

1z0-1080-25 Deutsch Prüfung - 1z0-1080-25 Fragen Beantworten

P.S. Kostenlose 2025 Oracle 1z0-1080-25 Prüfungsfragen sind auf Google Drive freigegeben von ZertSoft verfügbar:
<https://drive.google.com/open?id=1iPCFm2BDEPE2Mz2rk1QkSYo0xq2N36yp>

Eine breite Vielzahl von Oracle 1z0-1080-25 Prüfungsfragen und Antworten aus ZertSoft sind logisch. Oracle 1z0-1080-25 Zertifizierungsantworten aus ZertSoft sind gleich wie die in der realen Prüfung. Vor dem Kauf der Oracle 1z0-1080-25 Echte Fragen können Sie kostenlose Demo zum Teil auf der Website www.ZertSoft.de herunterladen.

Oracle 1z0-1080-25 Prüfungsplan:

Thema	Einzelheiten
Thema 1	Set up Planning and FreeForm Applications: This section of the exam measures the skills of a Planning Administrator and involves setting up Planning applications, including FreeForm apps, to support flexible planning and modeling needs.
Thema 2	Manage Rules: This section of the exam measures the skills of an EPM Consultant and covers designing and managing business logic using rules and rulesets to automate calculations.
Thema 3	Set up and run data maps: This section of the exam measures the skills of a Planning Administrator and focuses on configuring and executing data maps to move data across plan types or applications.
Thema 4	Build validation rules: This section of the exam measures the skills of an EPM Consultant and includes creating rules that validate data entry in forms.
Thema 5	Manage Metadata and Data: This section of the exam measures the skills of a Planning Administrator and covers methods for loading and maintaining metadata and data in Planning.
Thema 6	Describe Planning modules: This section of the exam measures the skills of an EPM Consultant and includes identifying different modules like Financials, Workforce, Projects, and Capital.
Thema 7	Describe Planning features: This section of the exam measures the skills of an EPM Consultant and focuses on recognizing key Planning features that help organizations manage and analyze financial data efficiently.
Thema 8	Set up valid and invalid intersections and cell-level security: This section of the exam measures the skills of an EPM Consultant and focuses on defining valid data intersections and applying security controls to limit data access at the cell level.
Thema 9	Create and run data integrations: This section of the exam measures the skills of an EPM Consultant and involves building data integration flows between different data sources and Planning.

Thema 10	• Import and export data into Planning: This section of the exam measures the skills of a Planning Administrator and covers the process of moving planning data into and out of the system.
Thema 11	• Map data across applications: This section of the exam measures the skills of an EPM Consultant and includes how to map and align data structures between Planning and other connected applications.
Thema 12	• Report on Planning Data: This section of the exam measures the skills of a Planning Administrator and focuses on generating reports to analyze and present Planning data effectively.
Thema 13	• Design business rules and rulesets: This section of the exam measures the skills of an EPM Consultant and focuses on creating logic structures to perform calculations and automate processes in Planning.
Thema 14	• Manage Dimensions: This section of the exam measures the skills of a Planning Administrator and covers how to manage essential dimensions and hierarchies that organize planning data.
Thema 15	• Introduction to Planning Modules: This section of the exam measures the skills of an EPM Consultant and introduces the available Planning modules, their integration, and use cases.
Thema 16	• This section of the exam measures the skills of a Planning Administrator and includes understanding how standard and custom dimensions are used, and how dimension hierarchies affect planning structure and outcomes.
Thema 17	• Explain the benefits of using Groovy Rules: This section of the exam measures the skills of an EPM Consultant and explains how Groovy scripting enhances rule flexibility and performance.

1z0-1080-25 Prüfungsressourcen: Oracle Planning 2025 Implementation Professional & 1z0-1080-25 Reale Fragen

Mit der Lernhilfe zur Oracle 1z0-1080-25 Zertifizierungsprüfung von ZertSoft können Sie die Oracle 1z0-1080-25 Zertifizierungsprüfung ganz mühelos bestehen. Die von uns entworfenen Schulungsinstrumente werden Ihnen helfen, die Prüfung einmalig zu bestehen. Sie können unsere Demo zur Oracle 1z0-1080-25 Zertifizierungsprüfung in ZertSoft als Probe kostenlos herunterladen und die Oracle 1z0-1080-25 Prüfung ganz einfach bestehen. Wenn Sie noch zögern, benutzen Sie doch unsere Probeversion. Sie werden sich über ihre gute Wirkung wundern. Schicken Sie doch ZertSoft in den Warenkorb. Wenn Sie es verpassen, würden Sie lebenslang bereuen.

Oracle Planning 2025 Implementation Professional 1z0-1080-25 Prüfungsfragen mit Lösungen (Q113-Q118):

113. Frage

You are currently making modifications to loaded salary information using the Mass Update forms in Workforce. After making changes, which statements are true when working with Mass Update?

