

1Z0-1072-25 Latest Cram Materials & Latest 1Z0-1072-25 Mock Exam

BTW, DOWNLOAD part of Prep4pass 1Z0-1072-25 dumps from Cloud Storage: <https://drive.google.com/open?id=12-3qAvtBepF23iHK3pGW0n2FF8IN0mzR>

With our test-oriented 1Z0-1072-25 test prep in hand, we guarantee that you can pass the 1Z0-1072-25 exam as easy as blowing away the dust, as long as you guarantee 20 to 30 hours practice with our 1Z0-1072-25 study materials. The reason why we are so confident lies in the sophisticated expert group and technical team we have, which do duty for our solid support. They develop the 1Z0-1072-25 Exam Guide targeted to real exam. The wide coverage of important knowledge points in our 1Z0-1072-25 latest braindumps would be greatly helpful for you to pass the exam.

You can see the demos of our 1Z0-1072-25 exam questions which are part of the all titles selected from the test bank and the forms of the questions and answers and know the form of our software on the website pages of our study materials. The website pages list the important information about our 1Z0-1072-25 real quiz. You can analyze the information the website pages provide carefully before you decide to buy our 1Z0-1072-25 learning braindumps.

Latest 1Z0-1072-25 Mock Exam - 1Z0-1072-25 Valid Practice Questions

1Z0-1072-25 exam certification is considered as a standard in measuring your professional skills in your industry. Besides, those possessing the Oracle 1Z0-1072-25 certification are more likely to receive higher salaries. So it is very necessary to get 1Z0-1072-25 certification. Here, Prep4pass 1Z0-1072-25 free pdf download can give you some reference. First, you should have preview about the content of 1Z0-1072-25 real test. Oracle 1Z0-1072-25 contains the comprehensive contents with explanations where is available. With the assist of 1Z0-1072-25 training material, you will get success.

Oracle Cloud Infrastructure 2025 Architect Associate Sample Questions (Q37-Q42):

NEW QUESTION # 37

Which TWO statements are true about performing a multipart upload using the Multipart Upload API?

- A. Each part can be as large as 50 GiB.
- B. You do not need to split the object into parts.
- C. You can keep adding parts as long as the total number is less than 10,000.
- D. You do not have to commit the upload after uploading all parts.

Answer: A,C

Explanation:

When performing a multipart upload using the Multipart Upload API in Oracle Cloud Infrastructure (OCI) Object Storage, the following points are true:

C . Each part can be as large as 50 GiB: OCI allows each part of a multipart upload to be up to 50 GiB in size. This enables the efficient uploading of large objects in smaller, manageable parts.

D . You can keep adding parts as long as the total number is less than 10,000: The Multipart Upload API supports up to 10,000 parts for a single object. This allows the upload of very large objects by dividing them into multiple parts.

Incorrect Statements:

A . After uploading all parts, you must commit the upload to finalize the multipart upload and combine all parts into a single object.

B . The object must be split into parts before uploading when using the Multipart Upload API.

Reference:

Oracle Cloud Infrastructure Documentation: Multipart Uploads

NEW QUESTION # 38

How many capacity reservations would you create to meet the requirement for high availability and distribution across Availability Domains?

- A. Four
- B. One
- C. Two
- D. Three

Answer: D

Explanation:

In Oracle Cloud Infrastructure (OCI), to ensure high availability and distribution across Availability Domains (ADs), the recommended approach is as follows:

Capacity Reservations for High Availability: To achieve high availability, especially across all three Availability Domains in a region, you should create three capacity reservations. Each reservation corresponds to one AD, ensuring that your instances or resources are evenly distributed and resilient to AD-level failures.

Why Three: This setup provides redundancy and load distribution across the ADs, meeting the high availability requirements.

Relevant OCI Documentation:

Capacity Reservations

This document outlines how to create and manage capacity reservations to meet high availability and fault tolerance requirements.

NEW QUESTION # 39

Which TWO options will accomplish a fully redundant connection from an on-premises data center to a Virtual Cloud Network (VCN) in the us-ashburn-1 region?

- A. Configure a Site-to-Site VPN from a single on-premises CPE.
- B. Configure two FastConnect virtual circuits to the us-ashburn-1 region and terminate them in diverse hardware on-premises.
- C. Configure one FastConnect virtual circuit to the us-ashburn-1 region and a Site-to-Site VPN to the us-ashburn-1 region.
- D. Configure one FastConnect virtual circuit to the us-ashburn-1 region and the second FastConnect virtual circuit to the us-phoenix-1 region.

Answer: B,C

Explanation:

For a fully redundant connection from an on-premises data center to a VCN in the OCI us-ashburn-1 region, it is important to ensure high availability and fault tolerance. Here's how each option contributes to redundancy:

Option B: Two FastConnect Virtual Circuits:

FastConnect provides a dedicated, private connection with higher bandwidth and more consistent performance compared to a VPN. To achieve redundancy, you can configure two FastConnect circuits in the same region (us-ashburn-1), each terminated on diverse hardware on-premises. This setup ensures that even if one circuit or its associated hardware fails, the other circuit can maintain the connection. This ensures no single point of failure in the connectivity to OCI. Thus, option B is correct.

