

1z0-1080-24 Deutsch Prüfungsfragen - 1z0-1080-24 Lerntipps

Die Oracle 1z0-1080-24 Dumps von PrüfungFrage können Ihnen helfen, diese Prüfung sehr einfach zu bestehen. Außerdem, wenn Sie zum ersten Mal die Oracle 1z0-1080-24 Prüfung teilnehmen, können Sie diese Dumps von Software-Version benutzen, weil es ist eine Software, die für Sie die Inhalte und die Forme der aktuellen Prüfung simulieren. Sie können sich die aktuelle Prüfung zuvor fühlen. Danach können Sie sich nicht nervös fühlen bei der aktuellen Prüfung. Sie können auch sehr sorglos an dieser Oracle 1z0-1080-24 Prüfung teilnehmen. Und es ist auch wichtig für Sie, Ihr normales Niveau in der 1z0-1080-24 Prüfung zu entfalten.

Oracle 1z0-1080-24 Zertifizierungsprüfung sowie Cisco, IBM, HP Prüfungen sind jetzt sehr populär. Wenn Sie die Oracle 1z0-1080-24 Zertifizierung bekommen wollen, realisieren die Oracle 1z0-1080-24 Dumps von PrüfungFrage Ihren Wunsch. Nach dem Erfolg der Oracle 1z0-1080-24 Zertifizierung können Sie auch andere IT-Zertifizierungsprüfungen ablegen. Es gibt keine Probleme für alle Oracle Prüfungen, wenn Sie Prüfungsfragen und Antworten von besitzen.

1z0-1080-24 Lerntipps - 1z0-1080-24 Online Tests

Laut Umfragen haben die Oracle 1z0-1080-24 Prüfung heutzutage hohe Konjunktur in IT-Zertifizierungen. Tatsächlich ist die 1z0-1080-24 Zertifizierungsprüfung sehr wichtig. Und jetzt ist 1z0-1080-24 Prüfung öffentlich zertifiziert. Außerdem kann diese Prüfung Ihre ausgezeichnete IT-Fähigkeit beweisen. Aber es ist sehr schwer, Oracle 1z0-1080-24 Prüfung zu bestehen. Und die Schwierigkeit ist so groß wie ihre Bedeutung. Trotz dieser Schwierigkeit sorgen Sie sich bitte nicht um den Erfolg, die Prüfung ablegen, weil PrüfungFrage Ihnen helfen kann, diese schwierige 1z0-1080-24 Prüfung zu bestehen.

Oracle 1z0-1080-24 Prüfungsplan:

Thema	Einzelheiten
Thema 1	• Introduction to Strategic Modelling: This section of the exam measures the skills of strategic modelers and covers strategic modeling concepts. It includes setting up models, running simulations, and understanding their impact on decision-making processes.
Thema 2	• Planning Overview: This section of the exam measures the skills of planning administrators and focuses on understanding the features of Planning applications. It includes setting up Planning and Freeform applications, managing dimensions, and explaining the impact of dimension hierarchies. It also covers configuring valid and invalid intersections and cell-level security.
Thema 3	• Report on Planning Data: This section of the exam measures the skills of reporting analysts and covers creating reports on Planning data. It includes reporting on EPM data to provide insights into organizational performance.
Thema 4	• Maintain Planning: This section of the exam measures the skills of system administrators and focuses on monitoring maintenance tasks for Planning applications. It includes scheduling jobs, managing EPM Automate for automation tasks, backing up data, migrating metadata, cloning environments, and maintaining system updates.
Thema 5	• Manage Forms, Dashboards, and Navigation Flows: This section of the exam measures the skills of dashboard designers and covers designing forms, dashboards, and validation rules. It also includes creating and managing navigation flows to streamline user experience within Planning applications.
Thema 6	• Configure Intelligent Performance Management: This section of the exam measures the skills of machine learning specialists and focuses on configuring IPM components. It includes setting up machine learning models for predictive analytics within Planning applications.

Oracle Planning 2024 Implementation Professional 1z0-1080-24 Prüfungsfragen mit Lösungen (Q30-Q35):

30. Frage

You need to schedule a weekly data import job. Which two statements are true about scheduling jobs?

- A. You can delete that are currently processing.
- B. You can set the daily maintenance time when scheduling cloning environment jobs.
- **C. You can schedule an Import Data job to run later at intervals.**
- **D. You can set to receive notifications when the job has completed.**
- E. You can check the execution status of a job only if it completed.

Antwort: C,D

Begründung:

In Oracle Planning 2024, scheduling jobs such as a weekly data import is managed through the Jobs interface, which provides options for automation, monitoring, and notifications. Let's evaluate the provided statements to identify the two that are true:

* A. You can check the execution status of a job only if it completed: This is false. The Jobs console in Oracle EPM allows users to check the status of a job (e.g., Running, Completed, Failed) at any time, not just after completion. Real-time monitoring is a key feature.

* B. You can set the daily maintenance time when scheduling cloning environment jobs: This is false.

Daily maintenance time is a system-wide setting controlled by administrators via Application Settings, not something adjustable when scheduling specific jobs like cloning or data imports.

