- A. They build a consolidated backlog during the Realize phase
- B. To validate customer scopes and requirements against SAP S/4HANA Cloud Public Edition best practices
- **C. To validate customer scopes during Fit-To-Standard workshops and provide the required configuration values for the Realize phase.**

Antwort: C

* Option A: They build a consolidated backlog during the Realize phase. **Incorrect.** BDCQs are used in the Explore phase to gather configuration data, not to build a backlog in the Realize phase. The SAP S/4HANA Cloud Implementation Guide states, "BDCQs are utilized in the Explore phase to collect configuration values, while backlogs are managed separately in SAP Cloud ALM during the Realize phase."

* Option B: To validate customer scopes during Fit-To-Standard workshops and provide the required configuration values for the Realize phase. **Correct.** Level 3 BDCQs are used during Fit-to-Standard workshops to validate scope and collect detailed configuration values for the Realize phase.