Option D: FastConnect and Site-to-Site VPN:

Another approach to redundancy is to have a mix of connection types. By setting up one FastConnect circuit and one Site-to-Site VPN, both terminating in the same region (us-ashburn-1), you create a diverse connection path. If the FastConnect connection fails, traffic can automatically route through the VPN connection, maintaining connectivity. This setup adds an extra layer of redundancy, making option D correct as well.

Incorrect Options:

Option A: Only configuring a Site-to-Site VPN from a single on-premises CPE does not provide redundancy because it involves just one connection path. If that connection or the CPE fails, there would be no fallback.

Option C: Configuring FastConnect circuits to different regions (us-ashburn-1 and us-phoenix-1) does not provide redundancy within a single region but rather across regions, which is not required for regional redundancy.

Relevant OCI Documentation:

OCI FastConnect Overview

Using Site-to-Site VPN and FastConnect for Redundancy

These references offer more detailed information on setting up redundant connections and the benefits of each connection type within OCI.

NEW QUESTION # 40

How will moving a database instance to a different compartment impact user access?

- A. Access will be revoked for all users.
- B. Compartments prevent resource movement.
- C. Compartments are not covered by IAM policies.
- D. IAM policies are not tied to compartments.

Answer: A

Explanation:

In Oracle Cloud Infrastructure (OCI), when you move a database instance to a different compartment, the following impact on user access occurs:

Impact of Moving Resources: When you move a resource, like a database instance, to a different compartment, the IAM policies that grant access to that resource in the original compartment no longer apply. This effectively revokes access for users or groups unless equivalent policies are in place in the new compartment.

Restoring Access: To restore access, you would need to create new IAM policies in the destination compartment that grant the necessary permissions to the users or groups who need access.

Relevant OCI Documentation:

Managing Compartments

Moving Resources

These resources provide detailed steps on how compartment changes impact resource access and management.

NEW QUESTION # 41

Which TWO are key benefits of setting up Site-to-Site VPN on Oracle Cloud Infrastructure (OCI)?

- A. When setting up Site-to-Site VPN, it creates a private connection that provides consistent network experience.
- B. When setting up Site-to-Site VPN, customers can configure it to use static or dynamic routing (BGP).
- C. When setting up Site-to-Site VPN, customers can expect bandwidth above 2 Gbps.
- D. When setting up Site-to-Site VPN, OCI provisions redundant VPN tunnels.

Answer: B,D

Explanation:

Setting up a Site-to-Site VPN on Oracle Cloud Infrastructure offers several key benefits related to connectivity and reliability:

Static or Dynamic Routing (BGP): OCI allows customers to configure Site-to-Site VPN with either static routing or dynamic routing using Border Gateway Protocol (BGP). This flexibility enables customers to choose the routing method that best suits their network configuration and requirements.

Redundant VPN Tunnels: OCI automatically provisions redundant VPN tunnels when you set up a Site-to-Site VPN. These

redundant tunnels ensure high availability and fault tolerance, so if one tunnel fails, traffic can continue to flow through the other tunnel without interruption.

Bandwidth Considerations: While the VPN provides a reliable connection, it typically does not exceed 2 Gbps in bandwidth. Higher bandwidth connections usually require FastConnect.

Private Connection: The VPN does create a secure and private connection between on-premises data centers and OCI, but it does not inherently provide a consistent network experience in the way that a dedicated connection like FastConnect does.

Relevant OCI Documentation:

Site-to-Site VPN Overview

Configuring Routing for VPNs

These references detail the benefits and technical specifications of setting up Site-to-Site VPNs on OCI.

NEW QUESTION # 42

.....

We constantly improve and update our 1Z0-1072-25 study materials and infuse new blood into them according to the development needs of the times and the change of the trend in the industry. We try our best to teach the learners all of the related knowledge about the test 1Z0-1072-25 Certification in the most simple, efficient and intuitive way. We pay our experts high remuneration to let them play their biggest roles in producing our 1Z0-1072-25 study materials.

Latest 1Z0-1072-25 Mock Exam: https://www.prep4pass.com/1Z0-1072-25_exam-braindumps.html

In addition to the Oracle 1Z0-1072-25 PDF dumps, we also offer Oracle 1Z0-1072-25 practice exam software, So here, we will recommend you a very valid and useful Latest 1Z0-1072-25 Mock Exam - Oracle Cloud Infrastructure 2025 Architect Associate training guide, Our company has established a long-term partnership with those who have purchased our 1Z0-1072-25 test braindumps files, Choose 1Z0-1072-25 exam dumps right now, we won't let you down.

The `dcpromo.exe` command, Also, blend modes have pushed my creativity in Photoshop endlessly, In addition to the Oracle 1Z0-1072-25 PdfDumps, we also offer Oracle 1Z0-1072-25 practice exam software.

1Z0-1072-25 Training Materials are Your Excellent Chance to Master More Useful Knowledge - Prep4pass

So here, we will recommend you a very valid and useful Oracle Cloud Infrastructure 2025 Architect Associate training guide, Our company has established a long-term partnership with those who have purchased our 1Z0-1072-25 test braindumps files.

Choose 1Z0-1072-25 exam dumps right now, we won't let you down, You may say so many companies sell 1Z0-1072-25 guide torrent & 1Z0-1072-25 study guide.
