Latest SAP C_BCBAI_2509 Exam Vce, Exam C_BCBAI_2509 Questions Answers

To make sure that our C_BCBAI_2509 training braindumps are the best on matter on the content or on the displays, we invite volunteers to experience our C_BCBAI_2509 real exam before selling to customers. They will carefully tell their thoughts about our C_BCBAI_2509 Study Guide. Sometimes, their useful suggestions will also be adopted. That is the important reason why our C_BCBAI_2509 exam materials are always popular in the market.

SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite Sample Questions (Q32-Q37):

NEW QUESTION # 32
What are some strategic benefits of generative AI for RISE customers?
Note: There are 3 correct answers to this question.

- A. Improved encryption
- B. Enhanced clean core
- C. Cost efficiency

- D. Accelerated migration
- E. Improved agility

Answer: C,D,E

NEW QUESTION # 33
What enables SAP's Suite as a Service approach? Note: There are 3 correct answers to this question.

- A. Scalable intelligence
- B. Embedded AI
- C. Integrated applications
- D. Harmonized data

Answer: B,C,D

Explanation:
SAP's Suite as a Service approach is enabled by integrated applications, harmonized data, and embedded AI, as outlined in SAP Business AI documentation. Integrated applications ensure seamless connectivity across SAP's suite, enabling unified workflows and consistent user experiences. Harmonized data provides a single, standardized data model across applications, ensuring data consistency and enabling AI-driven insights. Embedded AI integrates intelligent capabilities directly into SAP applications, enhancing automation, analytics, and decision-making. These components collectively deliver a cohesive, cloud-based service model that drives efficiency and innovation. Scalable intelligence, while important, is not explicitly listed as a core enabler of this approach, and coordinated automation is a benefit rather than a foundational element.

NEW QUESTION # 34
Which of the following factors are part of SAP's commitment to building and operating AI responsibly? Note: There are 3 correct answers to this question.

- A. SAP data centers that are powered by renewable electricity only
- B. Optimized AI model sizes and routing
- C. Pervasive use of agile agentic AI
- D. Ethical AI governance

Answer: A,B,D

Explanation:
SAP's commitment to responsible AI is rooted in ethical, sustainable, and efficient practices. SAP data centers powered by renewable electricity only reflect SAP's dedication to sustainability, reducing the environmental impact of AI operations. Optimized AI model sizes and routing ensure efficient use of computational resources, minimizing energy consumption while maintaining performance, as highlighted in SAP's AI infrastructure guidelines. Ethical AI governance is a cornerstone, involving frameworks to ensure transparency, fairness, and accountability in AI development and deployment, as per SAP's Responsible AI Framework. Pervasive use of agile agentic AI is not explicitly listed as a factor in SAP's responsible AI strategy, and clean core-compliant extensions focus on system design rather than responsible AI. These principles align with SAP's broader mission to deliver trustworthy AI solutions.

NEW QUESTION # 35
(What does business AI mean? Note: There are 3 correct answers to this question.)

- A. Processes
- B. Agility
- C. Customer centricity
- D. Enterprise data
- E. Technology foundation

Answer: A,D,E

Explanation:
Comprehensive and Detailed Explanation From Exact Extract: Business AI in SAP is defined as the combination of technology foundation (the underlying AI technology), enterprise data (the business data it leverages), and processes (the business processes it enhances and automates). This holistic approach ensures AI is embedded in business contexts for relevant, reliable, and responsible outcomes, with customer centricity and agility as resulting benefits rather than core components.
Exact extracts supporting this:
"What does SAP Business AI mean? Essentially three things: The technology it is based on. The enterprise data it is trained on. The processes it runs through."learning.sap.com Enterprise data: "Grounded in customers' business data."learning.sap.com Processes: "Embed AI features across all business processes, delivering immediate value to businesses."events.sap.com "Automating processes, and enabling predictive analytics."community.sap.com Technology foundation: "The technology it is based on."learning.sap.com "These AI functionalities are designed to help businesses automate processes, gain insights from data, improve decision-making."community.sap.com Other options are incorrect because:
Option B: Customer centricity is a benefit or principle in SAP solutions (e.g., in supply chain), but not a core definitional component of business AI.
Option D: Agility is an outcome enabled by business AI, such as increasing business agility, but not part of its fundamental definition.
Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: From the SAP Learning course "Discovering SAP Business AI," specifically the unit "Explaining the role of SAP Business AI," which defines business AI as the intersection of technology, data, and processes. Supported by SAP community blogs and product overviews, aligning with C_BCBAI_2502 certification for positioning AI in the SAP Business Suite.

NEW QUESTION # 36

What are some advantages for businesses using Joule Agents? Note: There are 3 correct answers to this question.

- A. Unmatched extensibility and built-in security
- B. Agile business transformation and sustainable value chains
- C. Integration and collaboration across business functions
- D. Unrivaled process mining and applications
- E. Harmonized data and robust process expertise

Answer: B,C,E

NEW QUESTION # 37

......
