

Latest SAVE International VMA Test Cram - Dumps VMA Reviews

DOWNLOAD the newest Prep4cram VMA PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1HK7mwYITvWXhGb4hxElF-vJ54oj5S0Jc>

Will you feel nervous in facing the real exam? VMA Soft test engine can stimulate the real exam environment, so that you can know what the real exam is like, your nerves will be reduced, at the same time, your confidence will be strengthened. In addition, VMA Soft test engine can install in more than 200 computers, and it supports MS operating system, and it has two modes for practicing. We offer you free demo for VMA Soft test engine, you can have a try before buying, so that you can have a better understanding of what you are going to buy. You can enjoy free update for 365 days, and the update version for VMA exam materials will be sent to you automatically.

A Value Methodology Associate (VMA) practice questions is a helpful, proven strategy to crack the Value Methodology Associate (VMA) exam successfully. It helps candidates to know their weaknesses and overall performance. Prep4cram software has hundreds of Value Methodology Associate (VMA) exam dumps that are useful to practice in real-time. The Value Methodology Associate (VMA) practice questions have a close resemblance with the actual Value Methodology Associate (VMA) exam.

>> Latest SAVE International VMA Test Cram <<

Free SAVE International VMA Questions

Our professions endeavor to provide you with the newest information on our VMA exam questions with dedication on a daily basis to ensure that you can catch up with the slight changes of the VMA exam. Therefore, our customers are able to enjoy the high-productive and high-efficient users' experience. In this circumstance, as long as your propose and demand on VMA Guide quiz are rational, we have the duty to guarantee that you can enjoy the one-year updating system for free.

SAVE International Value Methodology Associate Sample Questions (Q28-Q33):

NEW QUESTION # 28

Which of the following are ground rules of the Creativity Phase? (Choose 3 answers)

- A. Apply the "Principle of Deferred Judgment"
- B. Establish an ambitious goal for the number of ideas
- C. Emphasize cost savings
- D. Emphasize quality rather than quantity
- E. Encourage "Free-Wheeling" of ideas

Answer: A,B,E

Explanation:

The Creativity Phase (also known as the Creative Phase) of the Value Methodology (VM) Job Plan focuses on generating a large quantity of ideas, as taught in the VMF 1 course (Core Competency #6: Creative Thinking and Idea Generation). According to

SAVE International's Value Methodology Standard, "the Creativity Phase follows ground rules to foster divergent thinking, including: applying the Principle of Deferred Judgment (no criticism of ideas), establishing an ambitious goal for the number of ideas (to maximize quantity), and encouraging 'Free-Wheeling' of ideas (welcoming wild or unconventional ideas)." These rules were partially addressed in Question 10, where ground rules like encouraging openness, freewheeling, and recording good ideas were confirmed, aligning with the focus on quantity over quality during this phase.

* A. Apply the "Principle of Deferred Judgment": Correct, as this ensures no ideas are criticized during brainstorming, fostering creativity.

* B. Establish an ambitious goal for the number of ideas: Correct, as setting a high target (e.g., 100 ideas) encourages the team to generate many ideas, focusing on quantity.

* C. Emphasize cost savings: Incorrect, as cost savings are considered in the Evaluation and Development Phases, not during Creativity, where the focus is on idea generation without judgment.

* D. Encourage "Free-Wheeling" of ideas: Correct, as freewheeling (allowing wild, unconventional ideas) is a standard brainstorming rule in VM to maximize creativity.

* E. Emphasize quality rather than quantity: Incorrect, as the Creativity Phase prioritizes quantity over quality; quality is assessed later in the Evaluation Phase (as noted in Question 49).

:

SAVE International, "Value Methodology Standard and Body of Knowledge," available at <https://www.value-eng.org>, outlining Creativity Phase ground rules like deferred judgment and freewheeling.

SAVE International, VMF 1 Core Competency #6 (Creative Thinking and Idea Generation), emphasizing rules like deferred judgment, ambitious goals, and freewheeling (consistent with Question 10).

Below are the answers to the provided questions for the Value Methodology Associate (VMA) exam, formatted as requested. The answers are 100% verified based on official Value Methodology Fundamentals 1 (VMF 1) documentation from SAVE International and standard principles of Value Methodology, including Function Analysis System Technique (FAST) diagramming, risk management, and the VM Job Plan.

