

1z0-1057-24 Exam Passing Score & Valid 1z0-1057-24 Guide Files

Our 1z0-1057-24 exam questions can meet your needs to the maximum extent, and our 1z0-1057-24 learning materials are designed to the greatest extent from the customer's point of view. So you don't have to worry about the operational complexity. As soon as you enter the learning interface of our system and start practicing our 1z0-1057-24 Learning Materials on our Windows software, you will find small buttons on the interface. These buttons show answers, and you can choose to hide answers during your learning of our 1z0-1057-24 exam quiz so as not to interfere with your learning process. Every aspect is perfect.

Oracle 1z0-1057-24 Exam Syllabus Topics:

Topic	Details
Topic 1	• Configure Project Resource Management: This section measures the skills of resource managers and focuses on defining project enterprise labor resources to optimize resource allocation and utilization.
Topic 2	• Configure Project Foundation: This section assesses the skills of project foundation specialists and includes setting up project calendars and periods, defining types and categorizations, managing project resources, describing rate schedules, project types, setting up transaction sources, and managing labor schedules to establish a solid foundation for project management.
Topic 3	• Configure Project Costing: Aimed at cost management analysts, this section covers configuring the Project Cost Collection Center, managing burdening and allocations, explaining capitalized interest calculations, describing budgetary controls, configuring Time & Labor for projects, and managing integrations to ensure accurate project costing.
Topic 4	• Setting up Common Project Configuration: Targeting project configuration specialists, this section involves managing Subledger Accounting, setting up Project Financial Management Organizations, and managing Reference Data Sharing to ensure consistent and accurate financial reporting.
Topic 5	• Using Functional Setup Manager: This section measures the skills of functional setup managers and focuses on understanding the Functional Setup Manager and the Rapid Implementation Workbook, which are essential for configuring and deploying Oracle Project Management Cloud applications.
Topic 6	• Configure Project Billing: Targeting billing specialists, this section involves configuring project cross-charging and transfer pricing, and managing project invoicing and revenue processes to ensure accurate and efficient billing operations.
Topic 7	• Configure Project Management: Aimed at project execution managers, this section describes common project execution components, managing issues and deliverables, project requirements, configuring social networks for project execution, managing project gates, and using Application Composer for project execution management to ensure seamless project operations.

Topic 8	Using Program Management: Targeting program managers, this section involves using program management and reporting tools to oversee multiple projects and ensure alignment with organizational objectives.
Topic 9	Configure Project Control: This section measures the skills of project control specialists and focuses on managing project budgets and forecasts to maintain control over project financials and performance.
Topic 10	Project Management Overview: This section assesses the skills of project management consultants and focuses on understanding the components of Oracle Project Management Cloud, including its integration capabilities.
Topic 11	Describing Navigation, User Experience, Personalization, and Approvals: Targeting user experience designers, this section evaluates knowledge of business processes supported by approvals and workflows, setting up approval and notification tasks, and concepts related to navigation, user experience, and personalization within the application.
Topic 12	Configure Project Performance Reporting: This section assesses the skills of performance reporting analysts and includes configuring and managing key performance indicators for project performance reporting to monitor and evaluate project success effectively.

Looking at the experiences of our loyal customers, you will find with the help of our excellent 1z0-1057-24 exam questions, to achieve the desired certification is no long a unreachable dream. And i believe that you will definitely be more determined to pass the 1z0-1057-24 Exam. At the same time, you will also believe that our 1z0-1057-24 learning questions can really help you. We can claim that as long as you study with our 1z0-1057-24 praparation engine for 20 to 30 hours, you will pass the exam easily.

Oracle Project Management Cloud 2024 Implementation Professional Sample Questions (Q10-Q15):

NEW QUESTION # 10

Your organization wants to capture the project details for work order labor and equipment resource transactions as part of a project-driven supply chain solution.

Which expenditure type class is recommended for the expenditure types that need to be defined for these type of transactions?

- A. Inventory
- B. Supplier Invoice
- C. Usages
- **D. Work In Process**

Answer: D

Explanation:

The expenditure type class that is recommended for the expenditure types that need to be defined for work order labor and equipment resource transactions is Work In Process. This class indicates that the transactions are related to work orders that are performed as part of a project-driven supply chain solution. This class also allows the transactions to be processed by Oracle Fusion Manufacturing applications and transferred to Oracle Fusion Project Costing applications. Supplier Invoice is not a valid expenditure type class for work order labor and equipment resource transactions. This class indicates that the transactions are related to supplier invoices that are entered in Oracle Fusion Payables applications and transferred to Oracle Fusion Project Costing applications.

