

CMMC-CCP Free Practice & Latest CMMC-CCP Study Guide

CMMC CCP PRACTICE EXAM QUESTIONS (DERIVED FROM SHANE'S PRACTICE TEST AND DIRECTLY FROM THE CAP) QUESTIONS WITH COMPLETE SOLUTIONS!!

What is a CUI Asset? Answer - Asset that stores, processes, or transmits CUI
Examples: Servers, Printers, Endpoints, Cloud Services, ERP Systems

Where do you document a CUI Asset? Answer - Document in Asset Inventory
Document in SSP
Document in Network Diagram

What practices do you apply to a CUI Asset? Answer - CMMC Level 2

What does CMMC stand for? Answer - Cybersecurity Maturity Model Certification

How many controls are in CMMC L2? Answer - 110 controls

What impact level is required when storing CUI? Answer - IL4

What contract clause is used for CMMC L1? Answer - FAR 52.204-21 (17 practices in total)

If you want to be CMMC L2 compliant, do you need to also be CMMC L1 compliant?
Answer - Yes

What do you call the part before the first period in the following control? AC.L1-3.1.1
Answer - Domain

What do you call the part after the first period in the following control? AC.L1-3.1.1
Answer - Level

What do you call the part after the dash in the following control? AC.L1-3.1.1 Answer
- Security Practice Number

What is confidentiality? Answer - Information Access and disclosure includes means for protecting personal privacy and proprietary information.

DOWNLOAD the newest ITdumpsfree CMMC-CCP PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1c0PMIjrZFWLmCsvWlEBCSJ4qQyVBGRx>

Our company according to the situation reform on conception, question types, designers training and so on. Our latest CMMC-CCP exam torrent was designed by many experts and professors. You will have the chance to learn about the demo for if you decide to use our CMMC-CCP quiz prep. We can sure that it is very significant for you to be aware of the different text types and how best to approach them by demo. At the same time, our CMMC-CCP Quiz torrent has summarized some features and rules of the cloze test to help customers successfully pass their CMMC-CCP exams.

Actual Cyber AB CMMC-CCP exam questions in our PDF format are ideal for restrictions-free quick preparation for the test. Cyber AB CMMC-CCP Real exam questions which are available for download in PDF format can be printed and studied in a hard copy format. Our Certified CMMC Professional (CCP) Exam (CMMC-CCP) PDF file of updated exam questions is compatible with smartphones, laptops, and tablets. Therefore, you can use this Certified CMMC Professional (CCP) Exam PDF to prepare for the test without limits of time and place.

Latest CMMC-CCP Study Guide - Dumps CMMC-CCP Vce

We can calculate that Certified CMMC Professional (CCP) Exam (CMMC-CCP) certification exam is the best way by which you can learn new applications, and tools and mark your name in the list of best employees in your company. You don't have to be dependent on anyone to support you in your professional life, but you have to prepare for ITdumpsfree real Certified CMMC Professional (CCP) Exam (CMMC-CCP) exam questions.

Cyber AB CMMC-CCP Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> CMMC Ecosystem: This section of the exam measures the skills of consultants and compliance professionals and focuses on the different roles and responsibilities across the CMMC ecosystem. Candidates must understand the functions of entities such as the Department of Defense, CMMC-AB, Organizations Seeking Certification, Registered Practitioners, and Certified CMMC Professionals, as well as how the ecosystem supports cybersecurity standards and certification.
Topic 2	<ul style="list-style-type: none"> CMMC-AB Code of Professional Conduct (Ethics): This section of the exam measures the integrity of cybersecurity professionals by evaluating their understanding of the CMMC-AB Code of Professional Conduct. It emphasizes ethical responsibilities, including confidentiality, objectivity, professionalism, conflict-of-interest avoidance, and respect for intellectual property, ensuring candidates can uphold ethical standards throughout their CMMC-related duties.
Topic 3	<ul style="list-style-type: none"> Scoping: This section of the exam measures the analytical skills of cybersecurity practitioners, highlighting their ability to properly define assessment scope. Candidates must demonstrate knowledge of identifying and classifying Controlled Unclassified Information (CUI) assets, recognizing the difference between in-scope, out-of-scope, and specialized assets, and applying logical and physical separation techniques to determine accurate scoping for assessments
Topic 4	<ul style="list-style-type: none"> CMMC Governance and Source Documents: This section of the exam measures the capabilities of legal or compliance advisors, covering key regulatory frameworks that govern cybersecurity compliance. Topics include Federal Contract Information, Controlled Unclassified Information, the role of NIST SP 800-171, DFARS, FAR, and the structure and requirements of CMMC v2.0, including self-assessments and certification levels.

