Microsoft AZ-500 Reliable Test Answers | AZ-500 Detail Explanation

Preparing with ExamDumpsVCE Microsoft Azure Security Technologies (AZ-500) practice exam would be the most effective way to get success. ExamDumpsVCE would give you access to Microsoft Azure Security Technologies (AZ-500) exam questions that are factual and unambiguous, as well as information that is important for the preparation of the AZ-500 AZ-500 exam.

The AZ-500 exam covers a range of topics related to Azure security, including securing Azure resources and services, implementing Azure security management, monitoring and responding to security incidents, and managing identity and access. Microsoft Azure Security Technologies certification can be earned by passing a single exam. AZ-500 Exam consists of multiple-choice questions and requires a passing score of at least 700 out of a possible 1000 points. The AZ-500 certification is intended to demonstrate a candidate's expertise in Azure security and can be beneficial for career advancement in cloud security roles.

Microsoft Azure Security Technologies Sample Questions (Q360-Q365):

NEW QUESTION # 360

You need to deploy AKS1 to meet the platform protection requirements.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.

Answer:

Explanation:

Explanation

Scenario: Azure AD users must be to authenticate to AKS1 by using their Azure AD credentials.

Litewire plans to deploy AKS1, which is a managed AKS (Azure Kubernetes Services) cluster.

Step 1: Create a server application

To provide Azure AD authentication for an AKS cluster, two Azure AD applications are created. The first application is a server

component that provides user authentication.

Step 2: Create a client application

The second application is a client component that's used when you're prompted by the CLI for authentication.

This client application uses the server application for the actual authentication of the credentials provided by the client.

Step 3: Deploy an AKS cluster.

Use the az group create command to create a resource group for the AKS cluster.

Use the az aks create command to deploy the AKS cluster.

Step 4: Create an RBAC binding.

Before you use an Azure Active Directory account with an AKS cluster, you must create role-binding or cluster role-binding. Roles define the permissions to grant, and bindings apply them to desired users. These assignments can be applied to a given namespace, or across the entire cluster.

NEW QUESTION # 362

You have an Azure subscription that contains a user named User1 and a storage account named storage1. The storage1 account contains the resources shown in the following table:

User1 is assigned the following roles for storage1:

* Storage Blob Data Reader

* Storage Table Data Contributor

* Storage File Data SMB Share Reader

Answer:

Explanation:

Explanation

No, Yes, No

NEW QUESTION # 363

You have a management group named Group1 that contains an Azure subscription named sub1. Sub1 has a subscription ID of 11111111-1234-1234-1234-1111111111.

You need to create a custom Azure role-based access control (RBAC) role that will delegate permissions to manage the tags on all the objects in Group1.

What should you include in the role definition of Role1? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 364

You have an Azure subscription named Subscription1 that contains an Azure Active Directory (Azure AD) tenant named contoso.com and a resource group named RG1.

You create a custom role named Role1 for contoso.com.

You need to identify where you can use Role1 for permission delegation.

What should you identify?

- A. contoso.com and RGT only
- B. contoso.com, RG1, and Subscription1
- C. contoso.com and Subscription1 only
- D. contoso.com only

Answer: D