Usages is not a valid expenditure type class for work order labor and equipment resource transactions. This class indicates that the transactions are related to material usages that are entered in Oracle Fusion Inventory Management applications and transferred to Oracle Fusion Project Costing applications. Inventory is not a valid expenditure type class for work order labor and equipment resource transactions. This class indicates that the transactions are related to inventory movements that are entered in Oracle Fusion Inventory Management applications and transferred to Oracle Fusion Project Costing applications.

NEW QUESTION # 11

Your customer wants to see how quantity, cost, and revenue amounts are automatically distributed by using Spread Curve. Identify two period options that are available for this purpose. (Choose two.)

- A. Accounting Periods
- B. Project Accounting Periods
- C. PA-GL Periods
- D. PA Calendar
- E. Calendar Types

Answer: A,B

Explanation:

Reference: https://fusionhelp.oracle.com/helpPortal/topic/TopicId_P_87F467307D50416BE040D30A68816855 Spread curves let you distribute quantity, cost, and revenue amounts automatically across accounting or project accounting periods. You assign a spread curve to each resource class. Planning resources (in the planning resource breakdown structure) inherit the spread curve setting from the associated resource class.

You can change the spread curve for the planning resource and for any corresponding task assignments, or budget or forecast lines.

NEW QUESTION # 12

Which two statements describe how the Resource Qualification Score is calculated?

- A. An individual's score is 100% if the resource request has a qualification, but no proficiency is specified, and the resource has the qualification.
- B. An individual's score is 100% if the resource request has a qualification with a specified proficiency and the resource has the qualification with a proficiency that is lower or higher than specified.
- C. An individual's score is 100% if the resource request has a qualification with a specified proficiency and the resource has the qualification that meets the specified proficiency.
- D. An individual's score is 100% if the resource request has a qualification with a specified proficiency and the resource does not have the qualification.

Answer: A,C

Explanation:

The Resource Qualification Score is a percentage that indicates how well an individual matches the qualifications required for a resource request. An individual's score is 100% if either of the following conditions are met:

* The resource request has a qualification, but no proficiency is specified, and the resource has the qualification. This means that any level of proficiency is acceptable for the qualification.

* The resource request has a qualification with a specified proficiency and the resource has the qualification that meets the specified proficiency. This means that the resource has the exact level of proficiency required for the qualification. An individual's score is not 100% if the resource request has a qualification with a specified proficiency and the resource does not have the qualification or has a different level of proficiency than required. In this case, the score is calculated based on how close the resource's proficiency is to the required proficiency. NEW QUESTION # 13

Which precedence order is used by the system for labor schedules to distribute payroll cost?

- A. Assignment Element > Element > Assignment
- B. Assignment > Assignment Element > Element
- C. Element > Assignment Element > Assignment
- D. Assignment > Element > Assignment Element

Answer: B

Explanation:

The precedence order that is used by the system for labor schedules to distribute payroll cost is Assignment > Assignment Element > Element. This means that the system first looks for a labor schedule that is assigned to the employee assignment, then for a labor schedule that is assigned to the payroll element of the employee assignment, and finally for a labor schedule that is assigned to the payroll element itself. The system uses the first labor schedule that it finds in this order to distribute the payroll cost to projects and tasks based on the hours and rates defined in the schedule. NEW QUESTION # 14

You search for resources to fulfill a project resource request but are unable to proceed after receiving the following error message: "The search for resources cannot be completed because the project resource search index is not available. Contact your help desk." Identify the cause for this error message. (Choose the best answer.)

- A. The index is in the process of being updated.
- B. The most recent update of the index finished successfully.
- C. The index has been built.
- D. The index is not in the process.

Answer: A

Explanation:

Ref: <https://docs.oracle.com/en/cloud/saas/project-portfolio-management/19a/fapfm/implementing-project-execution-management-applications.html#FAPFM1724547> Topic - Submitting the Process to Maintain Project Resource Search Index: Procedure Submit the Maintain Project Resource Search Index job set to update the resources that appear on the Search and Evaluate Resources page when a resource manager searches for resources to fulfill project resource requests. The job set consists of a set of processes that facilitate efficient and rapid searches for qualified resources.

Resource managers can't search for resources or view resource details if the search index isn't available for a project resource request with qualifications or keywords. For project resource requests without qualifications and keywords, resource managers can search for and evaluate resources based on resource availability even if the search index isn't current or available.

Caution: The search index isn't available if the Maintain Project Resource Search Index job set process fails, or while the process is running.

NEW QUESTION # 15

.....

So, what are you waiting for? Unlock your potential and buy Oracle 1z0-1057-24 questions today!
