1z0-1080-25 Cert Exam & Simulation 1z0-1080-25 Questions

You will be cast in light of career acceptance and put individual ability to display. When you apply for a job you could have more opportunities than others. What is more, there is no interminable cover charge for our 1z0-1080-25 practice engine priced with reasonable prices for your information. Considering about all benefits mentioned above, you must have huge interest to our 1z0-1080-25 Study Materials. You should take the look at our 1z0-1080-25 simulating questions right now.

Oracle 1z0-1080-25 Exam Syllabus Topics:

Topic	Details
Topic 1	• Design business rules and rulesets":his section of the exam measures the skills of an EPM Consultant and focuses on creating logic structures to perform calculations and automate processes in Planning.
Topic 2	• Set up Planning and FreeForm Applications: This section of the exam measures the skills of a Planning Administrator and involves setting up Planning applications, including FreeForm apps, to support flexible planning and modeling needs.
Topic 3	• This section of the exam measures the skills of a Planning Administrator and includes understanding how standard and custom dimensions are used, and how dimension hierarchies affect planning structure and outcomes.
Topic 4	• Assign access permissions to artifacts and cells in Planning: This section of the exam measures the skills of a Planning Administrator and involves granting permissions to users for accessing specific Planning objects and data.
Topic 5	• Set up and run data maps: This section of the exam measures the skills of a Planning Administrator and focuses on configuring and executing data maps to move data across plan types or applications.
Topic 6	• Set Up Planning Security: This section of the exam measures the skills of a Planning Administrator and includes provisioning user roles and assigning appropriate access rights across Planning artifacts and data.
Topic 7	• Describe Planning modules: This section of the exam measures the skills of an EPM Consultant and includes identifying different modules like Financials, Workforce, Projects, and Capital.
Topic 8	• Explain the benefits of using Groovy Rules: This section of the exam measures the skills of an EPM Consultant and explains how Groovy scripting enhances rule flexibility and performance.

Topic 9	• Map data across applications: This section of the exam measures the skills of an EPM Consultant and includes how to map and align data structures between Planning and other connected applications.
Topic 10	• Describe Planning features: This section of the exam measures the skills of an EPM Consultant and focuses on recognizing key Planning features that help organizations manage and analyze financial data efficiently.
Topic 11	• Set up valid and invalid intersections and cell-level security: This section of the exam measures the skills of an EPM Consultant and focuses on defining valid data intersections and applying security controls to limit data access at the cell level.
Topic 12	• Manage Dimensions: This section of the exam measures the skills of a Planning Administrator and covers how to manage essential dimensions and hierarchies that organize planning data.
Topic 13	• Introduction to Planning Modules: This section of the exam measures the skills of an EPM Consultant and introduces the available Planning modules, their integration, and use cases.
Topic 14	• Manage Forms, Dashboards, and Navigation Flows: This section of the exam measures the skills of an EPM Consultant and includes creating interactive forms and dashboards and setting up navigation flows for a better user experience.
Topic 15	• Manage Rules: This section of the exam measures the skills of an EPM Consultant and covers designing and managing business logic using rules and rulesets to automate calculations.
Topic 16	• Import and export data into Planning: This section of the exam measures the skills of a Planning Administrator and covers the process of moving planning data into and out of the system.
Topic 17	• Identify metadata and data load options: This section of the exam measures the skills of a Planning Administrator and introduces options available for importing and managing metadata and data within the system.
Topic 18	• Build validation rules: This section of the exam measures the skills of an EPM Consultant and includes creating rules that validate data entry in forms.

Newest 1z0-1080-25 Cert Exam & Passing 1z0-1080-25 Exam is No More a Challenging Task

When preparing for the test 1z0-1080-25 certification, most clients choose our products because our 1z0-1080-25 learning file enjoys high reputation and boost high passing rate. Our products are the masterpiece of our company and designed especially for the certification. Our 1z0-1080-25 latest study question has gone through strict analysis and verification by the industry experts and senior published authors. The clients trust our products and place great hopes on our 1z0-1080-25 Exam Dump. They treat our products as the first choice and the total amounts of the clients and the sales volume of our 1z0-1080-25 learning file is constantly increasing.

Oracle Planning 2025 Implementation Professional Sample Questions (Q105-Q110):

NEW QUESTION # 105
Which three are configuration or post-configuration tasks for Financials?

