

1z0-1042-24 Prüfungsfrage - 1z0-1042-24 Deutsch

Prüfungsfragen

Der Vorhang der Lebensbühne wird jederzeit geöffnet werden. Die Hauptsache ist, ob Sie spielen wollen oder einfach weglaufen. Diejenigen, die die Chancen ergreifen können, können Erfolg erlangen. Deshalb müssen Sie ExamFragen wählen. Sie können jederzeit Ihre Fertigkeiten zeigen. Die Prüfungsmaterialien zur Oracle 1z0-1042-24 Zertifizierungsprüfung von ExamFragen ist die effiziente Methode, die 1z0-1042-24 Prüfung zu bestehen. Mit 1z0-1042-24 Zertifikat können Sie Ihren Traum verwirklichen und Erfolg erlangen.

Oracle 1z0-1042-24 Prüfungsplan:

Thema	Einzelheiten
Thema 1	• Testing, Monitoring, and Troubleshooting Integrations: This section assesses candidates abilities in testing, monitoring, and troubleshooting integrations within the OIC.
Thema 2	• Creating Scheduled Integrations: In this section of the exam, candidates are evaluated based on their skills in managing scheduled integrations. This includes converting scheduled integrations to app-driven integrations and understanding the scheduling options within the OIC.
Thema 3	• Creating Orchestrated Integrations: This part of the exam evaluates the candidate's skills in creating and managing orchestrated integrations using OIC. Candidates should be able to manage OIC lookups, use the OIC Data Mapper, and incorporate custom JavaScript libraries into their integrations.

Thema 4	Getting Started with OIC Integrations: This section tests the ability of IT professionals and integration specialists to understand the fundamental components and concepts of Oracle Integration Cloud (OIC). Candidates are expected to describe the key features of OIC integration and explain core integration concepts.
Thema 5	Using OIC Connections & Adapters: Candidates must demonstrate their ability to create and configure OIC connections, including trigger and invoke connections. They should be familiar with the Connectivity Agent, which facilitates on-premises connectivity to OIC services.

1z0-1042-24 Deutsch Prüfungsfragen, 1z0-1042-24 Examsfragen

Die Forschungsmaterialien haben gezeigt, dass es schwierig ist, die Oracle 1z0-1042-24 Zertifizierungsprüfung zu bestehen. Unser ExamFragen hat erfahrungsreiche IT-Experten, die durch harte Arbeit die neuesten Schulungsunterlagen zur Oracle 1z0-1042-24 Zertifizierungsprüfung bearbeitet haben. Unser ExamFragen hat die besten Ressourcen, die Ihnen beim Bestehen der Oracle 1z0-1042-24 Prüfung helfen. Sie enthalten sowohl Fragen, als auch Antworten. Sie brauchen sich nicht so viel Mühe dafür auszugeben und können trotzdem eine hohe Note in der Prüfung bekommen. Wählen Sie doch die Schulungsunterlagen zur Oracle 1z0-1042-24 Zertifizierungsprüfung, die Ihnen sehr helfen können.

Oracle Cloud Infrastructure 2024 Application Integration Professional 1z0-1042-24 Prüfungsfragen mit Lösungen (Q22-Q27):

22. Frage

When creating integrations in Oracle Integration Cloud (OIC), a visual mapper enables you to map element nodes between applications by dragging source element nodes onto target element nodes.

Which statement is NOT true about the OIC Data Mapper functionality?

- A. In the Designer view, the Sources section contains data structures of all available data objects, which includes integration metadata, tracking variables, global variables, and integration property values.
- B. The data structure for the target service is always displayed on the right side in the Designer view.
- C. All transformation mappings use eXtensible Stylesheet Language (XSL).
- D. When you navigate to the mapper and select a target element, Expression Builder launches in a user-friendly mode by default.
- E. All Source and Target data objects are represented internally as JSON structures.

Antwort: E

Begründung:

Not all Source and Target data objects are represented as JSON structures in OIC; XML and other data formats are also supported. The rest of the statements are true regarding the OIC data mapper functionality.

23. Frage

You are tasked with creating a new integration in OIC that will be exposed to clients as a SOAP web service.

In addition, this integration will be invoking an external SOAP web service as part of the orchestration flow logic.

In your creation of these SOAP adapter connection components, which is a valid consideration?

- A. Suppress insertion of timestamp into the request and Ignore timestamp in the response message are optional fields only for the outbound Invoke connection configuration.
- B. The SAML and OAuth security policies are available options for creating either the inbound Trigger connection or the outbound Invoke connection configurations.
- C. The WSDL URL property value can be defined by uploading a file for either the inbound Trigger connection or the outbound Invoke connection configurations.
- D. You must explicitly specify the target server TLS version for the external web service outbound Invoke connection configuration.

Antwort: A

Begründung:

For outbound SOAP Invoke connections, options like "Suppress insertion of timestamp into the request" and "Ignore timestamp in the response message" allow managing timestamps in SOAP messages. These options are relevant only for outbound configurations, not for inbound triggers.

24. Frage

In Oracle Integration Cloud (OIC) Process, you create web forms to interact with end users. As part of creating a web form, you add its controls, configure its data, and define form behavior.

Which statement is true about creating web forms?

