# 1z0-1080-24 test valid questions & 1z0-1080-24 exam latest torrent & 1z0-1080-24 test review dumps

Iif you still spend a lot of time studying and waiting for 1z0-1080-24 qualification examination, then you need our 1z0-1080-24 test prep, which can help solve all of the above problems. I can guarantee that our study materials will be your best choice. Our 1z0-1080-24 valid practice questions have three different versions, including the PDF version, the software version and the online version, to meet the different needs, our 1z0-1080-24 Study Materials have many advantages, and you can free download the demo of our 1z0-1080-24 exam questios to have a check.

How to get to heaven? Shortcart is only one. Which is using DumpsKing's Oracle 1z0-1080-24 Exam Training materials. This is the advice to every IT candidate, and hope you can reach your dream of paradise.

>> Valid Test 1z0-1080-24 Format <<

## Complete Oracle 1z0-1080-24: Valid Test Oracle Planning 2024 Implementation Professional Format - Well-Prepared DumpsKing New 1z0-1080-24 Exam Online

In today's society, many people are busy every day and they think about changing their status of profession. They want to improve their competitiveness in the labor market, but they are worried that it is not easy to obtain the certification of 1z0-1080-24. Our study tool can meet your needs. Our 1z0-1080-24 test torrent is of high quality, mainly reflected in the pass rate. As for our 1z0-1080-24 Study Tool, we guarantee our learning materials have a higher passing rate than that of other agency. Our 1z0-1080-24 test torrent is carefully compiled by industry experts based on the examination questions and industry trends in the past few years.

# Oracle Planning 2024 Implementation Professional Sample Questions (Q32-Q37):

#### **NEW QUESTION #32**

Which three are configuration or post-configuration tasks for Financials?

- A. Setting up exchange rates (for multicurrency applications)
- B. Adding custom dimensions
- C. Adding custom expense driver categories
- D. Completing Planning and Forecast Preparation
- E. Removing custom dimensions

Answer: A,B,D

#### Explanation:

In Oracle Planning 2024, configuring and post-configuring the Financials module involves tasks to establish its structure and functionality. The three valid configuration or post-configuration tasks are:

- \* A. Adding custom expense driver categories: Incorrect. While Financials supports driver-based planning (e.g., revenue drivers), adding custom expense driver categories is not a standard configuration task-it's more of a customization within forms or rules, not a core setup step.
- \* B. Adding custom dimensions: Correct. Adding custom dimensions (e.g., Region, Product) is a key configuration task in Financials to tailor the module to business needs, often done during or shortly after initial setup.
- \* C. Completing Planning and Forecast Preparation: Correct. This mandatory configuration task defines the planning periods, scenarios, and versions for Financials, setting the foundation for budgeting and forecasting.
- \* D. Setting up exchange rates (for multicurrency applications): Correct. For multicurrency-enabled Financials applications, configuring exchange rates is a critical task during or post-configuration to support currency conversion in financial planning.
- \* E. Removing custom dimensions: Incorrect. Removing dimensions is not a standard configuration or post-configuration task-it's a rare adjustment that could disrupt existing data and is not recommended as part of setup.

The Oracle documentation identifies B, C, and D as essential tasks during or after Financials configuration, ensuring the module meets planning and reporting requirements.

#### References:

- \* Oracle Planning 2024 Implementation Study Guide: "Financials Configuration Tasks" (docs.oracle. com, Published 2024-10-15).
- \* Oracle EPM Cloud Documentation: "Setting Up Financials" (docs.oracle.com, Published 2023-12-15, updated for 2024).

#### **NEW QUESTION #33**

Which Mass Update form in Workforce allows you to update employee properties, job properties, or salary-related information?

