

1z0-1080-25 Latest Test Braindumps - 1z0-1080-25 Trustworthy Practice

Now Oracle 1z0-1080-25 is a hot certification exam in the IT industry, and a lot of IT professionals all want to get Oracle 1z0-1080-25 certification. So Oracle certification 1z0-1080-25 exam is also a very popular IT certification exam. Oracle 1z0-1080-25 certificate is very helpful to your work in the IT industry, which can help promote your position and salary a lot and let your life have more security.

Oracle 1z0-1080-25 Exam Syllabus Topics:

Topic	Details
Topic 1	• Introduction to Planning Modules: This section of the exam measures the skills of an EPM Consultant and introduces the available Planning modules, their integration, and use cases.
Topic 2	• Design forms and dashboards: This section of the exam measures the skills of an EPM Consultant and covers designing planning input forms and visual dashboards to support decision-making.
Topic 3	• Explain required and user-defined dimensions; how dimension hierarchies impact Planning
Topic 4	• Manage Metadata and Data: This section of the exam measures the skills of a Planning Administrator and covers methods for loading and maintaining metadata and data in Planning.
Topic 5	• Create Reports: This section of the exam measures the skills of a Planning Administrator and involves creating reports that summarize planning activities and outcomes.
Topic 6	• Report on Planning Data: This section of the exam measures the skills of a Planning Administrator and focuses on generating reports to analyze and present Planning data effectively.
Topic 7	• Explain the benefits of using Groovy Rules: This section of the exam measures the skills of an EPM Consultant and explains how Groovy scripting enhances rule flexibility and performance.

Topic 8	• This section of the exam measures the skills of a Planning Administrator and includes understanding how standard and custom dimensions are used, and how dimension hierarchies affect planning structure and outcomes.
Topic 9	• Manage Rules: This section of the exam measures the skills of an EPM Consultant and covers designing and managing business logic using rules and rulesets to automate calculations.
Topic 10	• Describe Planning modules: This section of the exam measures the skills of an EPM Consultant and includes identifying different modules like Financials, Workforce, Projects, and Capital.
Topic 11	• Set up and run data maps: This section of the exam measures the skills of a Planning Administrator and focuses on configuring and executing data maps to move data across plan types or applications.
Topic 12	• Planning Overview: This section of the exam measures the skills of an EPM Consultant and covers the general features of Planning. It includes how Planning works, its core capabilities, and how it fits into enterprise performance management.
Topic 13	• Report on EPM data: This section of the exam measures the skills of a Planning Administrator and covers using reporting tools to analyze data stored in EPM applications.
Topic 14	• Creating System Reports: This section of the exam measures the skills of a Planning Administrator and focuses on system-generated reports that provide insights into application activity.
Topic 15	• Map data across applications: This section of the exam measures the skills of an EPM Consultant and includes how to map and align data structures between Planning and other connected applications.
Topic 16	• Create and manage navigation flows: This section of the exam measures the skills of an EPM Consultant and involves organizing navigation flows to simplify user interaction in Planning.
Topic 17	• Create and run data integrations: This section of the exam measures the skills of an EPM Consultant and involves building data integration flows between different data sources and Planning.
Topic 18	• Import and export data into Planning: This section of the exam measures the skills of a Planning Administrator and covers the process of moving planning data into and out of the system.
Topic 19	• Import and export metadata into Planning: This section of the exam measures the skills of a Planning Administrator and involves understanding how to bring metadata in and out of Planning applications.

1z0-1080-25 Trustworthy Practice | 1z0-1080-25 Test Braindumps

We are not only offering you the best 1z0-1080-25 torrent VCE but also the foremost customer service. If you search for the best high pass-rate study materials, our 1z0-1080-25 practice test questions will be your best select. Please rest assured that your money and information will be strictly protected and safe on our website. You have no need to worry anything while purchasing. After purchasing our products you can get 100%-pass-rate 1z0-1080-25 Real Questions to help you pass exam immediately at first attempt. Choosing our products will be your clever action for clearing 1z0-1080-25 exam.

Oracle Planning 2025 Implementation Professional Sample Questions (Q47-Q52):

NEW QUESTION # 47

Which three security design principles can help reduce overall security maintenance and troubleshooting?

- A. Creating groups over assigning individual access permission to users
- B. Having a single Identity Domain Administrator to ensure seamless operations

- C. Assigning read access to each cube, and then none and write access within dimension security
- **D. Using inherited permissions**
- **E. Configuring single sign-on (SSO)**

Answer: A,D,E

NEW QUESTION # 48

In module-based Planning, you can configure the time frame and granularity for plans, and the forecast for each module. You can have a different time frame and granularity for each module and year.

When configuring Financials, in which component would you configure the time frame and granularity for plans?

