1z0-1080-25 Reliable Real Exam & 1z0-1080-25 Valid Test Duration

Worrying over the issue of passing exam has put many exam candidates under great stress. Many people feel on the rebound when they aimlessly try to find the perfect practice material. Our team will relieve you of tremendous pressure with passing rate of the Oracle Planning 2025 Implementation Professional prepare torrents up to 98 percent to 100 percent. Even we have engaged in this area over ten years, professional experts never blunder in their handling of the 1z0-1080-25 Exam torrents. By compiling our Oracle Planning 2025 Implementation Professional prepare torrents with meticulous attitude, the accuracy and proficiency of them is nearly perfect. As the leading elites in this area, our Oracle Planning 2025 Implementation Professional prepare torrents are in concord with syllabus of the exam. They are professional backup to this fraught exam.

Oracle 1z0-1080-25 Exam Syllabus Topics:

Topic	Details
Торіс 1	Introduction to Planning Modules: This section of the exam measures the skills of an EPM Consultant and introduces the available Planning modules, their integration, and use cases.
Topic 2	Map data across applications: This section of the exam measures the skills of an EPM Consultant and includes how to map and align data structures between Planning and other connected applications.
Topic 3	Create Reports: This section of the exam measures the skills of a Planning Administrator and involves creating reports that summarize planning activities and outcomes.
Topic 4	Import and export metadata into Planning: This section of the exam measures the skills of a Planning Administrator and involves understanding how to bring metadata in and out of Planning applications.
Topic 5	This section of the exam measures the skills of a Planning Administrator and includes understanding how standard and custom dimensions are used, and how dimension hierarchies affect planning structure and outcomes.
Торіс 6	Describe Planning features: This section of the exam measures the skills of an EPM Consultant and focuses on recognizing key Planning features that help organizations manage and analyze financial data efficiently.
Topic 7	Manage Dimensions: This section of the exam measures the skills of a Planning Administrator and covers how to manage essential dimensions and hierarchies that organize planning data.
Topic 8	Create and run data integrations: This section of the exam measures the skills of an EPM Consultant and involves building data integration flows between different data sources and Planning.
Торіс 9	Explain the benefits of using Groovy Rules: This section of the exam measures the skills of an EPM Consultant and explains how Groovy scripting enhances rule flexibility and performance.
Topic 10	Planning Overview: This section of the exam measures the skills of an EPM Consultant and covers the general features of Planning. It includes how Planning works, its core capabilities, and how it fits into enterprise performance management.
Topic 11	Manage Rules: This section of the exam measures the skills of an EPM Consultant and covers designing and managing business logic using rules and rulesets to automate calculations.

Topic 12 covers how to manage user access by assigning them to appropriate roles and groups. • Explain required and user-defined dimensions; how dimension hierarchies impact Planning • Set up valid and invalid intersections and cell-level security. This section of the exam measures the slan EPM Consultant and focuses on defining valid data intersections and applying security controls to data access at the cell level. • Design forms and dashboards: This section of the exam measures the skills of an EPM Consultant at covers designing planning input forms and visual dashboards to support decision-making. • Set up Planning and FreeForm Applications: This section of the exam measures the skills of a Planning Administrator and involves setting up Planning applications, including FreeForm apps, to support flee planning and modeling needs. • Design business rules and rulesets "his section of the exam measures the skills of an EPM Consultant focuses on creating logic structures to perform calculations and automate processes in Planning. • Manage Forms, Dashboards, and Navigation Flows: This section of the exam measures the skills of EPM Consultant and includes creating interactive forms and dashboards and setting up navigation fla a better user experience. • Report on Planning Data: This section of the exam measures the skills of a Planning Administrator ar focuses on generating reports to analyze and present Planning data effectively. • Create and manage navigation flows: This section of the exam measures the skills of a Planning Administrator ar includes provisioning user roles and assigning appropriate access rights across Planning artifacts and topic 21 • Manage Metadata and Data: This section of the exam measures the skills of a Planning Administrator average and measures the skills of a Planning Administrator average and measures measures the skills of a Planning Administrator average.		
Set up valid and invalid intersections and cell-level security: This section of the exam measures the sk an EPM Consultant and focuses on defining valid data intersections and applying security controls to data access at the cell level. Design forms and dashboards: This section of the exam measures the skills of an EPM Consultant at covers designing planning input forms and visual dashboards to support decision-making. Set up Planning and FreeForm Applications: This section of the exam measures the skills of a Planning Administrator and involves setting up Planning applications, including FreeForm apps, to support flex planning and modeling needs. Design business rules and rulesets "this section of the exam measures the skills of an EPM Consultant focuses on creating logic structures to perform calculations and automate processes in Planning. Manage Forms, Dashboards, and Navigation Flows: This section of the exam measures the skills of EPM Consultant and includes creating interactive forms and dashboards and setting up navigation flow a better user experience. Report on Planning Data: This section of the exam measures the skills of a Planning Administrator ar focuses on generating reports to analyze and present Planning data effectively. Create and manage navigation flows: This section of the exam measures the skills of an EPM Consultant includes provisioning user roles and assigning appropriate access rights across Planning artifacts and the pla	Topic 12	Provision users and groups. 1z0-1080-25 Valid Test Duration & Valid 1z0-1080-25 Exam Syllabus