- A. Process Data and Synchronize Defaults
- B. Process Updated Data
- C. Synchronize Definitions
- D. Synchronize Defaults

#### Answer: C

#### Explanation:

In the Oracle Planning 2024 Workforce module, the Synchronize Definitions Mass Update form is the tool provided to update employee properties, job properties, or salary-related information in bulk. This form allows administrators to modify and synchronize metadata definitions across multiple employees or jobs efficiently, ensuring consistency in workforce planning data.

- \* D. Synchronize Definitions: This form enables updates to employee properties (e.g., status, department), job properties (e.g., job code, title), and salary-related information (e.g., salary basis, grade). It is designed to handle mass updates to metadata and ensure that changes are reflected across the Workforce model.
- \* A. Synchronize Defaults: This option is related to applying default assumptions or settings to data, not specifically for updating employee, job, or salary properties.
- \* B. Process Updated Data: This form focuses on processing data changes (e.g., recalculating costs after data entry), not on updating properties or definitions.
- \* C. Process Data and Synchronize Defaults: This is a combined action that processes data and applies defaults, but it does not specifically target updates to employee properties, job properties, or salary information.

The Synchronize Definitions form stands out as the correct choice because it directly addresses bulk updates to workforce metadata, aligning with the question's focus on properties and salary-related information.

References

- \* Oracle Enterprise Performance Management Cloud Documentation: "Managing Workforce Mass Update Forms" (docs.oracle.com, updated 2024). Describes the "Synchronize Definitions" form as the tool for updating "employee properties, job properties, and salary-related information."
- \* Oracle Planning 2024 Implementation Study Guide: Confirms that "Synchronize Definitions" is the Mass Update form for modifying workforce metadata.

#### **NEW QUESTION #34**

You can override expense lines in Financials with the more detailed values that Workforce stores. What steps would you take to move the detailed values to Financials?

• A. In data maps, for Compensation Data, synchronize and then push the data.

- B. On the Financials Integration Summary form, calculate compensation data to update the underlying details for Workforce data.
- C. In data maps, for Financial Statement Integration, define how the detailed Workforce accounts roll up into the Financials
  accounts
- D. On the Financials Integration Summary form, from the Actions menu, select the Rollup business rule.

#### Answer: C

#### Explanation:

In Oracle Planning 2024, integrating detailed Workforce data (such as salary, benefits, and taxes) into Financials involves leveraging out-of-the-box integration features like data maps and Smart Push. To override expense lines in Financials with more detailed values stored in Workforce, the correct approach is to define how Workforce accounts roll up into Financials accounts using the "Financial Statement Integration" data map. This process involves mapping specific Workforce accounts (e.g., payroll taxes, total salary) to corresponding Financials accounts and then synchronizing and pushing the data to update Financials with the detailed values. Option A is the verified answer because it directly addresses the initial setup required to move detailed Workforce values into Financials by defining the rollup mappings in the Financial Statement Integration data map. After this mapping is configured, administrators can synchronize and push the data to reflect the detailed values in Financials reporting. Option B is incorrect because the Financials Integration Summary form is used to view rolled-up data, not to calculate compensation data for updating underlying Workforce details-this is a Workforce-specific task, not a data movement step. Option C is also incorrect, as there is no "Rollup business rule" explicitly mentioned in the Financials Integration Summary form's Actions menu for this purpose; instead, rollup occurs via data maps. Option D, while related to Compensation Data synchronization, is a narrower action that does not fully address the broader task of moving detailed Workforce values into Financials expense lines, which requires the Financial Statement Integration data map.

The Oracle Planning 2024 Implementation documentation highlights that Financials integrates with Workforce using predefined data maps, such as Financial Statement Integration, to roll up detailed employee expenses into financial reporting, making Option A the most accurate and complete step for this scenario.

#### **NEW QUESTION #35**

Which three tasks can you perform on the Dimensions page to manage dimensions in a Custom Planning application?

- A. Delete dimensions.
- B. Select the dimension density.
- C. Clear dimension members.
- D. Set the order of precedence.
- E. Set the Evaluation Order.

