

Amazon SCS-C02 Fragen Beantworten - SCS-C02 Zertifikatsdemo

Außerdem sind jetzt einige Teile dieser EchteFrage SCS-C02 Prüfungsfragen kostenlos erhältlich: <https://drive.google.com/open?id=1k6VK7OstFLp5DSQwPmLtMnK1JgQ5OMct>

Um Ihnen zu helfen, ob die Qualität der Dumps gut sind und ob Sie sich für diese Dumps eignen, bieten EchteFrage Dumps Ihnen kostenlose Demo in der Form von PDF-Versionen und Software-Versionen. Sie können diese kostenlose Demo bei EchteFrage finden. Nach dem Probieren können Sie sich entscheiden, ob diese Amazon SCS-C02 Prüfungsunterlagen zu kaufen. Und es kann auch diese Situation vermeiden, dass Sie bereuen, diese Amazon SCS-C02 Prüfungsunterlagen ohne das Kennen der Qualität zu kaufen.

Amazon SCS-C02 Prüfungsplan:

Thema	Einzelheiten
Thema 1	• Data Protection: AWS Security specialists learn to ensure data confidentiality and integrity for data in transit and at rest. Topics include lifecycle management of data at rest, credential protection, and cryptographic key management. These capabilities are central to managing sensitive data securely, reflecting the exam's focus on advanced data protection strategies.
Thema 2	• Security Logging and Monitoring: This topic prepares AWS Security specialists to design and implement robust monitoring and alerting systems for addressing security events. It emphasizes troubleshooting logging solutions and analyzing logs to enhance threat visibility.
Thema 3	• Identity and Access Management: The topic equips AWS Security specialists with skills to design, implement, and troubleshoot authentication and authorization mechanisms for AWS resources. By emphasizing secure identity management practices, this area addresses foundational competencies required for effective access control, a vital aspect of the certification exam.
Thema 4	• Management and Security Governance: This topic teaches AWS Security specialists to develop centralized strategies for AWS account management and secure resource deployment. It includes evaluating compliance and identifying security gaps through architectural reviews and cost analysis, essential for implementing governance aligned with certification standards.

Amazon SCS-C02 Zertifikatsdemo - SCS-C02 Deutsche

Mit der Lernhilfe zur Amazon SCS-C02 Zertifizierungsprüfung von EchteFrage können Sie die Amazon SCS-C02

Zertifizierungsprüfung ganz mühelos bestehen. Die von uns entworfenen Schulungsinstrumente werden Ihnen helfen, die Prüfung einmalig zu bestehen. Sie können unsere Demo zur Amazon SCS-C02 Zertifizierungsprüfung in EchteFrage als Probe kostenlos herunterladen und die Amazon SCS-C02 Prüfung ganz einfach bestehen. Wenn Sie noch zögern, benutzen Sie doch unsere Probeversion. Sie werden sich über ihre gute Wirkung wundern. Schicken Sie doch EchteFrage in den Warenkorb. Wenn Sie es verpassen, würden Sie lebenslang bereuen.

Amazon AWS Certified Security - Specialty SCS-C02 Prüfungsfragen mit Lösungen (Q22-Q27):

22. Frage

A company has public certificates that are managed by AWS Certificate Manager (ACM). The certificates are either imported certificates or managed certificates from ACM with mixed validation methods. A security engineer needs to design a monitoring solution to provide alerts by email when a certificate is approaching its expiration date.

What is the MOST operationally efficient way to meet this requirement?

- A. Set up AWS Security Hub. Turn on the AWS Foundational Security Best Practices standard with integrated ACM to send findings. Configure and use a custom action by creating a rule to match the pattern from the ACM findings on the NotBefore attribute as the event source. Create an Amazon Simple Notification Service (Amazon SNS) topic as the target.
- **B. Create an Amazon EventBridge rule by using a predefined pattern for ACM. Choose the metric in the ACM Certificate Approaching Expiration event as the event pattern. Create an Amazon Simple Notification Service (Amazon SNS) topic as the target.**
- C. Create an AWS Lambda function to list all certificates and to go through each certificate to describe the certificate by using the AWS SDK. Filter on the NotAfter attribute and send an email notification. Use an Amazon EventBridge rate expression to schedule the Lambda function to run daily.
- D. Create an Amazon CloudWatch alarm. Add all the certificate ARNs in the AWS/CertificateManager namespace to the DaysToExpiry metric. Configure the alarm to publish a notification to an Amazon Simple Notification Service (Amazon SNS) topic when the value for the DaysToExpiry metric is less than or equal to 31.

Antwort: B

Begründung:

Using Amazon EventBridge to create a rule for ACM Certificate Approaching Expiration events and configuring an SNS topic as the target provides an operationally efficient way to monitor and alert on certificate expirations. This method leverages AWS's native capabilities for event monitoring and notifications, reducing the need for custom implementations and ensuring timely alerts.

