NEW QUESTION # 73

Your organization has a requirement to create and apply a new theme for the application user interface.

Which option allows you to achieve this requirement?

- A. Setup and Maintenance Work Area
- B. User Interface Text
- C. Structure Page
- D. Appearance Page

Answer: D

Explanation:

The option that allows you to achieve this requirement is Appearance Page. This page allows you to create and apply a new theme for the application user interface by selecting various options such as colors, fonts, logos, etc. You can also preview and publish your theme changes using this page. Structure Page is not an option that allows you to achieve this requirement. This page allows you to customize the structure and layout of the application user interface by adding or removing components such as regions, tabs, fields, etc. Setup and Maintenance Work Area is not an option that allows you to achieve this requirement. This work area allows you to perform various setup tasks for implementing and configuring Oracle Fusion applications using predefined templates and spreadsheets. User Interface Text is not an option that allows you to achieve this requirement. This option allows you to customize the text and labels of the application user interface by editing or translating them using various tools such as Text Editor or Translation Workbench.

NEW QUESTION # 74

Identify three purposes for which the project resource search index is used. (Choose three.)

- A. Provide absence details for resources
- B. Filter counts while you search for resources
- C. Display resource details

- D. Calculate Resources Availability Scores
- E. Calculate Resource Qualification Scores

Answer: B,C,E

Explanation:

The project resource search index is used to store and retrieve information about project resources such as their availability, qualifications, preferences, etc. The project resource search index is used for three purposes:

- * Display resource details: The project resource search index provides the resource details such as name, email, job title, organization, etc. that are displayed on the resource search page.
- * Filter counts while you search for resources: The project resource search index provides the filter counts that show how many resources match each filter criterion on the resource search page.
- * Calculate Resource Qualification Scores: The project resource search index provides the qualification information such as skills, certifications, languages, etc. that are used to calculate the Resource Qualification Scores for each resource based on their match with the resource request. The project resource search index does not provide absence details for resources or calculate Resource Availability Scores. These are provided by other components such as Oracle Fusion Absence Management and Oracle Fusion Human Capital Management. NEW QUESTION # 75

While opening an organization tree on the Manage Organization Trees page, you notice that the hierarchy status is displayed as Inactive. Identify the two reasons for the organization tree to be in Inactive status. (Choose two.)

- A. You opened the hierarchy by clicking the name.
- B. You selected the Edit icon for opening the hierarchy.
- C. You used Create Tree in the action menu.
- D. You used View Tree Version in the action menu.
- E. You used Create Tree Version in the action menu.

Answer: C,E

Explanation:

When you use Create Tree or Create Tree Version in the action menu, you create a new organization tree or a new version of an existing tree, respectively. These actions result in an Inactive status for the organization tree, until you activate it. When you use View Tree Version or select the Edit icon or click the name of the tree, you open an existing organization tree that has an Active status.
