

1Z0-1061-24 PDF - 1Z0-1061-24 Demotesten

BONUS!!! Laden Sie die vollständige Version der ITZert 1Z0-1061-24 Prüfungsfragen kostenlos herunter:
<https://drive.google.com/open?id=1yFcoHE5IoncIUuMx5peF0wX9YMjpB91>

Eine geeignete Ausbildung zu wählen stellt eine Garantie für den Erfolg dar. Aber die Wahl ist von großer Bedeutung. ITZert hat einen guten Ruf und breite Beliebtheit. Man hat keine Gründe, den ITZert einfach zu weigern. Dennoch ist es nicht wirksam, wenn die vollständigen Schulungsunterlagen zur Oracle 1Z0-1061-24 Prüfung Ihnen nicht passen. So können Sie vor dem Kauf die Demo als Probe herunterladen. Auf diese Weise können Sie sich gut auf die Prüfung vorbereiten und die Oracle 1Z0-1061-24 Prüfung ohne Schwierigkeit bestehen. Das ist ein wichtiger Grund dafür, warum viele Kandidaten uns wählen. Wir bieten die besten, kostengünstigsten und vollständigsten Schulungsunterlagen, um den Kandidaten beim Bestehen der Oracle 1Z0-1061-24 Prüfung helfen.

Ich kann mein Leben und Arbeit jetzt nicht ertragen. Ich hoffe auf eine andere bessere Arbeit. Sind Sie der ähnlichen Meinung? Aber, wie kann ich bessere Arbeit bekommen? Lieben Sie IT? Wollen Sie durch IT-Zertifizierungsprüfungen Ihre Fähigkeit beweisen? Wenn ja, nehmen Sie vielleicht an den IT-Zertifizierungsprüfungen teil. Es ist sehr wichtig, 1Z0-1061-24 Zertifizierung zu bekommen, wenn Sie großen Erfolg in diesem Bereich machen wollen. Damit können Sie neue Chancen für Ihre Karriere schaffen. Wissen Sie Oracle 1Z0-1061-24 Prüfung? Die 1Z0-1061-24 Zertifizierung kann es erleichtern, dass Sie einen Job finden wollen. Aber fühlen Sie es sehr schwierig, die 1Z0-1061-24 Prüfung zu bestehen? Es macht nichts, weil Sie die 1Z0-1061-24 Prüfungsmaterialien von ITZert benutzen können.

1Z0-1061-24 Demotesten, 1Z0-1061-24 PDF Testsoftware

Warum vertrauen wir ITZert so völlig auf unsere Produkte? Denn Viele Kunden haben mit Hilfe von Oracle 1Z0-1061-24 Prüfungssoftware die ausgezeichneten Leistungen vollbracht. Die Prüfungszertifizierung der Oracle 1Z0-1061-24 verbessert zweifellos Ihre Berufschancen. Wir wollen unsere Produkte verlässlicher machen, damit Sie unbesorgter auf die Prüfung vorbereiten. Außerdem versprechen wir, falls Sie nach der Benutzung der Oracle 1Z0-1061-24 noch mit der Prüfung scheitert, bieten wir Ihnen die volle Rückerstattung und entwickeln wir immer weiter bessere Prüfungssoftware der Oracle 1Z0-1061-24.

Oracle CX Sales 2024 Implementation Professional 1Z0-1061-24

Prüfungsfragen mit Lösungen (Q15-Q20):

15. Frage

Which statement regarding rule groups in Oracle Profitability and Cost Management Cloud Service is correct?

- A. Rule groups can only be used in source data mapping and cannot be used for allocations.
- B. Rule groups are used to apply different allocation methods to different levels of data.
- C. Rule groups can contain only one rule, keeping calculations simple and easy to understand.
- **D. Rule groups can contain both rules and other rule groups, allowing complex calculations to be nested.**

Antwort: D

Begründung:

Option 1: This option is incorrect because a rule group can contain multiple rules to apply to the data. Option 2: This option is correct because rule groups can contain both rules and other rule groups, allowing complex calculations to be nested. Option 3: This option is incorrect because allocation methods are applied at the rule level, not the rule group level. Option 4: This option is incorrect because rule groups can be used for both source data mapping and allocations.

16. Frage

When loading data into Oracle Profitability and Cost Management Cloud Service, which option allows the user to define the order in which data is loaded?

- A. Use the Data Management interface to load data from flat files
- **B. Use a mapping file to load data from staging tables**
- C. Use the Load Data Wizard to load data from an Excel file
- D. Use the Data Integration feature to load data from external sources

Antwort: B

Begründung:

Option 1: Correct: Using a mapping file to load data from staging tables allows the user to define the order in which data is loaded. This method provides more flexibility and control over the data loading process. Option 2: Incorrect: The Load Data Wizard allows the user to load data from an Excel file, but it does not provide the option to define the order in which data is loaded. The wizard automatically determines the order based on the spreadsheet structure. Option 3: Incorrect: The Data Management interface allows the user to load data from flat files, but it does not provide the option to define the order in which data is loaded. The interface automatically determines the order based on the file structure. Option 4: Incorrect: The Data Integration feature allows the user to load data from external sources, but it does not provide the option to define the order in

17. Frage

When integrating Oracle Profitability and Cost Management Cloud Service with other applications, which tool is recommended for data integration to/from Oracle Profitability and Cost Management Cloud Service?