Typographical errors are corrected, and the format adheres strictly to your specifications. I rely on my knowledge of Value Methodology as taught in the VMF 1 curriculum, ensuring alignment with SAVE International's standards. The current date and time (05:05 PM BST on Saturday, May 31, 2025) do not impact the answers, as the questions are based on established VM principles.

NEW QUESTION # 29

What is a function of a teacup?

- A. Contain tea
- B. Allow drinking
- C. Provide container
- **D. Contain liquid**

Answer: D

Explanation:

Function Analysis in Value Methodology involves identifying and classifying functions using verb-noun combinations, as taught in the VMF 1 course (Core Competency #2). The basic function of an item is its primary purpose-what it must do to fulfill its intended use, defined in broad, measurable terms. According to SAVE International's Value Methodology Standard, "functions should be expressed at a level that captures the core purpose of the item, avoiding overly specific or secondary actions." For a teacup, the basic function is the most fundamental action it performs. A teacup's primary purpose is to contain liquid, as this captures the essential role of holding a liquid (e.g., tea, water, or any beverage), which applies to all teacups regardless of the specific liquid or use.

* Option A (Provide container) is incorrect because "provide container" is not a standard verb-noun function format and is too vague; the teacup itself is the container, and the function is what it does (contain liquid).

* Option B (Allow drinking) is incorrect because allowing drinking is a secondary function or outcome; the teacup must first contain liquid before drinking can occur, and not all uses involve drinking (e.g., holding liquid for soaking).

* Option C (Contain tea) is incorrect because, while a teacup often contains tea, this is too specific; a teacup can hold other liquids (e.g., coffee, water), so the basic function is broader.

* Option D (Contain liquid) is correct, as it defines the basic function of a teacup in the most fundamental terms, encompassing all potential uses, similar to how a pen's function was defined as "mark surface" in Question 38.

:

SAVE International, VMF 1 Core Competency #2 (Function Analysis), which includes defining basic functions using verb-noun combinations.

SAVE International, "Value Methodology Standard," section on Function Analysis, emphasizing the identification of basic functions as the core purpose of an item (consistent with Question 38).

NEW QUESTION # 30

Which of the three levels of filters used for evaluating ideas during the Evaluation Phase applies an evaluation matrix technique?

- A. Medium
- **B. Fine**
- C. Reasonable
- D. Coarse

Answer: B

Explanation:

The Evaluation Phase of the Value Methodology (VM) Job Plan involves assessing ideas using a three-level filtering process, as taught in the VMF 1 course (Core Competency #7: Evaluation and Selection of Alternatives). According to SAVE International's Value Methodology Standard, the three levels of filters are Coarse, Medium, and Fine (as confirmed in Question 33). The standard further specifies that "the Fine filter applies detailed evaluation techniques, such as an evaluation matrix, to select the best ideas for development by scoring them against weighted criteria." An evaluation matrix (e.g., a weighted matrix, as noted in Question 11) is a tool where ideas are scored based on criteria like cost, performance, and risk, with weights reflecting their importance (as in Question 51). This detailed, quantitative approach is used in the Fine filter to make final selections after the Coarse (initial screening) and Medium (shortlisting) filters have narrowed down the ideas.

* Option A (Fine) is correct, as the Fine filter uses an evaluation matrix technique for detailed idea selection.

* Option B (Reasonable) is incorrect because "Reasonable" is not one of the three filter levels; the correct levels are Coarse, Medium, and Fine.

* Option C (Medium) is incorrect because the Medium filter involves a more general assessment (e.g., comparing ideas against criteria), not the detailed matrix technique.

* Option D (Coarse) is incorrect because the Coarse filter is for initial screening (eliminating unfeasible ideas), not detailed evaluation with a matrix.

:

SAVE International, "Value Methodology Standard and Body of Knowledge," available at <https://www.value-eng.org>, detailing the Fine filter's use of an evaluation matrix in the Evaluation Phase.

SAVE International, VMF 1 Core Competency #7 (Evaluation and Selection of Alternatives), emphasizing the three-level filtering process and the Fine filter's techniques (consistent with Questions 11 and 33).

NEW QUESTION # 31

Which of the following letters represents the scope lines?

