Accurate 1z0-1066-24 Test | New 1z0-1066-24 Exam Topics

It is a truth well-known to all around the world that no pains and no gains. There is another proverb that the more you plough the more you gain. When you pass the 1z0-1066-24 exam which is well recognized wherever you are in any field, then acquire the 1z0-1066-24 certificate, the door of your new career will be open for you and your future is bright and hopeful. Our 1z0-1066-24 guide torrent will be your best assistant to help you gain your 1z0-1066-24 certificate.

Oracle 1z0-1066-24 Exam Syllabus Topics:

Topic	Details
Topic 1	Using Demand Management: This segment assesses the competency of demand planners and supply chain analysts in configuring, running, and managing demand plans.
Topic 2	Using Sales and Operations Planning: This segment evaluates the skills of S&OP managers in configuring and integrating Sales and Operations Planning (S&OP) with Oracle SCM Cloud and external systems, aligning demand, supply, and financial objectives.
Topic 3	Managing Constraint-based Plans: Supply chain planners are assessed on their ability to develop and manage constraint-based supply plans that consider both material and resource constraints.
Topic 4	Configuring Attribute-based Planning: This part focuses on the ability of supply chain planners to set up and apply attribute-based planning, ensuring that supply plans are customized based on specific product or customer attributes.

Topic 5	Understanding Costing and Inventory: Aimed at supply chain managers, this part tests their knowledge of inventory and costing management within the Oracle Supply Chain, ensuring cost-effective and efficient inventory control.
Topic 6	Configuring Planning Analytics: Here, supply chain consultants are assessed on their ability to configure planning analytics to generate actionable insights that enhance decision-making within the supply chain.
Topic 7	Managing Advanced Fulfillment: This part assesses the knowledge of logistics and fulfillment managers in managing complex fulfillment processes such as contract manufacturing, back-to-back fulfillment, and configure-to-order within the supply chain.
Topic 8	Using Backlog Management: This section evaluates the skills of managers in setting up and managing backlog processes to ensure timely fulfillment of orders and reduce backlog issues.
Topic 9	Managing Replenishment Planning: Supply chain managers are assessed on their expertise in configuring replenishment planning, utilizing multi-dimensional demand segments, and balancing inventory through clustering techniques.
Topic 10	Evaluating Simulations: Supply chain planners are tested on their skills in evaluating and executing simulations, enabling them to predict outcomes and develop effective strategies under different supply chain conditions.
Topic 11	Configuring Oracle Supply Chain Planning Cloud: This section evaluates the expertise of supply chain managers in setting up key functionalities within Oracle Supply Chain Planning Cloud. It covers configuring pages, tile sets, tables, and graphs, as well as managing planners, configuring security, and setting profile options, all while ensuring optimal use of Demand Management.
Topic 12	Using Production Scheduling: Supply chain managers and planners are tested on their ability to configure and execute production scheduling to improve efficiency in production timelines and resource management.
Topic 13	Managing Supply Chain Collaboration: This section measures the ability of supply chain collaboration managers to use Oracle tools for facilitating collaboration on supply planning, contract management, and customer demand management.
Topic 14	Configuring Exceptions: This section tests the expertise of supply chain managers in setting up and analyzing exceptions, ensuring they can identify and resolve issues within supply plans and demand forecasts.

Oracle Planning and Collaboration Cloud 2024 Implementation Professional Sample Questions (Q119-Q124):

NEW QUESTION # 119

In order for Supply and Demand Plans to run successfully, which three Configure Planning Analytic tasks must be completed? (Choose three.)

- A. Set up Dimension Catalogs
- B. Set up Default Catalogs
- C. Run the Configure Dimension Catalog process
- D. Set up Levels and Attributes
- E. Set up Hierarchy Attributes
- F. Set up Measure Catalogs

Answer: A,D,F

NEW QUESTION # 120

Demand is high leading up to the Christmas holiday every year between Dec 20 and Dec 24 and not on Christmas day (Dec 25). Your customer has two demand plans. Describe the steps to model Christmas causal factor in both demand plans.