- A. Adding custom dimensions
- B. Removing custom dimensions
- C. Completing Planning and Forecast Preparation
- D. Setting up exchange rates (for multicurrency applications)
- E. Adding custom expense driver categories

Answer: A,C,D

Explanation:
In Oracle Planning 2024, configuring and post-configuring the Financials module involves tasks to establish its structure and functionality. The three valid configuration or post-configuration tasks are:
* A. Adding custom expense driver categories: Incorrect. While Financials supports driver-based planning (e.g., revenue drivers), adding custom expense driver categories is not a standard configuration task-it's more of a customization within forms or rules, not a core setup step.
* B. Adding custom dimensions: Correct. Adding custom dimensions (e.g., Region, Product) is a key configuration task in Financials to tailor the module to business needs, often done during or shortly after initial setup.
* C. Completing Planning and Forecast Preparation: Correct. This mandatory configuration task defines the planning periods, scenarios, and versions for Financials, setting the foundation for budgeting and forecasting.
* D. Setting up exchange rates (for multicurrency applications): Correct. For multicurrency-enabled Financials applications, configuring exchange rates is a critical task during or post-configuration to support currency conversion in financial planning.
* E. Removing custom dimensions: Incorrect. Removing dimensions is not a standard configuration or post-configuration task-it's a rare adjustment that could disrupt existing data and is not recommended as part of setup.
The Oracle documentation identifies B, C, and D as essential tasks during or after Financials configuration, ensuring the module meets planning and reporting requirements.

Oracle Planning 2024 Implementation Study Guide: "Financials Configuration Tasks" (docs.oracle.com, Published 2024-10-15).
Oracle EPM Cloud Documentation: "Setting Up Financials" (docs.oracle.com, Published 2023-12-15, updated for 2024).

NEW QUESTION # 106
Which three features would you need to enable in order to perform indirect cash flow statement planning?

- A. Balance Sheet
- B. Income Statement
- C. Cash Flow Statement
- D. Revenue
- E. Expense

Answer: A,B,C

NEW QUESTION # 107
Which three sources of data can you use in Dashboards 2.0?

- A. Cubes
- B. Spreadsheets
- C. Reports
- D. Ad hoc grids
- E. Forms

Answer: D,E

NEW QUESTION # 108
Which module do you enable and configure if you want to develop plans and forecasts with driver-based or based income statement, balance sheet, and cash flow planning, or revenue and expenses?

- A. Capital
- B. Strategic Workforce
- C. Projects
- D. Financials

Answer: D

NEW QUESTION # 109

Which statement describes infolets?

- A. Infolets help you organize, track, and prioritize your workload.
- B. Infolets help you quickly analyze data and understand key business questions by presenting a visual overview of high-level, aggregated information.
- C. Infolets give business process designers control over how various roles or groups interact with a business process.
- D. Infolets are a form type that provides flexible row management where dimension and member row cells and all data cells are unprotected.
- E. Infolets are predefined dashboards that give you insight into the overall project financials and expense and revenue metrics.

Answer: B

Explanation:
In Oracle Planning 2024 Implementation, infolets are a feature designed to provide users with quick, visual insights into critical business data. They are not full dashboards, task management tools, or process control mechanisms, but rather compact, high-level representations of aggregated information.
* C. Infolets help you quickly analyze data and understand key business questions by presenting a visual overview of high-level, aggregated information: This statement accurately describes infolets.
They are visual tiles or widgets that display summarized data (e.g., KPIs, trends) to help users grasp key business insights at a glance. Infolets are typically found on the home page or navigation clusters and are customizable to highlight specific metrics relevant to the user's role or application.
* A. Infolets are predefined dashboards that give you insight into the overall project financials and expense and revenue metrics: While infolets provide insights, they are not full "predefined dashboards." Dashboards are more comprehensive, whereas infolets offer concise, targeted views of data.
* B. Infolets help you organize, track, and prioritize your workload: This describes task management or navigation features (e.g., task lists), not infolets, which focus on data visualization rather than workload management.
* D. Infolets give business process designers control over how various roles or groups interact with a business process: Infolets are not about process design or role interaction; they are about displaying data, not controlling processes.
* E. Infolets are a form type that provides flexible row management where dimension and member row cells and all data cells are unprotected: Infolets are not a form type; they are separate from forms and focus on visualization, not data entry or row management.
References
* Oracle Enterprise Performance Management Cloud Documentation: "Using Infolets" (docs.oracle.com, updated 2024). Describes infolets as "visual overviews of high-level, aggregated information to quickly analyze data and answer business questions."
* Oracle Planning 2024 Implementation Study Guide: Defines infolets as tools for presenting summarized data visually for quick analysis.

NEW QUESTION # 110
......

The time and energy are all very important for the office workers. In order to get the 1z0-1080-25 certification with the less time and energy investment, you need a useful and valid 1z0-1080-25 study material for your preparation. 1z0-1080-25 free download pdf will be the right material you find. The comprehensive contents of 1z0-1080-25 practice torrent can satisfied your needs and help you solve the problem in the actual test easily. Now, choose our 1z0-1080-25 study practice, you will get high scores.