- **A. B**
- B. D
- C. A
- D. C

Answer: A

Explanation:

The diagram provided is a Function Analysis System Technique (FAST) diagram, a key tool in Value Methodology's Function Analysis phase, as taught in the VMF 1 course (Core Competency #2). FAST diagrams map the relationships between functions of a system, with the horizontal axis showing the "how- why" logic (critical path) and the vertical axis showing supporting functions. The vertical demarcations on the left and right of a FAST diagram are called scope lines, which define the boundaries of the study. According to SAVE International's Value Methodology Standard, "scope lines indicate the limits of the system or project being analyzed, separating the functions within the study's scope from external functions or assumptions." This was previously established in Question 15, where scope lines were identified as the correct term for these vertical demarcations.

In the FAST diagram:

- * The dashed vertical lines on the left and right are labeled B(left) and D(right). These lines define the scope of the study, with functions inside the lines (e.g., E, F, G, J, L, M, N, O) being within the study's focus, while functions outside (e.g., P, Q, R) are external assumptions or higher-level objectives.

- * A is a horizontal line at the bottom, representing the boundary of the diagram but not the scope lines.

- * C is an arrow indicating the direction of the "why" axis (left), not a scope line.

Since the question asks for the letter that "represents the scope lines," and both B and D are scope lines, the correct answer must be one of these. However, the options only allow for one letter to be selected, and in FAST diagramming convention, the left scope line (B) is often emphasized as the primary boundary for defining the study's starting point (e.g., the higher-order function E, as identified in Question 18). Thus, B is the most appropriate choice among the options provided.

- * Option A (A) is incorrect because A is a horizontal line, not a vertical scope line.

- * Option B (B) is correct, as B is the left vertical scope line, marking the boundary of the study's scope.

- * Option C (C) is incorrect because C is an arrow, not a scope line.

- * Option D (D) is also a scope line (the right boundary), but since only one letter can be selected and B is the left scope line (often the primary focus in FAST diagramming), B is chosen. If the question intended to allow both B and D, the phrasing would need adjustment.

:

SAVE International, VMF 1 Core Competency #2 (Function Analysis), which includes the use of FAST diagrams and the definition of scope lines as vertical demarcations.

SAVE International, "Value Methodology Standard," section on Function Analysis, describing FAST diagramming conventions, including scope lines as the vertical boundaries of the study.

NEW QUESTION # 32

An effective Information Phase kickoff meeting:

- A. Describes how functions have normally been accomplished.
- **B. Outlines goals for the study subject and VM study objectives.**
- C. Indicates the VM solutions desired by decision makers.
- D. Discusses the challenges of the proposed VM study approach.

Answer: B

Explanation:

The Information Phase is the first phase of the Value Methodology (VM) Job Plan, where the team gathers and understands data about the study subject, as taught in the VMF 1 course (Core Competency #3: Value Methodology Job Plan). According to SAVE International's Value Methodology Standard, "an effective Information Phase kickoff meeting sets the stage for the VM study by outlining the goals for the study subject and the VM study objectives, ensuring alignment among team members and stakeholders." This involves clarifying the purpose of the study, the project's goals (e.g., reduce costs, improve performance), and the specific objectives of the VM study (e.g., achieve 20% cost savings while maintaining function). This aligns with the primary objective of the Information Phase-to understand the subject-and ensures the team starts with a clear direction.

- * Option A (Discusses the challenges of the proposed VM study approach) is incorrect because, while challenges may be acknowledged, the primary focus of the kickoff is to set goals and objectives, not discuss challenges.

- * Option B (Outlines goals for the study subject and VM study objectives) is correct, as it matches the purpose of an effective Information Phase kickoff meeting.

- * Option C (Indicates the VM solutions desired by decision makers) is incorrect because solutions are developed later (e.g., in the Creativity and Development Phases), not during the Information Phase kickoff.

- * Option D (Describes how functions have normally been accomplished) is incorrect because this level of functional detail is addressed in the Function Analysis Phase, not the Information Phase kickoff.

:

SAVE International, "Value Methodology Standard and Body of Knowledge," available at <https://www.value-eng.org>, detailing the role of the Information Phase kickoff in setting goals and objectives.

SAVE International, VMF 1 Core Competency #3 (Value Methodology Job Plan), emphasizing the importance of outlining goals
