

Latest PCA Test Prep & New PCA Test Forum

PCA Certification Exam Test

Questions and Answers (Verified Answers)

1. what is the pca responsible for during restorative rehabilitation activities

ANS providing reminders on when to perform these exercises

2. what is the pca responsible for prior to patient discharge

ANS removing iv catheters

3. who removes sterile dressings

ANS physicians

3/2

There are Prometheus Certified Associate Exam (PCA) exam questions provided in Prometheus Certified Associate Exam (PCA) PDF questions format which can be viewed on smartphones, laptops, and tablets. So, you can easily study and prepare for your Prometheus Certified Associate Exam (PCA) exam anywhere and anytime. You can also take a printout of these Linux Foundation PDF Questions for off-screen study. To improve the Prometheus Certified Associate Exam (PCA) exam questions, Prep4away always upgrades and updates its PCA dumps PDF format and it also makes changes according to the syllabus of the Prometheus Certified Associate Exam (PCA) exam.

Prep4away is also offering one year free PCA updates. You can update your PCA study material for 90 days from the date of purchase. The Prometheus Certified Associate Exam updated package will include all the past questions from the past papers. You can pass the PCA exam easily with the help of the PDF dumps included in the package. It will have all the questions that you should cover for the Linux Foundation PCA Exam. If you are facing any issues with the products you have, then you can always contact our 24/7 support to get assistance.

New Linux Foundation PCA Test Forum, PCA Practice Questions

Prep4away is so popular for the reason that our PCA exam preparations are infallible to offer help and we will offer incessant help.

On one hand, all content of our PCA study materials can radically give you the best backup to make progress. All related updates of the PCA learning guide will be sent to your mailbox. In a sense, our PCA training questions are classy and can broaden your preview potentially.

Linux Foundation Prometheus Certified Associate Exam Sample Questions (Q22-Q27):

NEW QUESTION # 22

How would you correctly name a metric that provides metadata information about the binary?

- A. app_build_desc
- B. app_build_info
- C. app_build
- D. app_metadata

Answer: B

Explanation:

The Prometheus naming convention for metrics that expose build or version information about an application binary uses the `_info` suffix. The standard pattern is:

`<application>_build_info`

This metric typically includes constant labels such as version, revision, branch, and goversion to describe the build environment.

For example:

`app_build_info{version="1.2.3", revision="abc123", goversion="go1.22"}` 1 This approach follows the official Prometheus instrumentation guidelines, where metrics ending in `_info` convey metadata or constant characteristics about the running process. The other options do not conform to the Prometheus best practice of suffix-based semantic naming.

Reference:

Extracted and verified from Prometheus documentation - Metric Naming Conventions, Exposing Build Information, and Standard `_info` Metrics sections.

NEW QUESTION # 23

Which Alertmanager feature allows you to temporarily stop notifications for a specific alert?

- A. Deduplication
- B. Silence
- C. Grouping
- D. Inhibition

Answer: B

Explanation:

The Silence feature in Alertmanager allows operators to mute specific alerts for a defined period. Each silence includes a matcher (labels), a creator, a comment, and an expiration time.

Silencing is useful during maintenance windows or known outages to prevent alert noise. Unlike inhibition, silences are manual and explicit.

NEW QUESTION # 24

What's "wrong" with the `myapp_filG_uploads_total{userid=„5123“,status="failed"}` metric?

- A. The status should not be exposed as a label.
- B. The metric name should consist of dashes instead of underscores.
- C. The `userid` should not be exposed as a label.
- D. The `_total` suffix should be omitted.

Answer: C

Explanation:

In Prometheus best practices, high-cardinality labels-especially those containing unique or user-specific identifiers-should be avoided. The metric `myapp_filG_uploads_total{userid="5123",status="failed"}` exposes the `userid` as a label, which is problematic.

Each distinct value of a label generates a new time series in Prometheus. If there are thousands or millions of unique users, this would exponentially increase the number of time series, leading to cardinality explosion, degraded performance, and high memory usage. The `_total` suffix is actually correct and required for counters, as per the Prometheus naming convention. The use of underscores in metric names is also correct, as Prometheus does not support dashes in metric identifiers. The status label, however, is perfectly valid because it typically has a low number of possible values (e.g., "success", "failed").

Reference:

Verified from Prometheus official documentation sections Instrumentation - Metric and Label Naming Best Practices and Writing Exporters.

NEW QUESTION # 25

You'd like to monitor a short-lived batch job. What Prometheus component would you use?

- A. PullGateway
- B. PushProxy
- C. PushGateway
- D. PullProxy

Answer: C

Explanation:

Prometheus normally operates on a pull-based model, where it scrapes metrics from long-running targets. However, short-lived batch jobs (such as cron jobs or data processing tasks) often finish before Prometheus can scrape them. To handle this scenario, Prometheus provides the Pushgateway component.

The Pushgateway allows ephemeral jobs to push their metrics to an intermediary gateway. Prometheus then scrapes these metrics from the Pushgateway like any other target. This ensures short-lived jobs have their metrics preserved even after completion.

The Pushgateway should not be used for continuously running applications because it breaks Prometheus's usual target lifecycle semantics. Instead, it is intended solely for transient job metrics, like backups or CI/CD tasks.

Reference:

Verified from Prometheus documentation - Pushing Metrics - The Pushgateway and Use Cases for Short-Lived Jobs sections.

NEW QUESTION # 26

Which PromQL statement returns the sum of all values of the metric `node_memory_MemAvailable_bytes` from 10 minutes ago?

- A. `sum(node_memory_MemAvailable_bytes) setoff 10m`
- B. `offset sum(node_memory_MemAvailable_bytes[10m])`
- C. `sum(node_memory_MemAvailable_bytes offset 10m)`
- D. `sum(node_memory_MemAvailable_bytes) offset 10m`

Answer: C

Explanation:

In PromQL, the `offset` modifier allows you to query metrics as they were at a past time relative to the current evaluation. To retrieve the value of `node_memory_MemAvailable_bytes` as it was 10 minutes ago, you place the `offset` keyword inside the aggregation function's argument, not after it.

The correct query is:

```
sum(node_memory_MemAvailable_bytes offset 10m)
```

This computes the total available memory across all instances, based on data from exactly 10 minutes in the past.

Placing `offset` after the aggregation (as in option B) is syntactically invalid because modifiers apply to instant and range vector selectors, not to complete expressions.

Reference:

Verified from Prometheus documentation - PromQL Evaluation Modifiers: `offset`, Aggregation Operators, and Temporal Query Examples.

NEW QUESTION # 27

.....

The Prep4away is a reliable and trusted platform for quick and complete Linux Foundation PCA exam preparation. At this platform,

New PCA Test Forum: <https://www.prep4away.com/Linux-Foundation-certification/braindumps.PCA.etc.file.html>

By detecting and reporting problems early, the problems can be fixed PCA early, before damage worsens, This shifts the hue of the color, In order to provide the superior service to our customers, we employ and train a group of highly qualified expert people on customer support and they will definitely help you prepare for your test with PCA actual lab questions: Prometheus Certified Associate Exam.

You may eager to realize our materials now, We offer you one-year free update of PCA valid study pdf from the date of you purchased, ITbraindumps's exam materials will be the best study guide for preparing your PCA certification exam.