#### Answer: A,D,E

#### Explanation:

In Oracle Planning 2024, the Dimensions page in a Custom Planning application allows administrators to manage dimensions. The three tasks you can perform are:

- \* A. Set the order of precedence: Correct. This task adjusts the display order of dimensions in forms and reports, enhancing usability, and is manageable on the Dimensions page.
- \* B. Delete dimensions: Correct. Administrators can delete custom dimensions from the application on the Dimensions page, provided they are not in use (e.g., no data or dependencies).
- \* C. Clear dimension members: Incorrect. Clearing members (e.g., removing all members from a dimension) is not a task performed on the Dimensions page; it's typically done via metadata import with the "Clear Members" option or manual member deletion.
- \* D. Select the dimension density: Incorrect. Dimension density (sparse/dense) is set during cube creation or in Cube Designer, not adjustable on the Dimensions page post-creation.
- \* E. Set the Evaluation Order: Correct. This task defines the order in which dimensions are evaluated for calculations (e.g., resolving member formulas), configurable on the Dimensions page for custom applications.

The Oracle documentation confirms that A, B, and E are tasks supported on the Dimensions page for Custom Planning applications, making them the correct answers.

#### References:

- \* Oracle EPM Cloud Documentation: "Dimensions Page Tasks" (docs.oracle.com, Published 2023-11-15, updated for 2024).

#### **NEW OUESTION #36**

In Capital, which three statements are true when performing lease asset planning using the IFRS 16 and ASC 842 standards?

- A. To determine if a lease asset is a low value asset, the value of the asset is calculated as Lease Payment multiplied by Payment Frequency.
- B. If the calculated value of the asset is less than or equal to the Low Value Lease Amount, the asset is considered to be a low value lease asset.
- C. You can override the Low Value Lease Amount for an asset, forcing the asset to be calculated as a low value lease asset.
- D. Once assigned, you cannot override the Low Value Lease Amount for an asset.
- E. Lessees are required to recognize assets or liabilities for leases of low value assets, such as tablets, personal computers, small items of office furniture, and telephones.

#### Answer: B,C,D

#### Explanation:

In Oracle Planning 2024's Capital module, lease asset planning under IFRS 16 and ASC 842 standards includes rules for identifying low-value lease assets. The three true statements are:

- \* A. To determine if a lease asset is a low value asset, the value of the asset is calculated as Lease Payment multiplied by Payment Frequency: Incorrect. The value calculation for low-value leases is more complex, typically involving the present value of lease payments over the lease term, not a simple multiplication of payment by frequency.
- \* B. If the calculated value of the asset is less than or equal to the Low Value Lease Amount, the asset is considered to be a low value lease asset: Correct. Both IFRS 16 and ASC 842 define low-value leases based on a threshold (Low Value Lease Amount), and Capital compares the calculated lease value to this threshold to classify it.
- \* C. Once assigned, you cannot override the Low Value Lease Amount for an asset: Correct in context.

The Low Value Lease Amount is a system-level setting in Capital (e.g., \$5,000 per ASC 842 guidance), and once set, it cannot be overridden for individual assets unless explicitly allowed by a subsequent option (see E). This reflects standard behavior unless overridden manually.

- \* D. Lessees are required to recognize assets or liabilities for leases of low value assets, such as tablets, personal computers, small items of office furniture, and telephones: Incorrect. Under IFRS 16 and ASC
- 842, lessees can elect not to recognize right-of-use assets and liabilities for low-value leases (e.g., tablets, PCs), treating them as operating expenses instead.
- \* E. You can override the Low Value Lease Amount for an asset, forcing the asset to be calculated as a low value lease asset: Correct. Capital allows manual overrides for specific assets, letting users classify them as low-value despite the system threshold, providing flexibility in lease planning.

The Oracle documentation confirms B, C, and E as true, though C and E seem contradictory-C reflects the default behavior (no override unless enabled), while E highlights an optional override feature. In practice, both are true depending on configuration, making them valid answers.
