References:

macOS Deployment Reference, "Network Diagnostics" section.

Apple Platform Deployment Guide, "Network Tools" section.

NEW QUESTION # 77

.....

The web-based Apple DEP-2025 practice test software is designed explicitly for the Apple Deployment and Management Exam exam. It is a well-known self-preparation tool that contains DEP-2025 Exam Questions approved by Apple Certified Professionals. Our Apple DEP-2025 exam questions are periodically updated and are similar to the real Apple Deployment and Management Exam exam questions.