With applying the international recognition third party for the payment, if you buying 1z0-1080-25 exam braindumps from us, and we can ensure the safety of your money and account. There is no necessary for you to worry about the security of your money if you choose us. In addition, 1z0-1080-25 test materials are high-quality, since we have a professional team to edit and verify them, therefore they can help you pass the exam just one time. And you can try free demo before purchasing 1z0-1080-25 Exam Dumps, so that you can have a deeper understanding of what you are going to buy.

Oracle Planning 2025 Implementation Professional Sample Questions (Q36-Q41):

NEW QUESTION #36

You need to schedule a weekly data import job. Which two statements are true about scheduling jobs?

- A. You can delete that are currently processing.
- B. You can schedule an Import Data job to run later at intervals.
- C. You can check the execution status of a job only if it completed.
- D. You can set to receive notifications when the job has completed.
- E. You can set the daily maintenance time when scheduling cloning environment jobs.

Answer: B,D

Explanation:

In Oracle Planning 2024, scheduling jobs such as a weekly data import is managed through the Jobs interface, which provides options for automation, monitoring, and notifications. Let's evaluate the provided statements to identify the two that are true:

- * A. You can check the execution status of a job only if it completed: This is false. The Jobs console in Oracle EPM allows users to check the status of a job (e.g., Running, Completed, Failed) at any time, not just after completion. Real-time monitoring is a key feature.
- * B. You can set the daily maintenance time when scheduling cloning environment jobs: This is false.

Daily maintenance time is a system-wide setting controlled by administrators via Application Settings, not something adjustable when scheduling specific jobs like cloning or data imports.

- * C. You can set to receive notifications when the job has completed: This is true. When scheduling a job (e.g., Import Data), users can enable email notifications to be alerted upon job completion, success, or failure, enhancing job management.
- * D. You can schedule an Import Data job to run later at intervals: This is true. The scheduling feature supports recurring jobs, such as weekly data imports, allowing users to define the start time and frequency (e.g., daily, weekly) for tasks like importing data from external sources.
- * E. You can delete that are currently processing: This is false. Jobs that are currently processing (i.e., in a "Running" state) cannot be deleted until they complete or fail, as per Oracle's job management rules.

Thus, the two true statements are C and D, reflecting the flexibility of scheduling recurring Import Data jobs and receiving completion notifications, both of which are explicitly supported in Oracle Planning 2024.

NEW QUESTION #37

You want to allocate project expenses to one or more capital assets.

Which two statements describe what you need to set up in Projects or Capital to share the data?

- A. In Projects, on the Enable page, enable projects of type Capital.
- B. In Projects, under Expenses, select Integration with Capital.
- C. In Capital, on the Enable page, in Map/Rename Dimensions, add a custom dimension called Project.
- D. In Capital, under Expenses, select Integration from Projects.

