

# 100% Pass Quiz C-BCBTP-2502 - SAP Certified Associate - Positioning SAP Business Technology Platform as part of SAP Business Suite Useful New Exam Materials

P.S. Free 2026 SAP C-BCBTP-2502 dumps are available on Google Drive shared by TestInsides: [https://drive.google.com/open?id=1WMGaanNDUI\\_CVGFEISE0jU8tk3uMMInjN](https://drive.google.com/open?id=1WMGaanNDUI_CVGFEISE0jU8tk3uMMInjN)

By browsing this website, all there versions of C-BCBTP-2502 practice materials can be chosen according to your taste or preference. In addition, we provide free updates to users for one year long. If the user finds anything unclear in the C-BCBTP-2502 practice materials exam, we will send email to fix it, and our team will answer all of your questions related to the C-BCBTP-2502 practice materials. If the user fails in the C-BCBTP-2502 practice exam for any reason, we will refund the money after this process. We promise that you can get through the challenge within a week.

## SAP C-BCBTP-2502 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> <li>• <b>Discovering SAP Business Technology Platform:</b> This section of the exam measures the skills of SAP Solution Architects and focuses on positioning the SAP Business Technology Platform within the overall SAP Business Suite strategy. It includes understanding the platform's role in enabling transformation, aligning with enterprise strategy, and supporting digital innovation. Candidates are expected to recognize the relevance of SAP BTP in modern business processes and how it integrates with other SAP offerings.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>• <b>Illustrating CIO Transformation Delivered by SAP Business Suite:</b> This section of the exam evaluates the skills of IT Transformation Managers and covers the role of SAP Business Suite in delivering value for CIO-led digital transformation. It highlights the significance of SAP's portfolio in enterprise IT, introduces the capabilities of SAP BTP, and shows how it connects with end-to-end processes and industry-specific use cases. Candidates should also be able to identify the key products within SAP BTP and explain how cross-portfolio components integrate to deliver measurable value.</li> </ul>

## Test C-BCBTP-2502 Pass4sure, Detailed C-BCBTP-2502 Study Dumps

If you are willing to clear exam successfully, you need to not only read books and study materials but also purchase SAP C-BCBTP-2502 reliable exam cram for well-directed review which will make you half the work with double results. You can find three versions for each exam: PDF version, Software version and APP version. You can choose one or more versions of C-BCBTP-2502 Reliable Exam Cram based on your studying methods and habits.

### SAP Certified Associate - Positioning SAP Business Technology Platform as part of SAP Business Suite Sample Questions (Q20-Q25):

#### NEW QUESTION # 20

Which of the following are key features of SAP BTP's Integration Suite? (Choose two).

- A. Restricted integration to SAP-only services.
- B. Manual data processing with no automation.
- C. **Prebuilt connectors for SAP and third-party applications.**
- D. **Built-in API management for secure data exchange.**

**Answer: C,D**

Explanation:

The SAP Integration Suite is designed to handle the complexities of a hybrid and heterogeneous IT landscape.

One of its most significant features is the availability of thousands of prebuilt connectors and integration flows for both SAP and third-party applications (such as Salesforce, ServiceNow, and various government portals). These "accelerators" significantly reduce the time and cost associated with integration projects, as developers do not have to build connections from scratch. This allows businesses to achieve a faster "time-to-value" when expanding their digital ecosystem.

Another critical feature is built-in API management. As enterprises move toward microservices and cloud-native applications, the number of APIs (Application Programming Interfaces) increases exponentially. SAP Integration Suite provides a centralized layer to govern, secure, and monitor these APIs. This ensures that data exchange between systems is not only efficient but also highly secure, protecting the enterprise from unauthorized access or data breaches. By combining prebuilt content with robust API governance, SAP BTP enables organizations to create a "composable enterprise" where different systems can be easily connected and reconfigured to meet changing business needs, moving away from the rigid, manual processes of the past.

#### NEW QUESTION # 21

Which SAP BTP service supports real-time financial data analysis for banking and finance industries?

- A. SAP Conversational AI
- B. SAP Business Network
- C. **SAP HANA Cloud**
- D. SAP Fieldglass

**Answer: C**

Explanation:

For the banking and finance industries, the ability to process and analyze data in real-time is not just an advantage-it is a regulatory and operational necessity. SAP HANA Cloud is the foundational BTP service that supports this requirement. Due to its advanced in-memory computing architecture, HANA Cloud allows financial institutions to perform complex risk assessments, liquidity monitoring, and fraud detection on live transactional data.

In the context of the SAP Business Suite for Finance, HANA Cloud eliminates the latency associated with traditional data warehousing. Financial analysts can run "what-if" simulations and "instant closes" directly on the production data set. This real-time capability is essential for managing market volatility and meeting stringent reporting deadlines. Furthermore, HANA Cloud's multi-model processing allows it to handle not just standard relational data, but also spatial and graph data, which are increasingly used in modern financial services for relationship mapping and anti-money laundering (AML) initiatives. By positioning HANA Cloud as the central data engine, SAP BTP provides the high-performance infrastructure needed to power the next generation of digital banking services.