Cyber AB Certified CMMC Professional (CCP) Exam Sample Questions (Q204-Q209):

NEW QUESTION # 204

An assessor needs to get the most accurate answers from an OSC's team members. What is the BEST method to ensure that the OSC's team members are able to describe team member responsibilities?

- A. Ensure confidentiality and non-attribution of team members.
- B. Interview groups of people to get collective answers.
- C. Let team members know the questions prior to the assessment.
- D. Understand that testing is more important than interviews.

Answer: A

Explanation:

During a CMMC assessment, assessors rely on interviews to validate the implementation of cybersecurity practices within an Organization Seeking Certification (OSC). Ensuring confidentiality and non-attribution allows employees to speak freely without fear of retaliation or bias, leading to more accurate and candid responses.

* CMMC Assessment Process and the Role of Interviews

* The CMMC Assessment Guide (Level 2) states that interviews are a key method to verify compliance with security controls.

* Employees may hesitate to provide truthful information if they fear negative consequences.

* To obtain accurate information, assessors must create an environment where team members feel safe.

* Ensuring Non-Attribution for Accurate Responses

* DoD Assessment Methodology highlights that interviewees should remain anonymous in reports.

* Non-attribution reduces the risk of OSC leadership influencing responses or retaliating against employees.

* Employees are more likely to provide accurate and honest descriptions of their responsibilities when confidentiality is guaranteed.

- * Why the Other Answer Choices Are Incorrect:
- * (A) Interview groups of people to get collective answers:
 - * Group interviews may limit honest responses due to peer pressure or management presence.
 - * Employees may hesitate to contradict supervisors or peers in a group setting.
- * (B) Understand that testing is more important than interviews:
 - * While testing (e.g., reviewing logs, configurations, and security settings) is crucial, interviews provide context on how security practices are implemented and followed.
 - * Interviews complement testing rather than being less important.
- * (D) Let team members know the questions prior to the assessment:
 - * Advanced notice may allow employees to prepare rehearsed answers, which might not reflect actual practices.
 - * This could reduce the effectiveness of the interview process.

Step-by-Step Breakdown: Final Validation from CMMC Documentation: The CMMC Assessment Process Guide and DoD Assessment Methodology emphasize the importance of confidentiality in interviews to ensure accuracy. Non-attribution protects employees and ensures assessors get honest, unfiltered answers.

Thus, the correct answer is:

C: Ensure confidentiality and non-attribution of team members.

NEW QUESTION # 205

An assessment is being completed at a client site that is not far from the Lead Assessor's home office. The client provides a laptop for the duration of the engagement. During a meeting with the network engineers, the Lead Assessor requests information about the network. They respond that they have a significant number of drawings they can provide via their secure cloud storage service. The Lead Assessor returns to their home office and decides to review the documents. What is the BEST way to retrieve the documents?

- A. Log into the client VPN from the assessor's laptop and retrieve the documents from the secure cloud storage service.
- B. Log into the secure cloud storage service to save copies of the documents on both the work and client laptops.
- C. Log into the client VPN from the client laptop and retrieve the documents from the secure cloud storage service.
- D. Use their home office workstation to retrieve the documents from the secure cloud storage service and save them to a USB stick.

Answer: C

Explanation:

Best Practices for Handling Sensitive Assessment Information: CMMC assessments involve handling sensitive and potentially CUI-related documents. Assessors must follow strict security policies to avoid unauthorized access, data leaks, or non-compliance with CMMC 2.0 and NIST SP 800-171 requirements.