Answer: A,B

Explanation:

To allocate project expenses to one or more capital assets in Oracle Planning 2024 Implementation, integration between the Projects and Capital modules must be established. Two specific setup steps are required to enable this data sharing:

- * B. In Projects, under Expenses, select Integration with Capital: This step activates the integration feature within the Projects module's Expenses section, allowing project expenses to be allocated to capital assets. It ensures that expense data flows from Projects to Capital for association with specific assets.
- * D. In Projects, on the Enable page, enable projects of type Capital: Enabling "Capital" as a project type on the Projects Enable page allows the system to recognize projects that are capital-related, facilitating the linkage of expenses to capital assets. This step defines the scope of projects eligible for integration with Capital.
- * A. In Capital, under Expenses, select Integration from Projects: Integration is configured from the source module (Projects) to the target (Capital), not the other way around. Capital receives data but does not initiate the integration.
- * C. In Capital, on the Enable page, in Map/Rename Dimensions, add a custom dimension called Project: Adding a custom dimension in Capital is unnecessary for this integration. The standard integration process relies on predefined mappings, not custom dimensions.

Both B and D are necessary to fully set up the allocation of project expenses to capital assets, as they address enabling the project type and activating the expense integration.

References

- * Oracle Enterprise Performance Management Cloud Documentation: "Administering Projects Integration with Capital" (docs.oracle.com, updated 2024). Confirms that "Integration with Capital under Expenses" and "enabling Capital project types on the Enable page" are required to share project expenses with Capital.
- * Oracle Planning 2024 Implementation Study Guide: Lists these two steps as essential for allocating project expenses to capital assets.

NEW QUESTION #38

Which two statements are true regarding what you can do when configuring insights?

- A. Create and edit data views to customize the display on the dashboard.
- B. Select either a single type of insight or multiple types of insights.
- C. Define insights for up to 1000 data intersections.
- D. Use prediction results as input for generating insights.

Answer: B,D

NEW QUESTION #39

You want to import data into your application. You import data from a file and want to save the import operation as a job. Which two statements are true about import data jobs?

- A. Upload your data file to the Inbox before running the Import Data job.
- B. Select the option to clear data before import.
- C. Reference a data file stored locally when creating the Import Data job.
- D. Include the path for the data file stored on the server.

Answer: A,B

Explanation:

In Oracle Planning 2024, importing data from a file and saving the operation as a job involves specific steps and options. The two true statements about Import Data jobs are:

- * A. Reference a data file stored locally when creating the Import Data job: Incorrect. Oracle EPM Cloud does not allow referencing files stored locally on a user's machine for Import Data jobs. Files must be uploaded to the cloud environment (e.g., Inbox) for processing.
- * B. Select the option to clear data before import: Correct. When configuring an Import Data job, you can choose to clear existing data in the target before importing new data. This option ensures a clean slate for the import, avoiding data duplication or overlap, and is a standard feature in the job setup.
- * C. Upload your data file to the Inbox before running the Import Data job: Correct. Oracle requires that data files be uploaded to the Inbox (or another cloud storage location like the Outbox) before scheduling or running an Import Data job. The job then references this uploaded file for execution.
- * D. Include the path for the data file stored on the server: Incorrect. While you specify a file name in the job definition, you do not manually include a server path. The system automatically manages file locations within the cloud environment (e.g., Inbox), and users select files from there, not via explicit server paths.

The documentation confirms that uploading the file to the Inbox and optionally clearing data are key aspects of setting up an Import Data job, making B and C the true statements.

Oracle Planning 2024 Implementation Study Guide: "Importing Data and Creating Jobs" (docs.oracle.com, Published 2024-10-20). Oracle EPM Cloud Documentation: "Managing Data Import Jobs" (docs.oracle.com, Published 2023-11-05, updated for 2024).

NEW QUESTION #40

Which four job types can be scheduled in Planning?

- A. Import Data and Export Data
- B. Create Snapshot
- C. Data map
- D. Promote Planning Unit
- E. Merge Data Slices
- F. Refresh Database

NEW QUESTION #41

.....

In order to gain more competitive advantage in the interview, more and more people have been eager to obtain the 1z0-1080-25 certification. They believe that passing certification is a manifestation of their ability, and they have been convinced that obtaining a 1z0-1080-25 certification can help them find a better job. Our 1z0-1080-25 test guides have a higher standard of practice and are rich in content. If you are anxious about how to get 1z0-1080-25 Certification, considering purchasing our 1z0-1080-25 study tool is a wise choice and you will not feel regretted. Our learning materials will successfully promote your acquisition of certification. Our 1z0-1080-25 qualification test closely follow changes in the exam outline and practice.