- A. You can assign only one style sheet and only one presentation to a web form.
- B. You can assign one or more stylesheets and only one presentation to a web form.
- C. You can assign only one style sheet and one or more presentations to a web form.
- **D. You can assign one or more stylesheets and one or more presentations to a web form.**

Antwort: D

Begründung:

You can assign multiple stylesheets and presentations to a web form in OIC, allowing for more dynamic customization of both the appearance (stylesheets) and content structure (presentations).

25. Frage

Oracle Integration Cloud (OIC) Service is available in two editions, Standard and Enterprise. Which two OIC Enterprise Edition capabilities are ALSO available in OIC Standard Edition?

- **A. Visual Builder**
- B. Integration Insight
- **C. File Server**
- D. B2B Trading Partner Agreements
- E. Enterprise Application adapters (such as EBS, JDE, SAP, and Siebel)

Antwort: A,C

Begründung:

Comprehensive and Detailed Explanation:

OIC comes in two editions: Standard and Enterprise, with the latter offering advanced features. However, some capabilities are shared:

- * File Server (A): Both editions include the embedded SFTP File Server, enabling secure file transfers without an external server.
- * Visual Builder (B): This low-code tool for creating custom UIs and extensions is available in both editions, enhancing integration workflows.

The other options are exclusive to Enterprise Edition:

- * Integration Insight (C): Provides real-time analytics and monitoring, unavailable in Standard.
- * B2B Trading Partner Agreements (D): Supports EDI-based B2B transactions, an Enterprise-only feature.
- * Enterprise Application adapters (E): Adapters for complex systems like EBS, JDE, SAP, and Siebel are restricted to Enterprise, while Standard supports basic SaaS and REST/SOAP adapters.

This distinction reflects Oracle's tiered licensing model, balancing cost and functionality.

26. Frage

You can group one or more Oracle Integration Cloud (OIC) integrations into a single structure called a package. Which statement is not true about OIC packages?

- A. All packages must include at least one integration.
- B. You can import packages directly from the Oracle Marketplace.
- C. Packages enable you to easily import and export a group of integrations to and from OIC.
- D. New packages can be created by clicking the Create button on the packages page in the OIC console.
- E. Integrations do not need to be part of a package.

- F. Packages cannot be locked to deny other users access to your integrations.

Antwort: F

Begründung:

Comprehensive and Detailed Explanation:

OIC packages are logical containers for grouping related integrations, facilitating management, export/import, and deployment. Let's dissect each option with in-depth analysis:

* Option A: All packages must include at least one integration.

* True: A package in OIC is meaningless without integrations. When you create a package, it's a prerequisite to associate at least one integration with it, either during creation or afterward. For example, if you're building a payroll processing suite, the package would include integrations for employee data sync, payment processing, etc. An empty package serves no purpose and isn't allowed in practice.

* Option B: You can import packages directly from the Oracle Marketplace.

* True: The Oracle Marketplace offers prebuilt integration packages (e.g., for connecting Oracle ERP to third-party apps). These can be imported into your OIC instance, saving development time. For instance, a Salesforce-to-Oracle HCM package could be downloaded and customized.

This aligns with OIC's ecosystem approach to accelerate adoption.

* Option C: Packages cannot be locked to deny other users access to your integrations.

* False (Not True): Packages can be locked in OIC to restrict editing or access by other users, enhancing security and version control. Locking prevents unintended modifications, especially in collaborative environments. For example, a production-ready payroll package might be locked to ensure stability. The ability to lock is a feature in the OIC console under package management, making this statement incorrect and thus the answer.

* Option D: New packages can be created by clicking the Create button on the packages page in the OIC console.

* True: In the OIC console, navigating to the Packages page reveals a "Create" button. Clicking it initiates the package creation process, where you define a name, identifier, and optionally add integrations. This user-friendly interface simplifies grouping—for example, creating a

"CustomerSyncPackage" for CRM integrations.

* Option E: Integrations do not need to be part of a package.

* True: Integrations can exist independently in OIC without being packaged. This flexibility suits standalone workflows, like a one-off file transfer integration, versus grouped processes like an end-to-end order management suite.

* Option F: Packages enable you to easily import and export a group of integrations to and from OIC.

* True: Packages streamline migration by exporting multiple integrations as a single PAR (Package Archive) file. For instance, exporting a package with five HR integrations to another OIC instance ensures consistency and reduces manual effort compared to exporting individual IAR files.

Why C is the answer: The ability to lock packages contradicts option C, making it the only untrue statement.

Locking is a critical feature for governance, especially in enterprise settings where multiple developers work concurrently.

Use Case Example: Imagine a team deploying a locked "OrderProcessingPackage" to production—locking prevents accidental changes, ensuring reliability.

27. Frage

.....

Wie kann man die Schulungsunterlagen von Oracle 1z0-1042-24 Zertifizierungsprüfung kaufen, die preiswert und doch von guter Qualität sind? ExamFragen wird den Wunsch der breiten Kandidaten erfüllen, dadurch dass ExamFragen ihnen die echten Testaufgaben und Antworten mit niedrigem Preis und hoher Qualität bietet. Im Vergleich zu den Kollegen in der selben Branche liegt der Umsatz von Schulungsunterlagen über Oracle 1z0-1042-24 Zertifizierung von ExamFragen weit voraus. Nach dem Besuch unserer Schulungsunterlagen von Oracle 1z0-1042-24 ist der Bestehensrat fast 100%. Wählen Sie ExamFragen, was bedeutet, dass Sie erfolgreich sein werden.