Why Logging into the Client VPN on the Client Laptop is the Best Approach:

Ensures Data Protection: The client laptop is likely configured to meet security controls required for handling assessment-related materials.

Prevents Data Spillage: Keeping all assessment-related activities within the client's secured environment reduces the risk of data leakage or unauthorized storage.

Maintains Compliance with CMMC/NIST Guidelines: Using a properly configured client laptop and secured connection ensures compliance with NIST SP 800-171 controls on secure remote access (Requirement 3.13.12).

A). "Log into the secure cloud storage service to save copies of the documents on both the work and client laptops."

Incorrect# Sensitive data should not be duplicated across multiple systems, especially a non-client-approved laptop. Storing it on an unauthorized system violates data handling best practices.

C). "Log into the client VPN from the assessor's laptop and retrieve the documents from the secure cloud storage service."

Incorrect# The assessor's laptop may not be authorized or secured to handle client data. CMMC guidelines emphasize using approved, secured systems for assessment-related information.

D). "Use their home office workstation to retrieve the documents from the secure cloud storage service and save them to a USB stick." Incorrect# Transferring sensitive documents via USB introduces security risks, including unauthorized data storage and potential malware contamination.

Home office workstations are unlikely to be authorized for handling CMMC-sensitive data.

#Final Answer B. Log into the client VPN from the client laptop and retrieve the documents from the secure cloud storage service.

NEW QUESTION # 206

A defense contractor needs to share FCI with a subcontractor and sends this data in an email. The email system involved in this

process is being used to:

- A. transmit FCI.
- B. generate FCI
- C. manage FCI.
- D. process FCI.

Answer: A

NEW QUESTION # 207

When planning an assessment, the Lead Assessor should work with the OSC to select personnel to be interviewed who could:

- A. Demonstrate expertise on the CMMC requirements
- B. Be a senior person in the company
- C. Provide clarity and understanding of their practice activities
- D. Have a security clearance

Answer: C

Explanation:

Per the CMMC Assessment Process (CAP), when planning an assessment, the Lead Assessor must coordinate with the Organization Seeking Certification (OSC) to select interview participants who can provide clarity and understanding of their practice activities. The intent is to interview individuals directly involved with and knowledgeable about the processes and practices under review, rather than selecting personnel based solely on rank, clearance, or formal expertise in CMMC.

This ensures the assessment is evidence-based and grounded in how practices are actually performed within the OSC.

* CMMC Assessment Process (CAP), v1.0

NEW QUESTION # 208

A contractor has implemented IA.L2-3.5.3: Multifactor Authentication practice for their privileged users, however, during the assessment it was discovered that the OSC's standard users do not require MFA to access their endpoints and network resources. What would be the BEST finding?

- A. Practice is NOT MET since the objective was not implemented.
- B. The new acquisition is considered Specialized Assets.
- C. It is out of scope as this is a new acquisition.
- D. The process is running correctly.

Answer: A

Explanation:

Understanding IA.L2-3.5.3: Multifactor Authentication (MFA) Requirement The IA.L2-3.5.3 practice, derived from NIST SP 800-171 (Requirement 3.5.3), requires that multifactor authentication (MFA) be implemented for both privileged and standard users when accessing:

#Organizational endpoints(e.g., laptops, desktops, mobile devices).

#Network resources(e.g., VPNs, internal systems).

#Cloud services containing Controlled Unclassified Information (CUI).

Key Requirement for a "MET" Rating

For IA.L2-3.5.3 to be Met, the organization must:

Require MFA for all privileged users(e.g., system administrators).

Require MFA for standard users accessing endpoints and network resources.

Implement MFA across all relevant systems.

Since standard users do not require MFA in the OSC's current implementation, the practice is not fully implemented and must be rated NOT MET.

Why is the Correct Answer "D" (Practice is NOT MET since the objective was not implemented)?

A). The process is running correctly # Incorrect

MFA is only applied to privileged users, but it is also required for standard users. The process is not fully implemented.

B). It is out of scope as this is a new acquisition # Incorrect

New acquisitions must still meet MFA requirements if they handle CUI or network access.
