## SAP Certified Associate - Positioning SAP Business Suite via SAP Financial Management Solutions Sample Questions (Q35-Q40):

### NEW QUESTION # 35

Which reporting tool is integrated with SAP Business Suite for financial analysis?

- A. SAP Crystal Reports
- B. SAP Asset Management
- C. SAP Business One
- D. SAP HR Analytics

**Answer: A**

### NEW QUESTION # 36

Which key area of Financial Management uses both financial and non-financial data to model effective business scenarios that facilitate steering?

- A. Governance, Risk, & Compliance
- B. Financial Planning & Analysis
- C. Accounting & Financial Close
- D. Quote-to-Cash

**Answer: B**

Explanation:

Comprehensive and Detailed 150 to 250 words of Explanation From Positioning SAP Business Suite via SAP Financial Management Solutions documents:

Financial Planning & Analysis (FP&A) is the strategic engine of the finance department, responsible for translating corporate strategy into actionable financial targets. A defining characteristic of modern FP&A within the SAP ecosystem-specifically powered by SAP Analytics Cloud-is the ability to integrate both financial data (e.g., revenue, expenses, margins) and non-financial data (e.g., headcount, carbon emissions, units produced, customer satisfaction scores).

By combining these data sets, finance leaders can perform "Extended Planning and Analysis" (xP&A). This allows the CFO to model complex business scenarios that facilitate more accurate "steering" of the enterprise.

For instance, an FP&A professional can model how an increase in raw material costs (financial) combined with a shift in carbon tax regulations (non-financial/regulatory) will impact the overall profitability of a specific product line over the next five years. This holistic view ensures that planning is not done in a vacuum but is grounded in the operational realities of the business. By facilitating real-time "what-if" analysis, FP&A provides the agility needed to adjust course quickly in response to internal performance trends or external market shifts, ensuring the organization remains on track to meet its long-term objectives.

### NEW QUESTION # 37

The head of which finance function is most committed to streamlining operations through automation?

- A. Accounting and Controlling
- B. Sales / Revenue
- C. Audit, Compliance, and Tax
- D. Treasury and Shared Service Operations

**Answer: D**

Explanation:

Comprehensive and Detailed 150 to 250 words of Explanation From Positioning SAP Business Suite via SAP Financial Management Solutions documents:

While all finance functions benefit from efficiency, the head of Treasury and Shared Service Operations is typically the most committed to streamlining operations through automation. Shared Service Centers (SSCs) are designed specifically to centralize and process high volumes of transactional data-such as accounts payable, accounts receivable, and travel expenses-across the entire enterprise. For these leaders, "efficiency is the product." Automation in Treasury and Shared Services is critical because manual processing in these areas leads to high operational costs, human error, and liquidity risks. By implementing solutions like SAP Cash Application (for automated payment matching) and SAP Multi-Bank Connectivity (for automated bank communications), these

leaders can significantly reduce the cost per transaction and shorten processing times.

In the Treasury function, automation ensures that cash visibility is instantaneous, allowing for more effective liquidity management and risk mitigation. While Accounting and Controlling (Option B) also seek automation, their focus is often more on data integrity and closing speed, whereas Shared Services and Treasury are fundamentally driven by the operational "throughput" and cost-efficiency that only high-level automation can provide.

### NEW QUESTION # 38

What are some insights that finance provides in SAP Business Suite?

- A. Cost management
- B. Employee performance evaluation
- C. Technology ROI
- D. Supply chain optimization

**Answer: A,B,D**

### NEW QUESTION # 39

What is the primary function of SAP CRM?

- A. To optimize customer relationship management
- B. To enhance supply chain operations
- C. To manage financial operations
- D. To automate payroll processing

**Answer: A**

### NEW QUESTION # 40
