1z0-1057-24 Exam Sample - 1z0-1057-24 Test Tutorials

Our product backend port system is powerful, so it can be implemented even when a lot of people browse our website can still let users quickly choose the most suitable for his 1z0-1057-24 learning materials, and quickly completed payment. It can be that the process is not delayed, so users can start their happy choice journey in time. Once the user finds the learning material that best suits them, only one click to add the 1z0-1057-24 learning material to their shopping cart, and then go to the payment page to complete the payment, our staff will quickly process user orders online. In general, users can only wait about 5-10 minutes to receive our 1z0-1057-24 learning material, and if there are any problems with the reception, users may contact our staff at any time. To sum up, our delivery efficiency is extremely high and time is precious, so once you receive our email, start your new learning journey.

Oracle Project Management Cloud 2024 Implementation Professional Sample Questions (Q98-Q103):

NEW QUESTION # 98

Which three setups can be configured by using Rapid Implementation for Project Financial Management Applications?

- A. Expenditure Types
- B. Project Templates
- C. Project Types
- D. Project Class Categories
- E. Work Type

Answer: A,B,C

Explanation:

Rapid Implementation for Project Financial Management Applications allows you to configure some common setups for project costing and billing using predefined templates and spreadsheets. Some of the setups that can be configured using Rapid Implementation are expenditure types, project templates, and project types. Work types and project class categories are not part of Rapid Implementation. NEW QUESTION # 99

Which three tasks can be performed using the project requirements work area? (Choose three.)

- A. tracking backlog item status from the requirement storyboard.
- B. creating issues for the backlog items.
- C. adding scrum master to backlog items.
- D. creating change orders for the backlog items.
- E. creating projects and tasks in the context of backlog items.

Answer: A,B,E

NEW QUESTION # 100

Which component provides a human workflow service that handles all interactions with users or groups in business processes?

- A. BPM Worklist
- B. Security Console
- C. SOA Suite
- D. Subledger Accounting

Answer: A

Explanation:

The BPM Worklist component provides a human workflow service that handles all interactions with users or groups in business processes. The BPM Worklist allows users to view, act on, track, and administer workflow tasks that require their attention. Users can also delegate, escalate, or reassign tasks to other users or groups as needed.

NEW QUESTION # 101

Which data format is supported by SOAP Web services to establish communication between web services consumers and web services providers?

- A. CSV
- B. JSON
- C. XLSX
- D. XML

Answer: D

Explanation:

XML (Extensible Markup Language) is the data format that is supported by SOAP (Simple Object Access Protocol) Web services to establish communication between web services consumers and web services providers. XML is a standard format that allows data to be exchanged across different platforms and applications. SOAP Web services use XML to encode the messages and data that are sent and received between the web services endpoints. NEW QUESTION # 102

As part of maintaining (importing new employees that were added last week) project enterprise labor resources in your organization, you submit the Maintain Project Enterprise Labor Resources process to create and update resources based on changes in HCM. You define maintenance conditions on the Manage Project Enterprise Labor Resource page to process both employees and contingent workers. (Choose the best answer.)

- A. Jobs
- **B. Person Type**
- C. attributes that the project enterprise resources are assigned after creation
- D. Pool Membership

Answer: B

Explanation:

Reference: https://docs.oracle.com/cloud/farel8/projects_gs/OAPEX/F1082603AN23E61.htm Manage Project Enterprise Labor Resource Maintenance Conditions Project Enterprise Labor Resources: How They Are Automatically Created and Maintained Run the Maintain Project Enterprise Labor Resources process to create resources, remove resource availability for staffing, and maintain the resource search index.

Settings That Affect the Maintain Project Enterprise Labor Resources Process Create and maintain project enterprise labor resources by defining a set of conditions that specify the employees and contingent workers in Oracle Fusion Human Capital Management (HCM) to create as resources in Oracle Fusion Project Portfolio Management. Define the resource attribute values, such as the resource calendar and primary project role, to assign to the new resources.

The following table lists the criteria that you define for selecting HCM persons to create as project enterprise labor resources.

Selection Criteria

Description

Person type

Select the HCM person type for the process to use as criteria when selecting HCM persons to create as resources. Available person types are employees, contingent workers, or both employees and contingent workers.

Option to select people based on job

Select this option for the process to create resources for HCM persons with specific jobs.

Caution If you do not select job criteria for this condition, the process will create resources for all eligible people based only on the person type.

Jobs

If you selected the option to select people based on job, then select the jobs for the process to use as HCM person selection criteria.

The following table lists the attributes for which you specify values to assign to resources that are created for the condition.

Resource Attribute

Description

Option to manage resource availability and staffing

Select this option for resource managers to manage the availability and project staffing of resources who are created based on the condition. Resources who are managed in Oracle Fusion Project Resource Management are eligible to fulfill project resource requests.

Calendar

Select the resource calendar for resources that are created based on the condition. The resource calendar defines the work schedule for project enterprise labor resources, and includes working days and hours and any exceptions, such as holidays.

Primary project role

Select the primary project role for resources that are created based on the condition. Project roles are maintained in Oracle Fusion Project Management.

Cost rate and currency

Enter the cost rate and currency for resources that are created based on the condition.

Bill rate and currency

Enter the bill rate and currency for resources that are created based on the condition.

NEW QUESTION # 103

.....

Maybe you are unfamiliar with our 1z0-1057-24 latest material, but our 1z0-1057-24 real questions are applicable to this exam with high passing rate up to 98 percent and over. Choosing from a wide assortment of practice materials, rather than aiming solely to make a profit from our 1z0-1057-24 latest material, we are determined to offer help. Quick purchase process, free demos and various versions and high quality 1z0-1057-24 Real Questions are all features of our advantageous practice materials. With passing