- A. Manage Time Periods
- B. Valid Intersections
- **C. Planning and Forecast Preparation**
- D. Seasonality Management

Answer: C

Explanation:

In Oracle Planning 2024's module-based Planning, including the Financials module, the time frame (e.g., years) and granularity (e.g., months, weeks) for plans and forecasts are configured to define the planning horizon and periodicity. For Financials, this configuration occurs in:

* A. Planning and Forecast Preparation: Correct. This component is where administrators define the time frame (e.g., start year, number of years) and granularity (e.g., monthly, weekly) for plans and forecasts.

It's a mandatory configuration task executed via the Configure card, allowing module-specific settings.

* B. Manage Time Periods: Incorrect. This is not a standard component in Oracle Planning for setting time frame and granularity; it's a term more aligned with other Oracle systems (e.g., Essbase) or custom period management, not Financials configuration.

* C. Seasonality Management: Incorrect. Seasonality Management deals with distributing data across periods based on patterns (e.g., seasonal trends), not setting the overall time frame or granularity.

* D. Valid Intersections: Incorrect. Valid Intersections define allowable data combinations across dimensions, not the time frame or granularity of plans.

The Oracle documentation specifies that Planning and Forecast Preparation is the component where time- related settings are established for Financials, making A the correct answer.

References:

Oracle Planning 2024 Implementation Study Guide: "Configuring Time Frame in Financials" (docs.oracle.com, Published 2024-10-10).

Oracle EPM Cloud Documentation: "Planning and Forecast Preparation" (docs.oracle.com, Published 2023-11-15, updated for 2024).

NEW QUESTION # 49

In Projects, which enablement option applies to Contract projects only?

- A. Project Benefits
- **B. Revenue**
- C. Rolling Forecast
- D. Expense

Answer: B

NEW QUESTION # 50

You want to analyze past data and predicted data to help you find patterns and insights into data that you might not have found on your own. To accomplish this, you configure Insights with Auto Predict.

Which two are Oracle EPM guidelines for implementing Insights and Auto Predict?

- **A. For future data, first run predictions in a test environment to ensure there is no impact on production data.**
- B. For future data, create a new insight by leveraging templates that include insight definitions.
- C. For historical data, create the Insights job using the lowest level of Period members possible so that the greatest amount of

historical data can be used.

- D. For historical data, there should be at least twice the amount of historical data as the number of prediction periods.

Answer: A,D

Explanation:

In Oracle Planning 2024, configuring Insights with Auto Predict allows users to analyze past and predicted data to uncover patterns and insights. Oracle provides specific guidelines to ensure effective implementation:

* A. For future data, create a new insight by leveraging templates that include insight definitions:

Incorrect. While templates can be used to set up Insights, this is not a specific Oracle guideline for implementing Auto Predict. Auto Predict relies on historical data and predictive algorithms, not predefined insight templates for future data.

* B. For historical data, there should be at least twice the amount of historical data as the number of prediction periods: Correct.

Oracle recommends having sufficient historical data-specifically, at least twice the number of periods you intend to predict-to ensure the accuracy of Auto Predict's machine learning algorithms. For example, predicting 12 months requires at least 24 months of historical data.

* C. For historical data, create the Insights job using the lowest level of Period members possible so that the greatest amount of historical data can be used: Incorrect. While granularity matters, Oracle does not mandate using the lowest level of Period members (e.g., days instead of months) as a guideline. The focus is on the quantity of historical data, not necessarily the lowest level of aggregation.

* D. For future data, first run predictions in a test environment to ensure there is no impact on production data: Correct. Oracle advises testing Auto Predict in a non-production environment to validate results and avoid unintended impacts on live data, aligning with best practices for predictive analytics deployment.

The two guidelines-B and D-are explicitly outlined in Oracle's documentation for Insights and Auto Predict to ensure reliable predictions and safe implementation.

Oracle Planning 2024 Implementation Study Guide: "Configuring Insights and Auto Predict" (docs.oracle.com, Published 2024-10-15).

NEW QUESTION # 51

In Strategic Modeling, you set up the Change in Inventory due to Non-Cash Activity account and provide more detailed accounts below that account. The account number is v2040.35:010. The main account is 2040.

Which two statements about setting up accounts in Strategic Modeling are true?

- A. Subaccounts inherit attributes of main accounts in both historical and forecast periods.
- B. When you create subaccounts for Balance Sheet accounts, subaccounts for related accounts are created automatically.
- C. You can add siblings to main accounts to create additional accounts.
- D. You can remove account 2040 if you no longer need it.

Answer: A,C

NEW QUESTION # 52

.....

The countless candidates have already passed their 1z0-1080-25 certification exam and they all used the real, valid, and updated Actual4Exams 1z0-1080-25 exam questions. So, why not, take a decision right now and ace your 1z0-1080-25 Exam Preparation with top-notch 1z0-1080-25 exam questions?