23. Frage

A company has an application that is accessed through an Application Load Balancer (ALB). The application has run for more than 6 months in production and uses Amazon CloudWatch for metrics.

A security engineer must implement a solution to detect surges in traffic. The solution must notify an existing Amazon Simple Notification Service (Amazon SNS) topic when these surges occur.

Which solution will meet these requirements?

- A. Enable Amazon GuardDuty. Create an Amazon EventBridge rule that runs when GuardDuty detects a finding that the ALB has exceeded its normal traffic patterns. Configure the SNS topic as the target of the rule.
- B. Implement CloudWatch Contributor Insights. Create a Contributor Insights rule that searches for values that are higher than normal for the appropriate metrics for the ALB. Configure the rule to notify the SNS topic if the values are detected.
- **C. Enable CloudWatch Anomaly Detection for the appropriate ALB metrics. Create alarms based on metric anomaly detection. Configure the alarms to notify the SNS topic when the alarms are in ALARM state.**
- D. Create an AWS WAF web ACL for the ALB. Include a rate-based rule that counts the requests and compares the number to the previous highest number of requests per second. Configure the rate-based rule action to target the SNS topic when the rule is matched.

Antwort: C

24. Frage

A company purchased a subscription to a third-party cloud security scanning solution that integrates with AWS Security Hub. A security engineer needs to implement a solution that will remediate the findings from the third-party scanning solution automatically.

Which solution will meet this requirement?

- A. Set up a custom action in Security Hub. Configure an AWS Lambda function as the target for the custom action to remediate the findings.
- B. Set up AWS Config rules to use AWS Systems Manager Automation runbooks to remediate the findings.
- C. Set up a custom action in Security Hub. Configure the custom action to call AWS Systems Manager Automation runbooks to remediate the findings.
- D. Set up an Amazon EventBridge rule that reacts to new Security Hub findings. Configure an AWS Lambda function as the target for the rule to remediate the findings.

Antwort: D

25. Frage

A company is planning to deploy a new log analysis environment. The company needs to implement a solution to analyze logs from multiple AWS services in near real time. The solution must provide the ability to search the logs. The solution also must send alerts to an existing Amazon Simple Notification Service (Amazon SNS) topic when specific logs match detection rules.

Which solution will meet these requirements?

- A. Analyze the logs by using AWS Security Hub. Search the logs from the Findings page in Security Hub. Create custom actions to match logs with detection rules and to send alerts to the SNS topic.
- B. Analyze the logs by using Amazon OpenSearch Service. Search the logs from the OpenSearch API. Use OpenSearch Service Security Analytics to match logs with detection rules and to send alerts to the SNS topic.
- C. Analyze the logs by using Amazon CloudWatch Logs. Use a subscription filter to match logs with detection rules and to send alerts to the SNS topic. Search the logs manually by using CloudWatch Logs Insights.
- D. Analyze the logs by using Amazon QuickSight. Search the logs by listing the query results in a dashboard. Run queries to match logs with detection rules and to send alerts to the SNS topic.

Antwort: B

Begründung:

Amazon OpenSearch Service provides near real-time log ingestion and indexing, full-text search, and analytics capabilities. Using the Security Analytics feature, you can define detection rules and configure alerts based on log patterns or threat indicators. These alerts can be routed to Amazon SNS topics for notification and automation workflows.

This meets the requirements for:

Near real-time log ingestion and search

Rule-based detection and alerting

Integration with SNS for notifications

This solution aligns with best practices under the Logging and Monitoring domain in the AWS Certified Security - Specialty curriculum.

26. Frage

A company uses identity federation to authenticate users into an identity account (987654321987) where the users assume an IAM role named IdentityRole. The users then assume an IAM role named JobFunctionRole in the target IAM account (123456789123) to perform their job functions.

A user is unable to assume the IAM role in the target account. The policy attached to the role in the identity account is:

What should be done to enable the user to assume the appropriate role in the target account?

- A. Option D
- B. Option B
- C. Option A
- D. Option C

Antwort: B

Begründung:

<https://aws.amazon.com/blogs/security/how-to-use-trust-policies-with-iam-roles/>

27. Frage

.....

Warum vertrauen wir EchteFrage so völlig auf unsere Produkte? Denn Viele Kunden haben mit Hilfe von Amazon SCS-C02 Prüfungssoftware die ausgezeichneten Leistungen vollbracht. Die Prüfungszertifizierung der Amazon SCS-C02 verbessert zweifellos Ihre Berufschancen. Wir wollen unsere Produkte verlässlicher machen, damit Sie unbesorgter auf die Prüfung vorbereiten. Außerdem versprechen wir, falls Sie nach der Benutzung der Amazon SCS-C02 noch mit der Prüfung scheitert, bieten wir Ihnen die volle Rückerstattung und entwickeln wir immer weiter bessere Prüfungssoftware der Amazon SCS-C02.