* C. You can set to receive notifications when the job has completed: This is true. When scheduling a job (e.g., Import Data), users can enable email notifications to be alerted upon job completion, success, or failure, enhancing job management.

* D. You can schedule an Import Data job to run later at intervals: This is true. The scheduling feature supports recurring jobs, such as weekly data imports, allowing users to define the start time and frequency (e.g., daily, weekly) for tasks like importing data from external sources.

* E. You can delete that are currently processing: This is false. Jobs that are currently processing (i.e., in a "Running" state) cannot

be deleted until they complete or fail, as per Oracle's job management rules.

Thus, the two true statements are C and D, reflecting the flexibility of scheduling recurring Import Data jobs and receiving completion notifications, both of which are explicitly supported in Oracle Planning 2024.

* Oracle Planning 2024 Implementation Study Guide: "Managing Jobs and Scheduling" (docs.oracle.com, Published 2024-08-22).

* Oracle EPM Cloud Documentation: "Scheduling Jobs in Planning" (docs.oracle.com, Published 2023-12-10, updated for 2024).

* Oracle Planning Administration Guide: "Monitoring and Notifications" (docs.oracle.com, Published 2024-10-01).

31. Frage

You want to analyze past data and predicted data to help you find patterns and insights into data that you might not have found on your own. To accomplish this, you configure Insights with Auto Predict.

Which two are Oracle EPM guidelines for implementing Insights and Auto Predict?

- A. For future data, first run predictions in a test environment to ensure there is no impact on production data.
- B. For historical data, there should be at least twice the amount of historical data as the number of prediction periods.
- C. For future data, create a new insight by leveraging templates that include insight definitions.
- D. For historical data, create the Insights job using the lowest level of Period members possible so that the greatest amount of historical data can be used.

Antwort: A,B

Begründung:

In Oracle Planning 2024, configuring Insights with Auto Predict allows users to analyze past and predicted data to uncover patterns and insights. Oracle provides specific guidelines to ensure effective implementation:

* A. For future data, create a new insight by leveraging templates that include insight definitions:

Incorrect. While templates can be used to set up Insights, this is not a specific Oracle guideline for implementing Auto Predict. Auto Predict relies on historical data and predictive algorithms, not predefined insight templates for future data.

* B. For historical data, there should be at least twice the amount of historical data as the number of prediction periods: Correct.

Oracle recommends having sufficient historical data-specifically, at least twice the number of periods you intend to predict-to ensure the accuracy of Auto Predict's machine learning algorithms. For example, predicting 12 months requires at least 24 months of historical data.

* C. For historical data, create the Insights job using the lowest level of Period members possible so that the greatest amount of historical data can be used: Incorrect. While granularity matters, Oracle does not mandate using the lowest level of Period members (e.g., days instead of months) as a guideline. The focus is on the quantity of historical data, not necessarily the lowest level of aggregation.

* D. For future data, first run predictions in a test environment to ensure there is no impact on production data: Correct. Oracle advises testing Auto Predict in a non-production environment to validate results and avoid unintended impacts on live data, aligning with best practices for predictive analytics deployment.

The two guidelines-B and D-are explicitly outlined in Oracle's documentation for Insights and Auto Predict to ensure reliable predictions and safe implementation.

References:

* Oracle Planning 2024 Implementation Study Guide: "Configuring Insights and Auto Predict" (docs.oracle.com, Published 2024-10-15).

32. Frage

Which three are configuration or post-configuration tasks for Financials?

- A. Adding custom expense driver categories
- B. Setting up exchange rates (for multicurrency applications)
- C. Adding custom dimensions
- D. Removing custom dimensions
- E. Completing Planning and Forecast Preparation

Antwort: B,C,E

Begründung:

In Oracle Planning 2024, configuring and post-configuring the Financials module involves tasks to establish its structure and functionality. The three valid configuration or post-configuration tasks are:

- * A. Adding custom expense driver categories: Incorrect. While Financials supports driver-based planning (e.g., revenue drivers), adding custom expense driver categories is not a standard configuration task-it's more of a customization within forms or rules, not a core setup step.
 - * B. Adding custom dimensions: Correct. Adding custom dimensions (e.g., Region, Product) is a key configuration task in Financials to tailor the module to business needs, often done during or shortly after initial setup.
 - * C. Completing Planning and Forecast Preparation: Correct. This mandatory configuration task defines the planning periods, scenarios, and versions for Financials, setting the foundation for budgeting and forecasting.
 - * D. Setting up exchange rates (for multicurrency applications): Correct. For multicurrency-enabled Financials applications, configuring exchange rates is a critical task during or post-configuration to support currency conversion in financial planning.
 - * E. Removing custom dimensions: Incorrect. Removing dimensions is not a standard configuration or post-configuration task-it's a rare adjustment that could disrupt existing data and is not recommended as part of setup.
- The Oracle documentation identifies B, C, and D as essential tasks during or after Financials configuration, ensuring the module meets planning and reporting requirements.

References:

- * Oracle Planning 2024 Implementation Study Guide: "Financials Configuration Tasks" (docs.oracle.com, Published 2024-10-15).
- * Oracle EPM Cloud Documentation: "Setting Up Financials" (docs.oracle.com, Published 2023-12-15, updated for 2024).

