Oracle Project Management Cloud 2025 Implementation Professional 1z0-1057-25 Prüfungsfragen mit Lösungen (Q124-Q129):

124. Frage

You search for resources to fulfill a project resource request but are unable to proceed after receiving the following error message: "The search for resources cannot be completed because the project resource search index is not available. Contact your help desk." Identify the cause for this error message. (Choose the best answer.)

- A. The index is not in the process.
- B. The most recent update of the index finished successfully.
- C. The index is in the process of being updated.

- D. The index has been built.

Antwort: C

Begründung:

Ref: <https://docs.oracle.com/en/cloud/saas/project-portfolio-management/19a/fapfm/implementing-project-execution-management-applications.html#FAPFM1724547> Topic - Submitting the Process to Maintain Project Resource Search Index: Procedure Submit the Maintain Project Resource Search Index job set to update the resources that appear on the Search and Evaluate Resources page when a resource manager searches for resources to fulfill project resource requests. The job set consists of a set of processes that facilitate efficient and rapid searches for qualified resources.

Resource managers can't search for resources or view resource details if the search index isn't available for a project resource request with qualifications or keywords. For project resource requests without qualifications and keywords, resource managers can search for and evaluate resources based on resource availability even if the search index isn't current or available.

Caution: The search index isn't available if the Maintain Project Resource Search Index job set process fails, or while the process is running.

125. Frage

Your customer accounts revenue based on, product class category. Because all your customer's projects are funded by private and government institutions, they decide to classify all projects based on their funding source to accurately report on revenue in General Ledger. Accordingly, you create a new class category

"Funding Source" and assign it to all projects. However, you notice that the accounting is still happening based on product class category. Identify the reason for this problem. (Choose the best answer.)

- A. Funding source class category is not enabled for "available as accounting source".
- B. Funding source class category is assigned to all project types.
- C. Product class category is not enabled for "available as accounting source".
- D. Funding source class category is enabled for "available as accounting source".

Antwort: A

Begründung:

Ref: <https://docs.oracle.com/en/cloud/saas/project-portfolio-management/19b/oapfm/project-foundation-configuration-define-types-and-categorizations.html#OAPFM222700> Topic - Manage Project Class Categories Setting Up Class Categories: Points to Consider Available as Accounting Source This option indicates if the class category is available as an accounting source so that Oracle Fusion Subledger Accounting can use the category to create mapping sets, account rules, journal line rules, and description rules.

Only one class category at a time is available as an accounting source in Oracle Fusion Subledger Accounting.

To change the class category that Oracle Fusion Subledger Accounting uses, deactivate the old class category and create a new one with a different date range.

126. Frage

Your customer has a requirement to import and process third-party transactions that are "costed" and "accounted".

Which configuration option needs to be set satisfy the requirement? (Choose the best answer.)

- A. Import Options
- B. Transaction Source Options
- C. Document Options
- D. Document Entry Options

Antwort: B

Begründung:

Reference https://docs.oracle.com/cd/E51367_01/projectop_gs/OAPJC/F1071488AN1004C.htm To import and process third-party transactions that are costed and accounted, you need to set the Transaction Source Options for the transaction source that you use to import the transactions. The Transaction Source Options allow you to specify whether the transactions are costed and accounted by the source system or by Oracle Fusion Cost Management. You can also specify whether to validate and transfer costs and accounting entries to projects and general ledger. 128. Frage

Which step within the functional setup manager helps you to move your verified setup data from the test environment to a production environment?

- A. Opting In
- B. Planning
- C. Setting Up
- D. Deploying
- E. Maintaining

Antwort: D

Begründung:

The Deploying step within the functional setup manager helps you to move your verified setup data from the test environment to a production environment. This step allows you to export and import setup data across instances using spreadsheets or configuration packages. You can also compare and validate setup data across instances using reports and dashboards.
