Reliable 1Z0-1069-24 Braindumps Ebook & Latest 1Z0-1069-24 Test Question

The second format Real4dumps also has a product support team available every time to help you out in any terms. And they will fix all of your problems on time. provides its users to study for Prepare for your Oracle Recruiting Cloud 2024 Implementation Professional (1Z0-1069-24) exam is web-based practice exam. This format has all the features of desktop practice exam software for Oracle 1Z0-1069-24 exam preparation.

Oracle 1Z0-1069-24 Exam Syllabus Topics:

Topic	Details

Topic 1	Managing General Settings: This section of the exam measures skills of an HR System Administrator and covers the foundational configurations required to set up Oracle Recruiting Cloud. It includes managing basic settings that control the overall system behavior, ensuring alignment with organizational needs.
Topic 2	Configuring Job Opening: This section of the exam measures the skills of a Recruiting Manager and covers how to create and manage job openings in Oracle Recruiting Cloud. It involves setting up job details, defining position requirements, and ensuring that job postings align with the organization's hiring needs and compliance standards. The configuration enables recruiters to advertise roles and effectively attract qualified candidates through appropriate channels.
Topic 3	Using AI Capabilities in Recruiting: This section of the exam measures the skills of a Recruiting Manager and covers how to integrate and utilize Oracle's AI tools within the recruiting process. It focuses on leveraging artificial intelligence to enhance candidate sourcing, screening, and engagement. The section ensures that recruiters can effectively use AI to streamline workflows, improve candidate matching, and make data-driven hiring decisions.
Topic 4	Managing the Hire: This section of the exam measures the skills of an HR System Administrator and covers the final steps in the recruitment process, focusing on managing new hires within the Oracle Recruiting Cloud. It involves the setup and management of hiring workflows, ensuring seamless integration with core HR systems. The goal is to ensure that once a candidate is selected, the transition to employee status is smooth and compliant with organizational policies.
Topic 5	Managing the Candidate: This section of the exam measures the skills of a Recruiting Manager and covers the management of candidates throughout the recruitment process. It includes tracking candidate status, managing candidate pipelines, and ensuring effective communication. This ensures recruiters can maintain organized, up-to-date candidate records and optimize their workflow from application to offer.

Oracle Recruiting Cloud 2024 Implementation Professional Sample Questions (Q42-Q47):

NEW QUESTION # 42

Which three types of job requisition templates are available for administrators to create?

- A. Blank, Pipeline, and Standard
- B. For Jobs, For Positions, and Pipeline
- C. For Jobs, For Positions, and Standalone

Answer: C

Explanation:

The three types of job requisition templates available are For Jobs, For Positions, and Standalone.

Step-by-Step Solution:

* Go to the Recruiting and Candidate Experience Management work area.

* Open the Requisition Templates setup task.

* Observe the available template types: For Jobs, For Positions, and Standalone.

* Select a type and configure the template as needed.

Oracle Recruiting Cloud offers three requisition template types: For Jobs (job-based), For Positions (position-based), and Standalone (general-purpose, not tied to a specific job or position). Pipeline is a requisition type, not a template type. Reference: Oracle Recruiting Cloud Requisition Template Guide, Template Types section.

NEW QUESTION # 43

A hiring manager needs to get an idea of how long it might take to fill a job vacancy so that they can plan for a project. Which feature would be most suitable to assist with this request?

- A. Job Requisition Fulfillment
- B. Estimated Vacancy Time

- **C. Time to Hire**

Answer: C

Explanation:

The most suitable feature is Time to Hire, which provides metrics on the duration from requisition creation to candidate hire.

Step-by-Step Solution:

- * Access the Recruiting Analytics dashboard.
- * Select the Time to Hire report or metric.
- * Filter by relevant requisitions or job types to estimate duration.
- * Share the data with the hiring manager for planning.

Time to Hire is a standard recruiting metric in Oracle HCM Cloud, measuring the time from requisition posting to hire acceptance, ideal for planning purposes. Other options like Estimated Vacancy Time are not standard features. Reference: Oracle Recruiting Cloud Analytics Guide, Time to Hire section.

NEW QUESTION # 44

When designing a campaign email, what can you add?

- A. Text, images, dynamic job lists, and custom buttons
- **B. Text, images, custom buttons, dynamic job lists and HTML content**
- C. Text, images, videos, custom buttons and dynamic job lists
- D. Text and Video only

Answer: B

NEW QUESTION # 45

When creating questions to be used In an application, which two types of questions will you be able to use?

