Perhaps this is the beginning of your change.

Salesforce Certified Platform Development Lifecycle and Deployment Architect Sample Questions (Q17-Q22):

NEW QUESTION # 17

Universal Containers (UC) is on the Unlimited Edition of Salesforce orgs. Currently, there are four Developer Pro sandboxes used by dev teams for various purposes, one partial copy sandboxes used for training, one full sandbox used for user acceptance testing. There is another full sandbox used for performance testing during the initial launch, and it is no longer being actively used. A system administrator had reported yesterday that none of the sandboxes can be refreshed. What is the most probable action an architect can help the system administrator with?

- A. It appears the org is using more sandboxes than the license permits. The Partial Copy sandbox shouldn't be used.
- B. Delete the full sandbox used for performance testing.
- C. Create a Salesforce support case, someone should know what is wrong.
- **D. Contact the Salesforce Account Team to do a sandbox License Count.**

Answer: D

NEW QUESTION # 18

Universal Containers (UC) is embarked on a large Salesforce transformation journey, UC's DevOps team raised a question about tracking Salesforce metadata throughout the development lifecycle across sandboxes all the way to production. As the deployment architect of the project, what should be the recommendation to track which version of each feature in different environments?

- **A. Use an AppExchange or third-party tool that is specialized in Salesforce deployment.**
- B. Use ChangeSet to track deployed customizations.
- C. Use an Excel sheet to track deployment steps and document the SFDX commands.
- D. Use Salesforce SFDX commands to deploy to different sandboxes.

Answer: A

NEW QUESTION # 19

Universal Containers (UC) has a recruiting application using Metadata API version 35, and deployed it in production last year. The current Salesforce platform is running on API version 36. A new field has been introduced on the object Apex page in API version 36. A UC developer has developed a new Apex page that contains the new field and is trying to deploy the page using the previous deployment script that uses API version 35. What will happen during the deployment?

- A. The deployment script will fail because the platform doesn't support the previous API version 35.
- **B. The deployment script will fail because the new field is not known for the previous API version 35.**
- C. The deployment script will pass because the new field is supported on the current platform version.
- D. The deployment script will pass because the new field is backward compatible with the previous API version 35.

Answer: B

NEW QUESTION # 20

Universal Containers has recently acquired another business that uses Salesforce extensively. UC wants to merge their Salesforce Orgs to effectively sell and service customer under one business. Traditionally, UC has followed an agile development methodology to deliver Salesforce functionality. With the merging businesses, UC is convinced that adopting a Waterfall development methodology is the best approach. Which are two positive aspects of using a Waterfall development methodology?

- **A. Complex processes that will need to be built are thoroughly understood and documented before coding begins.**
- B. Changes late in the process are expected and can be handled by integrating them into the requirements specs.
- **C. Milestones, timelines and estimates tend to be more accurate and predictable due to the upfront due diligence.**
- D. The costs of starting the project are low since much of the design work is pushed to later stages of the process.

Answer: A,C

NEW QUESTION # 21

Cloud Kicks is considering using an automated testing tool to help manage deployments between environments. When should the architect recommend the use of an automated testing tool?

- A. Automated tests should be run when branches are merged.
- **B. Automated tests should be run only when merging into Full or Partial Copy sandboxes.**
- C. Automated tests should be run daily in all Developer Orgs, and when branches are merged.
- D. Automated tests should be run daily in all Developer Orgs.

Answer: B

NEW QUESTION # 22

.....

So we are looking forward to establishing a win-win relation with you by our Plat-Arch-202 training engine.