- A. Use FBDI to create a new customer specific Christmas causal factor. Place value of 1 from Dec 20 to Dec 24. Causal factor changes are plan specific, so repeat the steps in the 2nd demand plan.
- B. Open a demand plan and add a new customer specific Christmas causal factor. Create a table displaying the causal factor measure and relevant time period and modify as required. Causal factor changes are plan specific, so repeat the steps in the 2nd demand plan.
- C. Open a demand plan and edit Christmas casual factor measure. Place value of one from Dec 20 to Dec 24 and zero for non-impacted days including Dec 25. Causal factor changes in this demand plan will reflect in the 2nd demand plan also.
- **D. Open a demand plan and add a new customer specific Christmas causal factor. Create a table displaying the causal factor measure and relevant time period and modify as required. Causal factor changes in this demand plan will reflect in the 2nd demand plan also.**
- E. Use FBDI to create a new customer specific Christmas causal factor. Place value of 1 from Dec 20 to Dec 34. Causal factor upload to one demand plan will reflect in the 2nd demand plan also.
- F. Open a demand plan and edit Christmas casual factor measure. Place value of one from Dec 20 to Dec 24 and zero for non-impacted days including Dec 25. Causal factor changes are plan specific, so repeat the steps in the 2nd demand plan.

Answer: D

Explanation:

To modify a causal factor:

1. Open a demand plan with history and horizon that matches the causal dates.
2. Create a table displaying the causal factor measure and relevant time period.
3. Modify the values of the causal factor and save. Next time you run any plan, the changes to the causal factor can impact the forecast.

NEW QUESTION # 121

Which two are valid settings when defining a replenishment planning cluster?

- **A. Location hierarchy (required)**
- B. Source system (required)
- C. Sweep location (required)
- **D. Reserved safety stock percentage (optional)**

Answer: A,D

Explanation:

When setting up a replenishment planning cluster, the location hierarchy is necessary for structuring replenishment relationships, while specifying a reserved safety stock percentage is optional. The Source system setting is not required within the cluster definition context but is typically a part of the broader replenishment configuration

ORACLE

NEW QUESTION # 122

You've decided to opt into the Customer Demand Collaboration feature. Which three statements describe what that enables?

- **A. A customer can log in to a portal and manually enter their expected needs for the products you sell them.**
- B. The information they share with you is informational and only available to you in the portal.
- **C. You can post to the portal your statistical forecast for the products you sell them so they can see your forecast for them.**
- **D. A customer can use B2B messaging to share their expected needs and historical consumption for the products you sell them.**

Answer: A,C,D

Explanation:

Enabling the Customer Demand Collaboration feature allows customers to share demand data through B2B messaging or by manually entering it via a portal. Additionally, it supports sharing your forecasts with them, enabling a collaborative planning approach that enhances demand visibility and aligns expectations MY ORACLE SUPPORT

NEW QUESTION # 123

As Materials Manager, you are always attentive to Finance's concern about high inventory levels. To that end, you arranged to off-load procurement and storage of several expensive components to become the responsibility of your contract manufacturer. You modified the bills of material accordingly. You thought this would satisfy Finance, but they complained to you that even though production levels have remained flat, they are not seeing a reduction in inventory. What is the problem?

- A. The supply type has not been changed to "supplier" for the affected components in the Item Structures of the contracted items.
- B. The "supplier" box for the "Supply Types to Include" plan option of Manage Plans has not been deselected.
- C. The "supplier" box on the Organization tab in Maintain Supply Network Model has not been deselected.
- D. The "supplier" box in Manage Plant Parameters has not been deselected.

Answer: A

Explanation:

When transitioning procurement responsibility to a contract manufacturer, it is essential to adjust the supply type of the contracted items to "supplier" within the item structures. This change ensures that the inventory associated with these components reflects their new procurement source, helping reduce your reported inventory levels. Without this adjustment, Oracle Planning may still consider these items as being managed internally, thus failing to reflect the reduction in inventory as anticipated.