- A. Interview Feedback Questions
- **B. Position Questions**
- C. Prescreening Questions
- D. Talent Profile Skills Questions
- **E. Disqualification Questions**

Answer: B,E

NEW QUESTION # 46

The Administrator of your recruiting organization wants to create a new active interview feedback questionnaire, for use by the hiring team when interviewing candidates. Create a Questionnaire based upon the Questionnaire Template you created prior, where:

- * Name is "Sales Specialist Hiring Manager Interview Feedback"
- * Folder is Interview Feedback
- * Questionnaire code is "SS_HIRING_MANAGER_INTERVIEW"

Answer:

Explanation:

See the complete solution below.

Explanation:

This is a configuration task requiring the creation of a new interview feedback questionnaire in Oracle Recruiting Cloud, leveraging the "Hiring Manager Interview Feedback" template from Question No: 2. Below is the detailed step-by-step solution.

Step-by-Step Solution:

Step 1: Log in to Oracle HCM Cloud

Action: Log in to your Oracle HCM Cloud environment with administrative privileges (e.g., a Recruiting Administrator role with setup permissions).

Navigation: Access the Oracle HCM Cloud homepage via your organization's URL (e.g., <https://yourdomain.oraclecloud.com>).

Details: Ensure you're in the correct environment (e.g., Test or Production) and have sandbox access if testing is required.

Step 2: Navigate to Recruiting and Candidate Experience Management

Action: Access the Recruiting and Candidate Experience Management work area.

Navigation: From the homepage, click Navigator (hamburger menu) > Setup and Maintenance > Search for "Recruiting and Candidate Experience Management" in the Tasks panel > Click the link to open the work area.

Details: This work area provides access to recruiting configuration tasks, including questionnaire management.

Step 3: Access the Manage Questionnaires Task

Action: Open the task to manage questionnaires (distinct from questionnaire templates).

Navigation: In the Recruiting and Candidate Experience Management work area, search for and select the task "Manage Questionnaires" (or "Manage Recruiting Questionnaires" depending on the UI version).

Details: This task allows you to create specific questionnaires based on templates, which can then be attached to job requisitions or interview processes.

Step 4: Create a New Questionnaire

Action: Start the process to add a new questionnaire.

Navigation: On the Manage Questionnaires page, click the "+" icon or "Create" button to initiate a new questionnaire.

Details: A new questionnaire form will appear where you can define its properties.

Step 5: Define General Questionnaire Details

Action: Enter the required details for the questionnaire.

Fields to Fill:

Name: Enter "Sales Specialist Hiring Manager Interview Feedback" (exact match).

Code: Enter "SS_HIRING_MANAGER_INTERVIEW" (exact match, no spaces, case-sensitive).

Status: Set to "Active" (to make it immediately available for use by the hiring team).

Folder: Select or type "Interview Feedback" (see Step 6 for folder details).

Details: These fields identify the questionnaire and ensure it meets the task's specifications. The code must be unique across all questionnaires.

Step 6: Assign to the Interview Feedback Folder

Action: Place the questionnaire in the "Interview Feedback" folder.

Navigation: In the questionnaire form, locate the "Folder" field (may be a dropdown or text input).

Fields to Fill:

If "Interview Feedback" exists: Select it from the dropdown.

If it doesn't exist:

Click "Manage Folders" or a similar option (if available).

Click "+" to create a new folder.

Name: "Interview Feedback"

Save and return to the questionnaire form.

Select "Interview Feedback" from the dropdown.

Details: Folders organize questionnaires for easier management. "Interview Feedback" aligns with the questionnaire's purpose and the task requirement.

Step 7: Base the Questionnaire on the Prior Template

Action: Link the questionnaire to the "Hiring Manager Interview Feedback" template created in Question No: 2.

Navigation: In the questionnaire form, find the "Template" or "Based On" field.

Fields to Fill:

Template: Search for and select "Hiring Manager Interview Feedback" (ID:

HIRING_MANAGER_INTERVIEW_FEEDBACK).

Details: This pulls in the structure (e.g., instructions: "Please complete all questions, basing your responses on the interview") and any questions from the template, ensuring consistency. Since the template is unscored and typed as Interview Feedback, the new questionnaire inherits these properties.

Step 8: Verify Questionnaire Properties

Action: Confirm the inherited and configured properties.

Navigation: Review the form after selecting the template:

Type: Should display "Interview Feedback" (inherited from template).

Scoring: Should be unscored (no rating model, inherited from template).

Instructions: Should show "Please complete all questions, basing your responses on the interview" (inherited from template).