33. Frage

Which statement describes infolets?

- A. Infolets are predefined dashboards that give you insight into the overall project financials and expense and revenue metrics.
- B. Infolets give business process designers control over how various roles or groups interact with a business process.
- C. Infolets are a form type that provides flexible row management where dimension and member row cells and all data cells are unprotected.
- D. Infolets help you organize, track, and prioritize your workload.
- E. Infolets help you quickly analyze data and understand key business questions by presenting a visual overview of high-level, aggregated information.

Antwort: E

Begründung:

In Oracle Planning 2024 Implementation, infolets are a feature designed to provide users with quick, visual insights into critical business data. They are not full dashboards, task management tools, or process control mechanisms, but rather compact, high-level representations of aggregated information.

- * C. Infolets help you quickly analyze data and understand key business questions by presenting a visual overview of high-level, aggregated information: This statement accurately describes infolets.

They are visual tiles or widgets that display summarized data (e.g., KPIs, trends) to help users grasp key business insights at a glance. Infolets are typically found on the home page or navigation clusters and are customizable to highlight specific metrics relevant to the user's role or application.

- * A. Infolets are predefined dashboards that give you insight into the overall project financials and expense and revenue metrics: While infolets provide insights, they are not full "predefined dashboards." Dashboards are more comprehensive, whereas infolets offer concise, targeted views of data.

- * B. Infolets help you organize, track, and prioritize your workload: This describes task management or navigation features (e.g., task lists), not infolets, which focus on data visualization rather than workload management.

- * D. Infolets give business process designers control over how various roles or groups interact with a business process: Infolets are not about process design or role interaction; they are about displaying data, not controlling processes.

- * E. Infolets are a form type that provides flexible row management where dimension and member row cells and all data cells are unprotected: Infolets are not a form type; they are separate from forms and focus on visualization, not data entry or row management.

References

- * Oracle Enterprise Performance Management Cloud Documentation: "Using Infolets" (docs.oracle.com, updated 2024). Describes infolets as "visual overviews of high-level, aggregated information to quickly analyze data and answer business questions."
- * Oracle Planning 2024 Implementation Study Guide: Defines infolets as tools for presenting summarized data visually for quick analysis.

34. Frage

In Workforce, you want to set a date by which existing employees must be hired to be eligible to receive merit. You also want to specify the month in which merit should start. Which option should you enable for this?

- A. Merit Rates
- B. Merit Month
- C. Workforce Assumptions
- **D. Merit Assumptions**

Antwort: D

Begründung:

In Oracle Planning 2024 Implementation's Workforce module, configuring merit-related settings for employees involves specifying eligibility criteria and timing, such as a hire date cutoff for existing employees to receive merit increases and the month when merit adjustments begin. The Merit Assumption option is the correct choice for this purpose.

* B. Merit Assumptions: This feature allows administrators to define merit-related parameters, including the "hire by" date (the date by which employees must be hired to be eligible for merit) and the "merit start month" (the month when merit increases take effect). It provides a centralized way to set these assumptions, ensuring they are applied consistently across the workforce plan.

* A. Workforce Assumptions: This option covers broader workforce settings (e.g., default hire dates, salary assumptions), but it does not specifically address merit eligibility or timing details like hire-by dates or merit start months.

* C. Merit Rates: This pertains to defining the percentage or amount of merit increases, not the eligibility dates or start month for merit application.

* D. Merit Month: While this might seem relevant, "Merit Month" is not a standalone option in Workforce. It is a setting typically configured within Merit Assumptions, not an independent feature.

The Merit Assumption option is explicitly designed to handle these merit-specific configurations, making it the most suitable choice.

References

* Oracle Enterprise Performance Management Cloud Documentation: "Administering Workforce - Merit Assumptions" (docs.oracle.com, updated 2024). States that "Merit Assumptions allow setting the hire-by date for merit eligibility and the merit start month."

* Oracle Planning 2024 Implementation Study Guide: Confirms that Merit Assumptions is used to specify eligibility criteria and timing for merit increases in Workforce.

35. Frage

.....

In heutiger Gesellschaft sind die Eliten hier und dort vorhanden, und auch in IT-Industrie. Mit der Entwicklung der Computer gibt es keine, die Computer nicht benutzen können. Als ITeer fühlen Sie sie sich nicht stressig? Ihr Titel kann ihre Fähigkeit heute nicht repräsentieren. Der Titel ist jetzt nur Ihr Sprungbrett. Nur Ihre Fähigkeit kann Ihren Arbeitsplatz halten. Als ITeer, wie können Sie Ihre Fähigkeit erhalten? Es ist eine sehr gute Entscheidung, Oracle 1z0-1080-24 Zertifizierungsprüfung zu bestehen. Nicht nur können Sie mehr Fähigkeiten entfalten, sondern auch Ihre Fähigkeiten beweisen. Zurzeit ist die Oracle 1z0-1080-24 Zertifizierungsprüfung sehr populär, wollen Sie daran teilnehmen?