- **A. Oracle Data Integrator (ODI)**
- B. Pluggable Data Transfer (PDT)
- C. Oracle Data Visualization (DV)
- D. Oracle Data Relationship Management (DRM)

Antwort: A

Begründung:

Option 1: Correct: Pluggable Data Transfer (PDT) is the recommended tool for data integration to/from Oracle Profitability and Cost Management Cloud Service. PDT provides an easy and efficient way to transfer data between Oracle Profitability and Cost Management Cloud Service and other applications. Option 2: Incorrect: Oracle Data Integrator (ODI) is not the recommended tool for data integration to/from Oracle Profitability and Cost Management Cloud Service. Although ODI is a powerful data integration tool, Pluggable Data Transfer (PDT) is specifically designed for seamless integration with Oracle Profitability and Cost Management Cloud Service. Option 3: Incorrect: Oracle Data Relationship Management (DRM) is not the recommended tool for data integration to/from Oracle Profitability and Cost Management Cloud Service. DRM is a master data management tool and is not specifically designed for seamless integration with Oracle Profitability and Cost Management Cloud Service. Option 4: Incorrect: Oracle Data Visualization (DV) is not the recommended tool for data integration to/from Oracle Profitability and Cost Management Cloud

Service. DV is a data visualization and business intelligence tool and is not specifically designed for seamless integration with Oracle Profitability and Cost Management Cloud Service.

18. Frage

Which hierarchy level is used to define which accounts are revenue, expense, and statistical in a custom application?

- A. Dimensionality
- **B. Account Type**
- C. Account
- D. Rule Set

Antwort: B

Begründung:

Option 1: Incorrect. A rule set is used to define business rules and calculations for the application. Option 2: Incorrect. Dimensionality is used to define the structure and relationships of the dimensions in the application. Option 3: Correct. Account Type is used to define which accounts are revenue, expense, and statistical in a custom application. Option 4: Incorrect. Account represents a specific account within the application.

19. Frage

Which of the following statements accurately describes the hierarchy in Oracle Profitability and Cost Management Cloud Service (PCMCS), and how is it used when modeling?

- A. The hierarchy is a collection of attributes that describe different dimensions of a business, such as product lines, geographical regions, or customer segments. By breaking down data into different levels of detail, the system can provide more granular insights into specific areas of the business.
- B. The hierarchy is a top-down structure in which data flows from the higher levels to the lower levels. It is used to optimize reporting performance by organizing data into smaller, more manageable units.
- **C. The hierarchy is a collection of members that represent parts of a structural relationship between members, and it dictates how data flows down from parent to child members. A well-structured hierarchy will help simplify and optimize modeling by allowing for more efficient navigation between levels of detail.**
- D. The hierarchy is a collection of measures that represent different aspects of a business, and it is used to calculate the performance of different units of analysis. By specifying a hierarchy structure, the system can apply complex formulas and allocate costs and revenues across different dimensions of analysis.

Antwort: C

Begründung:

Option 1: This option is correct. In PCMCS, a hierarchy is defined as a collection of members that represent parts of a structural relationship between members. Typically, a hierarchy starts at the top level with broad categories and then drills down to increasingly specific levels of detail. By using a well-structured hierarchy, modelers can simplify and optimize modeling by navigating between different levels of detail more efficiently and without duplicating data. Option 2: This option is incorrect. While hierarchies do help organize data into smaller and more manageable units, they are not designed to optimize reporting performance, nor do they necessarily flow from higher to lower levels. Hierarchies simply define how members relate to one another within the context of the model. Option 3: This option is incorrect. Measures and business rules are used to allocate costs and revenues across different dimensions of analysis, but they are not part of the hierarchy structure per se. Hierarchies dictate how data flows from parent to child members, but they do not define the measures themselves. Option 4: This option is incorrect. Attributes do describe different dimensions of a business, but they are not the same as hierarchies. Attributes help modelers filter data and identify patterns across different levels of detail, but hierarchies are used to define relationships between members and determine how data is aggregated across levels.

20. Frage

.....

Die Produkte von ITZert wird Ihnen nicht nur helfen, die Oracle 1Z0-1061-24 Zertifizierungsprüfung erfolgreich zu bestehen, sondern auch Ihnen einen einjährigen kostenlosen Update-Service bieten. Wir werden den Kunden die neuesten von uns entwickelten Produkte in der ersten Zeit liefern, so dass Sie sich gut auf die Oracle 1Z0-1061-24 Prüfung vorbereiten können. Falls
