1z0-1093-25 Exam Demo, 1z0-1093-25 Certification Dump

BTW, DOWNLOAD part of ValidVCE 1z0-1093-25 dumps from Cloud Storage: https://drive.google.com/open?id=1aaXyMImE6-XwHAyMjxzbP91eOK4KipC_

ValidVCE is a dumps pdf provider that ensures you pass the Oracle braindumps exam with high rate. You may wonder how we can guarantee the high pass rate. You can rest assured that the 1z0-1093-25 braindumps questions and learning materials are created by our IT teammates who have rich experience in the 1z0-1093-25 Top Questions. And we constantly keep the updating of vce dumps to ensure the accuracy of questions and answers.

The 1z0-1093-25 exam real questions are the ideal and recommended study material for quick and complete Oracle 1z0-1093-25 exam preparation. As a 1z0-1093-25 Exam candidate you should not ignore the 1z0-1093-25 exam questions and must add the Oracle 1z0-1093-25 exam questions in preparation.

Experience 24/7 Support And Real 1z0-1093-25 Exam Questions With ValidVCE

With the development of the times, the pace of the society is getting faster and faster. If we don't try to improve our value, we're likely to be eliminated by society. Under the circumstances, we must find ways to prove our abilities. For example, getting the 1z0-1093-25 Certification is a good way. If we had it, the chances of getting a good job would be greatly improved. And our 1z0-1093-25 exam braindumps are the tool to help you get the 1z0-1093-25 certification.

Oracle 1z0-1093-25 Exam Syllabus Topics:

Topic	Details
Topic 1	• Oracle Cloud Infrastructure Database Management Service: This section of the exam measures the skills of a Cloud Operations Analyst and provides insight into Oracle's Database Management Service on OCI. It focuses on enabling the service for databases, monitoring their performance, and performing diagnostic and tuning activities. It also covers tasks related to the administration of databases running on Oracle Cloud Infrastructure.
Topic 2	• MySQL HeatWave Technical Overview: This section of the exam measures the skills of a MySQL Cloud Specialist and introduces MySQL HeatWave, Oracle's high-performance analytics engine for MySQL. It includes provisioning, migrating existing MySQL databases to HeatWave, and working with its analytical and machine-learning capabilities. It also covers day-to-day operational activities within the MySQL HeatWave environment.
Topic 3	• Exadata Database Service (ExaDB): This section of the exam measures the skills of a Database Infrastructure Engineer and focuses on the advanced Exadata Database Service. It includes the provisioning of Exadata systems, management of Exadata Cloud Infrastructure, and VM Cluster administration. It also evaluates knowledge of lifecycle management tasks and how to interact with various Exadata management utilities and interfaces.

Topic 4	• Base Database Service - VM (BaseDB): This section of the exam measures the skills of a Cloud Database Administrator and covers the foundational elements of Oracle's Base Database Service. It includes understanding what the BaseDB service is, how to provision and manage it, and lifecycle operations such as backups, recovery, patching, and upgrades. It also tests familiarity with monitoring and management interfaces used to control and observe the BaseDB environment.
Topic 5	• NoSQL Database Service Technical Overview: This section of the exam measures the skills of a NoSQL Developer and explores Oracle's NoSQL Database Service. It includes understanding the basics of NoSQL architecture, handling table-level security, rate limiting, and data modeling. It also covers concepts like provisioned throughput and the usage of language SDKs for interacting with NoSQL services on Oracle Cloud.

Oracle Cloud Database Services 2025 Professional Sample Questions (Q96-Q101):

NEW QUESTION # 96
Which two statements are accurate regarding the lifecycle management of an Exadata VM Cluster?

- A. The VM Cluster can be terminated independently, allowing reuse of the Exadata Infrastructure for a different VM Cluster.
- B. The VM Cluster's CPU core count can be dynamically scaled up or down without requiring a reboot.
- C. Modifying the shape of the Exadata Infrastructure automatically scales the VM Cluster resources proportionally.
- D. The VM Cluster can be independently stopped and started without impacting the underlying Exadata Infrastructure.
- E. Patching the Exadata Infrastructure automatically patches the VM Cluster and databases.

Answer: A,D

Explanation:
A:Exadata VM Clusters can be managed independently from the Exadata Infrastructure. This means you can start or stop the cluster without affecting the infrastructure, which provides flexibility for maintenance and performance tuning.
E:The VM Cluster can be terminated without impacting the Exadata Infrastructure. This feature is useful when you want to reassign the infrastructure resources to a new or different cluster.
Why the other options are incorrect:
* B:While some adjustments might not need a reboot, core count scaling often requires restarting.
* C:Patching the infrastructure and the VM Cluster are separate processes.
* D:Changing the infrastructure shape does not automatically adjust VM Cluster resources. Manual reconfiguration is needed.

NEW QUESTION # 97
Which two requirements must be met before you can create an Exadata Database Service VM Cluster?

