Latest Oracle 1z0-1057-25 Braindumps Free - 100% 1z0-1057-25 Accuracy

For exam applicants Actual4Exams offers real Oracle 1z0-1057-25 exam questions. There are three formats of the Oracle Project Management Cloud 2025 Implementation Professional (1z0-1057-25) practice material. These formats are PDF, desktop practice exam software, and web-based Oracle Project Management Cloud 2025 Implementation Professional (1z0-1057-25) practice exam. With these questions, you can crack the Oracle 1z0-1057-25 certification exam and save your time and money.

Oracle Project Management Cloud 2025 Implementation Professional Sample Questions (Q80-Q85):

NEW QUESTION # 80

Your business user has created a purchase order (PO) that has the following attributes:

Accrue at Receipt = Yes

Matching Option = 2 way

Receipt Close Tolerance = 100%

After approval, the PO is closed for receiving without creating a receipt. An AP invoice is created by matching to the PO. The user now runs Create Accounting for Receiving Transactions and then the "Import and Process Cost transactions" ESS (Enterprise Scheduler Service) job using the Transaction Source parameter as "Oracle Payables". The user notices that there is no cost transferred to the projects. Identify two reasons for this problem. (Choose two.)

- A. When you have an AP invoice that is matched against a PO with Accrue at Receipt set to Yes, cost is transferred to

project by payables.

- B. When you have an AP invoice that is matched against a PO with Accrue at Receipt set to YES, cost is transferred to projects by Cost Management and not by Payables.
- C. When you have an AP invoice that is matched against a PO with Accrue at Receipt set to NO, cost is transferred to projects by receipt accounting.
- D. When you have an AP invoice that is matched against a PO with Accrue at Receipt set to Yes, cost is transferred to projects only if there are accounted receipt lines.

Answer: B,D

Explanation:

When the Accrue at Receipt option is set to Yes on a PO, the cost of the items or services is accrued when they are received, not when they are invoiced. Therefore, the cost is transferred to projects by Cost Management and not by Payables. However, if the PO is closed for receiving without creating a receipt, there will be no accounted receipt lines and no cost will be transferred to projects. To transfer the cost to projects, you need to either create a receipt or reopen the PO for receiving. Reference:

NEW QUESTION # 81

As part of maintaining (importing new employees that were added last week) project enterprise labor resources in your organization, you submit the Maintain Project Enterprise Labor Resources process to create and update resources based on changes in HCM. You define maintenance conditions on the Manage Project Enterprise Labor Resource page to process both employees and contingent workers.

Which three are parameters that are based on which the system identifies the new resources?

- A. Project Unit
- B. Business Unit
- C. Organization
- D. Jobs
- E. Department

Answer: B,C,D

Explanation:

Ref: <https://docs.oracle.com/en/cloud/saas/project-portfolio-management/19b/fapfm/implementing-project-execution-management-applications.html#FAPFM1718570> Topic - Manage Maintenance Conditions for Project Enterprise Labor Resource

NEW QUESTION # 82

You are now the project manager of a newly created implementation project. Which two items are not part of managing an implementation project?

- A. Assign tasks to various users who are responsible for managing setup data.
- B. Monitor the progress of completing setup tasks.
- C. Enable optional functional areas and features by opting in.
- D. Generate a list of setup tasks.
- E. Select the offering you want to implement.

Answer: C,E

Explanation:

Selecting the offering you want to implement and enabling optional functional areas and features by opting in are not part of managing an implementation project. These are part of configuring an implementation project, which is done before managing an implementation project. Configuring an implementation project allows you to define the scope and features of your implementation based on your business needs. Managing an implementation project involves assigning tasks to various users who are responsible for managing setup data, monitoring the progress of completing setup tasks, and generating a list of setup tasks. These are part of executing an implementation project, which is done after configuring an implementation project. Executing an implementation project allows you to perform the setup tasks and validate the setup data for your implementation. Reference:

NEW QUESTION # 83

Your customer wants to see how quantity, cost, and revenue amounts are automatically distributed by using Spread Curve. Identify two period options that are available for this purpose. (Choose two.)

- A. Accounting Periods
- B. Calendar Types
- C. PA Calendar
- D. PA-GL Periods
- E. Project Accounting Periods

Answer: A,E

Explanation:

Reference https://fusionhelp.oracle.com/helpPortal/topic/TopicId_P_87F467307D50416BE040D30A68816855

Spread curves let you distribute quantity, cost, and revenue amounts automatically across accounting or project accounting periods. You assign a spread curve to each resource class. Planning resources (in the planning resource breakdown structure) inherit the spread curve setting from the associated resource class.

You can change the spread curve for the planning resource and for any corresponding task assignments, or budget or forecast lines.

NEW QUESTION # 84

Your organization has been using project class categories and codes for reporting purposes and is set up at the project level. You recently defined a new project type, Capital-Contract, and created new class categories named Build, Operate, and Transfer (BOT) and Build, Transfer, and Maintain (BTM), with class codes of Yes

/No. But on creation of a project, you are unable to associate these class categories and codes.

Identify two setups that are mandatory for these class categories and codes to be displayed. (Choose two.)

- A. Class categories should be assigned to project type.
- B. Class codes should be associated with a related set code.
- C. Class categories should be assigned to business unit.
- D. Class codes should be assigned to project unit.

Answer: A,B

Explanation:

Ref: <https://docs.oracle.com/en/cloud/saas/project-portfolio-management/19a/oapfm/project-foundation-configuration-manage-project-types.html#OAPFM360164> Topic - Associating Project Types and Class Categories: Examples Project classifications group your projects according to categories and codes that you define. When you associate project classifications with project types, the classification is available for selection on projects with that project type.

Use any of the following methods to associate class categories with project types:

* Add a classification to the project type definition

For each classification that you associate with the project type, you can enable the Assign to All Projects option to automatically add the classification to the project definition for all new projects with the project type. When this option is enabled, all projects with this project type must be assigned a class code for the class category.

* Add a project type to the class category definition

* Enable the Assign to all Project Types option on the class category definition

NEW QUESTION # 85

.....

Do you want to pass the Oracle 1z0-1057-25 exam on the first attempt but do not know where to start the preparation?

Then Actual4Exams has a solution to all your problems. Actual4Exams is among the greatest resources for preparing for Oracle 1z0-1057-25 Certification test. With real 1z0-1057-25 PDF Questions of Actual4Exams you can simply prepare for your 1z0-1057-25 exam from home, the office, or your place of work.