- A. After making changes to salary information, you must run the Calculate Compensation business rule before saving data.
- B. If an existing employee is not loaded from the load file, you won't be able to add their compensation information without first reloading a load file with the existing employee records.
- C. After making changes to salary information and saving the data on the form a Groovy rule runs to process the change After data.
- D. After modifying salary, you can re-apply configured default assignments for benefits, additional earning and taxes

Antwort: C,D

114. Frage

You want to share detailed benefits data from Workforce with Financials. Which set of steps must you perform?

- A. Enable and configure Financials and Workforce. Then in Workforce Benefits and Taxes, select a financial account to which to map the benefit. For Compensation Data, synchronize and run the data map.
- B. Enable and configure Financials and Workforce. When enabling Financials, create a custom Benefits O dimension to which to map the data. On the Financials Integration Summary form, run Calculate Compensation to update the Workforce data.
- C. Enable and configure Financials and Workforce. Then to capture Workforce expenses for employees, enable Standard Rates from Workforce. For the Compensation Data for Reporting data map, synchronize and then push the data.
- D. Enable and configure Financials and Workforce. When enabling Workforce, create a custom Benefits dimension to which to map the data. Then for the Financial Statement Integration data map, synchronize and push the data.

Antwort: A

115. Frage

You want to create a dashboard to provide an overview at the beginning of the planning and forecasting process. You create a dashboard with Dashboard 1.0. Which three statements are true about Dashboard 1.0?

- A. You can switch easily between using the design environment and the runtime environment.
- B. You can include user variables in the global PV bar and the local POV.
- C. You can add hierarchical labels in charts.
- D. You can include multiple forms that dynamically update, including their associated charts.
- E. You can use a logarithmic scale in relevant chart types.

Antwort: A,B,D

116. Frage

Which three features would you need to enable in order to perform indirect cash flow statement planning?

- A. Revenue
- B. Expense
- C. Balance Sheet
- D. Income Statement
- E. Cash Flow Statement

Antwort: C,D,E

117. Frage

Which two features can help users create business rules?

- A. Add calculations by using preformed system templates, such as clearing data, copying data, aggregating data, and so on.
- B. Add calculations in calculation script syntax by switching to Script Mode.
- C. Design sophisticated rules that solve use cases that normal business rules cannot solve by using Groovy business rules.
- D. Rules are represented graphically in a flow chart into which you can drag and drop components to design the rule.

Antwort: A,C

Begründung:

In Oracle Planning 2024 Implementation, business rules are essential for automating calculations, data manipulations, and complex logic within the application. The platform provides multiple features to assist users in creating these rules efficiently, as outlined in the Oracle documentation. The two features that directly help users create business rules are:

* A. Add calculations by using preformed system templates, such as clearing data, copying data, aggregating data, and so on: Oracle Planning offers predefined system templates that simplify rule creation. These templates enable users to quickly implement common operations like clearing data, copying data between dimensions, or aggregating data without writing complex code from scratch. This feature is particularly useful for users who may not have advanced scripting skills, as it provides a guided, template-driven approach to rule design.

* C. Design sophisticated rules that solve use cases that normal business rules cannot solve by using Groovy business rules: Groovy business rules extend the capabilities of standard business rules by allowing users to write custom logic using the Groovy scripting language. This feature is designed for advanced use cases, such as dynamic calculations based on runtime conditions or complex data manipulations that go beyond the scope of traditional rules. It empowers users to address specialized business requirements efficiently.

* B. Add calculations in calculation script syntax by switching to Script Mode: While Script Mode exists and allows users to write calculations using a script-based syntax (e.g., Essbase calc scripts), it is not highlighted as a primary "feature" for creating business rules in the Oracle Planning 2024 context. It is more of a mode of operation rather than a distinct feature assisting rule creation.

* D. Rules are represented graphically in a flow chart into which you can drag and drop components to design the rule: Although graphical rule design was a feature in older Hyperion Planning versions (e.g., Calculation Manager's graphical interface), Oracle Planning 2024 documentation does not emphasize a drag-and-drop flowchart interface as a current primary method for rule creation. Instead, it focuses on templates and Groovy scripting.

References

* Oracle Enterprise Performance Management Cloud Documentation: "Working with Business Rules" (docs.oracle.com, updated 2024). This section details the use of "system templates for calculations" and

"Groovy business rules" as key features for rule creation.

* Oracle Planning 2024 Implementation Study Guide: Confirms that predefined templates (e.g., for clearing or aggregating data) and Groovy rules are core features to assist users in designing business rules.

118. Frage

.....

Nun ist die Oracle 1z0-1080-25 Zertifizierungsprüfung eine beliebte Prüfung in der IT-Branche. Viele IT-Fachleute wollen das Oracle 1z0-1080-25 Zertifikat erhalten. So ist die Oracle 1z0-1080-25 Zertifizierungsprüfung eine beliebte Prüfung. Das Oracle 1z0-1080-25 Zertifikat ist sehr hilfreich, um Ihre Arbeit in der IT-Industrie zu verbessern und Ihr Gehalt zu erhöhen und Ihrem Leben eine zuverlässige Garantie zu geben.