- A. A valid support identifier (SI) associated with the OCI account.
- B. An Exadata Infrastructure resource must be created first.
- C. A Virtual Cloud Network (VCN) with necessary subnets for client access and backups.
- D. A configured Oracle Cloud Infrastructure (OCI) Vault and Key.
- E. A configured Exadata Cloud@Customer infrastructure.

Answer: B,C

Explanation:
* B. VCN and Subnets:Exadata Database Service VM Clusters require a VCN to provide network connectivity for database instances, client access, and backups. Proper subnets are essential for this network setup.
* E. Exadata Infrastructure Resource:Before creating a VM Cluster, an Exadata Infrastructure resource must be provisioned. The VM Cluster resides within this infrastructure.
Why the other options are incorrect:
* A:OCI Vault and Key are used for encryption but not mandatory for VM Cluster creation.
* C:A valid SI is needed for support but not a technical requirement for VM cluster creation.
* D:Exadata Cloud@Customer is a separate service from Exadata Database Service.

NEW QUESTION # 98
How does the HeatWave Lakehouse capability extend the analytical capabilities of MySQL HeatWave?

- A. By providing a graphical user interface for managing the MySQL database.
- B. By providing a built-in ETL (Extract, Transform, Load) tool for data integration.
- C. By creating a separate data warehouse in the cloud to store historical data.
- D. By automatically replicating the MySQL database to a disaster recovery site.
- E. By enabling HeatWave to query data directly from object storage (e.g., Oracle Cloud Infrastructure Object Storage, Amazon S3) in various formats without requiring data loading.

Answer: E

Explanation:
B: Querying data directly from object storage without data loading:
* HeatWave Lakehouse extends MySQL HeatWave by allowing direct query execution on data stored in external object storage.
* Supports formats such asCSV,Parquet, andAvro.
* Eliminates the need for data import, making the process faster and more efficient for large datasets.
* Enhances HeatWave's capability to act as aLakehouseby unifying data warehousing and data lake functionalities.
Why the other options are incorrect:
* A. GUI for database management:Not related to analytical extension.
* C. Disaster recovery replication:Not related to Lakehouse functionality.
* D. Built-in ETL tool:Lakehouse focuses on query capability, not ETL.
* E. Separate data warehouse:HeatWave Lakehouse queries data in-place, not creating a separate warehouse.

NEW QUESTION # 99
Which two prerequisites are required before you can provision a MySQL HeatWave DB system?

- A. A pre-configured MySQL database dump for initial data loading.
- B. A MySQL Enterprise Edition license.
- C. A configured OCI Vault with encryption keys for database security.
- D. A Virtual Cloud Network (VCN) with appropriately configured subnets.
- E. An OCI Compute instance to act as a client for the MySQL DB system.

Answer: B,D

Explanation:
VCN Requirement (B):
AVirtual Cloud Network (VCN)with appropriate subnets is essential to providenetwork connectivity and isolationfor the HeatWave DB system. It ensures secure data flow within the Oracle Cloud Infrastructure.
License Requirement (E):
Since HeatWave is anenterprise feature, it requires aMySQL Enterprise Edition license.Without this license, the HeatWave functionalities cannot be utilized.
Why the other options are incorrect:
* A:Data loading can be performed post-provisioning.
* C:While encryption can be configured, it is not a prerequisite.
* D:An OCI Compute instance may be used as a client but is not mandatory for provisioning.

NEW QUESTION # 100
Which BaseDB lifecycle management activity is MOST directly associated with ensuring the continued availability of a database instance during a planned maintenance window?

- A. Taking a full database backup using RMAN.
- B. Performing an in-place upgrade of the database software.
- C. Applying a quarterly security patch.
- D. Using Oracle Data Guard for a switchover operation.
- E. Resizing the block volume storage.

Answer: D

Explanation:
C: Using Oracle Data Guard for a switchover operation:
* Aswitchoveris a planned role reversal between the primary and standby databases.
* Zero data loss:Since both databases are synchronized, it minimizes downtime.
* Ideal for planned maintenance:The primary database is switched to the standby, allowing maintenance on the original primary without downtime.
* Data Guard Switchover:
sql
CopyEdit
ALTER DATABASE SWITCHOVER TO standby_db;
Why the other options are incorrect:
* A. Full backup with RMAN:Backup does not ensure availability during maintenance.
* B. In-place upgrade:Typically involves downtime.
* D. Quarterly patch:Patching often requires database restarts, causing downtime.
* E. Resizing block volume:Does not maintain availability if the database requires restarting.

NEW QUESTION # 101
.....

Our ValidVCE will provide you with the most satisfying after sales service. We provide one-year free update service to you one year after you have purchased 1z0-1093-25 exam software., which can make you have a full understanding of the latest and complete 1z0-1093-25 Questions so that you can be confident to pass the exam. If you are unlucky to fail 1z0-1093-25 exam for the first time, we will give you a full refund of the cost you purchased our dump to make up your loss.
