1Z0-1072-25 Test Online - 1Z0-1072-25 Latest Training

What's more, part of that DumpsTorrent 1Z0-1072-25 dumps now are free: https://drive.google.com/open?id=1tOpUk2H6L7Mw11hJOtF-orpCytf5D7Wz

Normally, you just need to wait for about five to ten minutes after you purchase our 1Z0-1072-25 learning braindumps. If you do not receive our 1Z0-1072-25 study materials, please contact our online workers. It is our great advantage to attract customers. In a word, our running efficiency on 1Z0-1072-25 Exam Questions is excellent. Time is priceless. Once you receive our email, just begin to your new learning journey.

Oracle 1Z0-1072-25 Exam Syllabus Topics:

Topic	Details
Topic 1	• Compute: This section measures skills of cloud architects responsible for designing scalable and resilient infrastructure, covering compute instance configuration, autoscaling policies, and OS management. It evaluates understanding of OCI compute image options, infrastructure maintenance processes, and strategies for optimizing instance performance across availability domains.
Topic 2	• Identity and Access Management (IAM): This domain validates skills of security architects implementing granular access controls, emphasizing IAM policy creation, compartment organization, and dynamic group configuration. It covers identity domain management, network source restrictions, and tag-based access mechanisms to enforce least-privilege principles across OCI resources
Topic 3	• Networking: Targeting network architects designing secure cloud architectures, this domain focuses on Virtual Cloud Network (VCN) implementation, including subnet design, IP address management, and routing through gateways (NAT, service, internet). It assesses expertise in VPN • FastConnect deployment, DNS configuration, load balancer setup, and advanced tools like Network Path Analyzer for troubleshooting latency or connectivity issues.

Topic 4	• Storage: Designed for storage administrators managing enterprise data solutions, this section tests proficiency in deploying Block • File • Object Storage with lifecycle management, cross-region replication, and tiered storage strategies. It includes configuring volume groups, snapshots, versioning, and security controls while analyzing storage performance metrics and cost optimization techniques.

1Z0-1072-25 Test Online - Pass 1Z0-1072-25 in One Time

The web-based format gives results at the end of every Oracle 1Z0-1072-25 practice test attempt and points the mistakes so you can get rid of them before the final attempt. This online format of the Oracle Cloud Infrastructure 2025 Architect Associate (1Z0-1072-25) practice exam works well with Android, Mac, Windows, iOS, and Linux operating systems.

Oracle Cloud Infrastructure 2025 Architect Associate Sample Questions (Q14-Q19):

NEW QUESTION # 14
Why was SSH still possible after port 22 was removed from the Security Lists?

- A. The VCN where that compute instance resides still has an Internet Gateway.
- B. The VCN where that compute instance resides still has a route rule.
- C. The VNIC of that compute instance is attached to a Cluster Network.
- D. The VNIC of that compute instance is attached to a Network Security Group (NSG).

Answer: D

Explanation:
Even after removing port 22 from the Security Lists, SSH was still possible because the Virtual Network Interface Card (VNIC) of the compute instance is attached to a Network Security Group (NSG).
NSGs: NSGs provide a more flexible and granular way to manage security rules compared to Security Lists. They allow you to apply security rules directly to VNICs associated with resources such as compute instances. If an NSG allows traffic on port 22, SSH will still be possible, regardless of the Security List settings.

NEW QUESTION # 15
Which of the following is a valid RFC 1918 CIDR prefix that can be used for creating an Oracle Cloud Infrastructure (OCI) Virtual Cloud Network (VCN)?

- A. 10.0.0.0/8
- B. 192.268.0.0/24
- C. 192.168.0.0/16
- D. 0.0.0.0/0

Answer: A,C

Explanation:
RFC 1918 defines IP address ranges that are reserved for private networks, which cannot be routed on the public internet. In Oracle Cloud Infrastructure (OCI), these private IP address ranges can be used to create Virtual Cloud Networks (VCNs). The valid RFC 1918 CIDR prefixes include:
192.168.0.0/16: A private IP range often used in home networks.
10.0.0.0/8: A large private IP range commonly used in enterprise networks.
Invalid Options:
B . 0.0.0.0/0: This CIDR represents all IP addresses and is not a valid private IP range.

C . 192.268.0.0/24: This is not a valid IP address range as the octet "268" is outside the allowable range of 0-255.

RFC 1918: Address Allocation for Private Internets

NEW QUESTION # 16
Which TWO statements about the Oracle Cloud Infrastructure (OCI) File Storage Service are accurate?

- A. Customers can encrypt the communication to a mount target via export options.
- B. Communication with file systems in a mount target is encrypted via HTTPS.
- C. Customers can encrypt data in their file system using their own Vault encryption key.
- D. File systems use Oracle-managed keys by default.

Answer: C,D

Explanation:
Oracle Cloud Infrastructure (OCI) File Storage Service offers robust encryption capabilities to ensure data security.
B . Customer-Managed Encryption: Customers can choose to encrypt their data using their own keys stored in the OCI Vault service. This gives customers control over their encryption keys and enhances data security.
D . Oracle-Managed Encryption: By default, all data stored in OCI File Storage is encrypted using Oracle-managed keys. This ensures that data is encrypted at rest without requiring any action from the customer.
Incorrect Statements:
A . Communication is not encrypted via HTTPS when accessing file systems; instead, encryption in transit is typically managed via NFS over TLS.
C . Encryption of communication to a mount target is handled via network configurations, not through export options.

Oracle Cloud Infrastructure Documentation: File Storage Encryption

NEW QUESTION # 17
Which OCI feature should be used to ensure that communication between database servers and OCI Object Storage is secure?

- A. Use a Service Gateway
- B. Use a NAT Gateway
- C. Use a Local Peering Gateway
- D. Use a VPN Gateway

Answer: A

Explanation:
To ensure secure communication between database servers and OCI Object Storage, you should use a Service Gateway. A Service Gateway enables instances in your VCN to privately access OCI services like Object Storage without traversing the public internet.
Security: The traffic between your database servers and Object Storage remains within the Oracle network, providing a secure and high-performance connection.
Reference:
Oracle Cloud Infrastructure Documentation: Service Gateway Overview

NEW QUESTION # 18
By default, OCI IAM policies follow the principle of least privilege. What does this principle mean in the context of policy creation?

- A. Policies should provide only the minimum set of permissions required for users to perform their tasks effectively.
- B. Policies should grant all possible permissions to simplify access control.
- C. Policies should be written in a complex and technical manner to enhance security.
- D. Policies should be identical for all users within a tenancy.

Answer: A

Explanation:
The principle of least privilege is a security best practice that dictates that users should only be granted the minimum set of

permissions necessary to perform their tasks. This principle helps to minimize the risk of accidental or malicious actions that could compromise security.

IAM Policies in OCI: When creating IAM policies in OCI, you should carefully evaluate the required permissions and only grant those that are absolutely necessary for the users or groups to perform their specific roles. This helps to reduce the attack surface and prevent unauthorized access to sensitive resources.

NEW QUESTION # 19

......

The web-based Oracle 1Z0-1072-25 practice exam is compatible with all browsers like Chrome, Mozilla Firefox, MS Edge, Internet Explorer, Safari, Opera, and more. Unlike the desktop version, it requires an internet connection. The Oracle Cloud Infrastructure 2025 Architect Associate (1Z0-1072-25) practice exam will ask real Oracle Cloud Infrastructure 2025 Architect Associate (1Z0-1072-25) exam questions.