Questions: If questions were added to the template (e.g., communication skills, strengths), they'll appear here; if not, the questionnaire is empty but still valid.

Details: The task doesn't require modifying the template's content, so the inherited setup suffices unless specific Sales Specialist questions are implied (not specified).

Step 9: Customize Questions (Optional but Contextual)

Action: Optionally tailor questions for Sales Specialist roles (recommended for practicality).

Navigation: In the questionnaire form, go to the "Questions" or "Content" section > Click "Add Question" or edit existing ones.

Example Questions (if adding):

Question Text: "How well did the candidate demonstrate sales negotiation skills?" Type: Single Choice (e.g., Excellent, Good, Fair, Poor) or Text.

Question Text: "What specific sales experience did the candidate highlight?" Type: Text.

Question Text: "Would you recommend this candidate for a Sales Specialist role?" Type: Text.

Details: Since the task doesn't mandate new questions, you can rely on the template's content. Adding Sales- specific questions enhances relevance for the hiring team but isn't required.

Step 10: Save and Validate the Questionnaire

Action: Save the questionnaire and verify its setup.

Navigation: Click "Save" or "Save and Close" at the bottom of the form.

Validation: Reopen the questionnaire from the Manage Questionnaires page to confirm.

Name: Sales Specialist Hiring Manager Interview Feedback

Code: SS_HIRING_MANAGER_INTERVIEW

Folder: Interview Feedback

Status: Active

Template: Hiring Manager Interview Feedback

Type: Interview Feedback

Scoring: Unscored

Instructions: Please complete all questions, basing your responses on the interview

Step 11: Test the Questionnaire Action: Test the questionnaire by attaching it to an interview in a job requisition.

Navigation:

Go to My Client Groups > Recruiting > Job Requisitions.

Open an existing requisition or create a new one (e.g., for a Sales Specialist role).

Move a candidate to the Interview phase in the Candidate Selection Process.

Schedule an interview:

Go to Interviews tab > Click "Schedule Interview".

In the interview setup, select "Sales Specialist Hiring Manager Interview Feedback" from the Questionnaire dropdown.

Assign the interview to a hiring team member (e.g., a test user with Hiring Manager privileges).

Log in as the hiring team member (or use a test account).

Access the interview feedback task via My Tasks or the candidate's profile > Complete the questionnaire.

Verification:

Confirm the name "Sales Specialist Hiring Manager Interview Feedback" appears.

Check that instructions display: "Please complete all questions, basing your responses on the interview." Answer the questions (inherited or added) and submit; ensure no scores are calculated.

Verify the feedback is recorded in the candidate's profile under the Interview phase.

Step 12: Deploy Changes (If in Sandbox)

Action: If configured in a sandbox, publish the changes to production.

Navigation: Go to Sandboxes > Select your sandbox > Click "Publish".

Details: This ensures the questionnaire is available for the hiring team in the live environment.

Exact Extract Explanation:

In Oracle Recruiting Cloud, questionnaires are specific instances built from templates, tailored for use in processes like interviews.

This task requires:

Based on Prior Template: Uses "Hiring Manager Interview Feedback" (ID: HIRING_MANAGER_INTERVIEW_FEEDBACK) from Question No: 2, inheriting its unscored, interview feedback properties and instructions.

Active Status: Ensures immediate usability by the hiring team.

Specific Name and Code: "Sales Specialist Hiring Manager Interview Feedback" and "SS_HIRING_MANAGER_INTERVIEW" identify it uniquely for Sales-related interviews.

Folder: "Interview Feedback" organizes it logically with similar questionnaires.

The Manage Questionnaires task in the Recruiting and Candidate Experience Management work area is the tool for this setup, distinct from the template creation task. Testing via a requisition confirms its functionality for the hiring team. Reference: Oracle Recruiting Cloud Configuration Guide, Chapter on Managing Questionnaires; Oracle Recruiting Cloud User Guide, Interview Feedback Configuration section.

NEW QUESTION # 47

.....

One of the most important functions of our 1Z0-1069-24 preparation questions are that can support almost all electronic equipment. If you want to prepare for your exam by the computer, you can buy our 1Z0-1069-24 training quiz. Of course, if you prefer to study by your mobile phone, our study materials also can meet your demand. You just need to download the online version of our 1Z0-1069-24 Preparation questions. We can promise that the online version will not let you down. We believe that you will benefit a lot from it if you buy our 1Z0-1069-24 study materials and pass the 1Z0-1069-24 exam easily.