#### NEW QUESTION # 22

Which of the following are key products of SAP Business Technology Platform (SAP BTP)? (Choose two).

- A. SAP Integration Suite
- B. SAP HANA Cloud
- C. SAP Ariba
- D. SAP SuccessFactors

**Answer: A,B**

Explanation:

SAP Business Technology Platform (SAP BTP) is organized into four primary functional pillars: Database and Data Management, Analytics, Application Development and Integration, and Intelligent Technologies.

SAP HANA Cloud serves as the foundation of the Database and Data Management pillar, providing a single, integrated powerhouse for all enterprise data. It offers the speed of in-memory processing combined with the scalability of the cloud, allowing businesses to manage large volumes of data while providing a "single source of truth." On the other hand, SAP Integration Suite is the cornerstone of the Integration pillar. It is an integration platform-as-a-service (iPaaS) that allows organizations to seamlessly connect SAP and non-SAP applications, whether they reside on-premise or in the cloud. It provides pre-built content and connectors that significantly reduce the complexity of landscape orchestration. In contrast, SAP Ariba and SAP SuccessFactors are specialized Software-as-a-Service (SaaS) applications. While they are part of the broader SAP ecosystem and often run on or integrate via BTP, they are considered line-of-business (LoB) solutions rather than core components of the technology platform itself. Understanding this distinction is vital for positioning BTP as the underlying "glue" that enables the "Intelligent Enterprise" strategy by providing the technical tools necessary to extend and integrate these LoB applications.

#### NEW QUESTION # 23

How does SAP BTP enable businesses to extend their existing SAP applications?

- A. By providing low-code/no-code development tools.
- B. By limiting customization to SAP standard functionalities.
- C. By restricting integration with external systems.
- D. By requiring all applications to be developed from scratch.

**Answer: A**

Explanation:

A fundamental principle of modernizing the SAP ecosystem is the concept of a "Clean Core." SAP BTP enables this by allowing organizations to build extensions "side-by-side" rather than within the core ERP code (classic "in-app" customization). By providing low-code/no-code development tools, such as SAP Build, the platform empowers both professional developers and "citizen developers" (business users with limited coding knowledge) to create applications that add specific business value without compromising the stability or upgradeability of the core SAP S/4HANA system.

These tools allow for the rapid creation of user interfaces using SAP Fiori elements and the automation of manual tasks through visual drag-and-drop interfaces. This approach is a stark contrast to traditional development, which often required extensive, custom ABAP coding that made system upgrades difficult and expensive. By positioning BTP as the extension layer, SAP ensures that businesses can remain agile and respond quickly to market changes. This flexibility is supported by a robust set of services that

facilitate secure communication between the extension and the core system via APIs. Consequently, businesses can innovate at the edge while maintaining a stable, standardized digital core, which is the hallmark of the SAP Business Suite's evolution into the cloud era.

#### NEW QUESTION # 24

What is the primary function of SAP Business Process Intelligence?

- A. To replace existing workflow automation tools.
- B. To store customer transactional data.
- C. To manage API security and integrations.
- D. To analyze and optimize business processes using AI-driven insights.

**Answer: D**

Explanation:

Before an organization can automate or improve its operations, it must first understand how its processes are actually running. The primary function of SAP Business Process Intelligence (largely centered around the SAP Signavio suite) is to analyze and optimize business processes using AI-driven insights. It provides

"Process Mining" capabilities that scan the data logs of the SAP Business Suite to reveal the "real" path a business process takes, often uncovering hidden bottlenecks, manual workarounds, and deviations from the standard procedure.

By positioning Business Process Intelligence as a starting point for digital transformation, SAP BTP allows organizations to make data-backed decisions about where to automate. For example, the tool might discover that a specific regional office takes twice as long to process purchase orders compared to the global average.

Using AI, it can identify the root cause—such as a lack of automation or incorrect master data—and recommend specific BTP services (like SAP Build) to fix the issue. This creates a cycle of continuous improvement, where processes are constantly monitored, analyzed, and optimized, ensuring that the SAP Business Suite operates at peak efficiency and remains aligned with the company's strategic goals.

#### NEW QUESTION # 25

.....

The TestInsides is a trusted and leading platform that is committed to making the entire SAP C-BCBTP-2502 exam preparation process simple, smart, and quick. To achieve this objective TestInsides is offering real, valid, and updated SAP C-BCBTP-2502 Exam Questions. These SAP C-BCBTP-2502 exam dumps are the real C-BCBTP-2502 exam questions that surely will repeat in the upcoming C-BCBTP-2502 exam and you can pass the challenging exam.
