

1z0-1093-25 Examboost Torrent & 1z0-1093-25 Training Pdf & 1z0-1093-25 Latest Vce

BTW, DOWNLOAD part of TestsDumps 1z0-1093-25 dumps from Cloud Storage: <https://drive.google.com/open?id=1XUOdSHV4P2MxM8-NbtyzMVdBjQ0dFEV4>

Our 1z0-1093-25 study prep is classified as three versions up to now. All these versions of our 1z0-1093-25 exam braindumps are popular and priced cheap with high quality and accuracy rate. They achieved academic maturity so that their quality far beyond other practice materials in the market with high effectiveness and more than 98 percent of former candidates who chose our 1z0-1093-25 Practice Engine win the exam with their dream certificate.

Oracle 1z0-1093-25 Exam Syllabus Topics:

Topic	Details
Topic 1	MySQL HeatWave Technical Overview: This section of the exam measures the skills of a MySQL Cloud Specialist and introduces MySQL HeatWave, Oracle's high-performance analytics engine for MySQL. It includes provisioning, migrating existing MySQL databases to HeatWave, and working with its analytical and machine-learning capabilities. It also covers day-to-day operational activities within the MySQL HeatWave environment.
Topic 2	NoSQL Database Service Technical Overview: This section of the exam measures the skills of a NoSQL Developer and explores Oracle's NoSQL Database Service. It includes understanding the basics of NoSQL architecture, handling table-level security, rate limiting, and data modeling. It also covers concepts like provisioned throughput and the usage of language SDKs for interacting with NoSQL services on Oracle Cloud.
Topic 3	Exadata Database Service (ExaDB): This section of the exam measures the skills of a Database Infrastructure Engineer and focuses on the advanced Exadata Database Service. It includes the provisioning of Exadata systems, management of Exadata Cloud Infrastructure, and VM Cluster administration. It also evaluates knowledge of lifecycle management tasks and how to interact with various Exadata management utilities and interfaces.
Topic 4	Base Database Service - VM (BaseDB): This section of the exam measures the skills of a Cloud Database Administrator and covers the foundational elements of Oracle's Base Database Service. It includes understanding what the BaseDB service is, how to provision and manage it, and lifecycle operations such as backups, recovery, patching, and upgrades. It also tests familiarity with monitoring and management interfaces used to control and observe the BaseDB environment.

Topic 5	• Oracle Cloud Infrastructure Database Management Service: This section of the exam measures the skills of a Cloud Operations Analyst and provides insight into Oracle's Database Management Service on OCI. It focuses on enabling the service for databases, monitoring their performance, and performing diagnostic and tuning activities. It also covers tasks related to the administration of databases running on Oracle Cloud Infrastructure.

1z0-1093-25 Authorized Exam Dumps & New 1z0-1093-25 Study Guide

Our company is professional brand. There are a lot of experts and professors in the field in our company. All the experts in our company are devoting all of their time to design the best 1z0-1093-25 1z0-1093-25 study materials for all people. In order to ensure quality of the products, a lot of experts keep themselves working day and night. We believe that our study materials will have the ability to help all people pass their 1z0-1093-25 Exam and get the related exam in the near future.

Oracle Cloud Database Services 2025 Professional Sample Questions (Q86-Q91):

NEW QUESTION # 86

You need to monitor the data loading process into your HeatWave cluster to ensure optimal performance.

Which OCI service provides the most detailed information on data loading operations and potential bottlenecks?

- A. OCI Functions
- B. OCI Streaming
- C. OCI Service Connector Hub
- **D. OCI Monitoring with HeatWave specific metrics**
- E. OCI Notifications

Answer: D

Explanation:

C: OCI Monitoring with HeatWave specific metrics:

* OCI Monitoring collects and visualizes detailed metrics related to HeatWave cluster operations.

* Key metrics include:

* Data load throughput

* Data load latency

* Memory and CPU utilization

* These metrics help identify bottlenecks during data loading, allowing for proactive performance tuning.

* Integrates with OCI Alarms to notify administrators when thresholds are breached.

Why the other options are incorrect:

* A. OCI Notifications: Sends alerts but does not collect performance metrics.

* B. OCI Service Connector Hub: Moves data between services but does not provide direct performance insights.

* D. OCI Streaming: Used for real-time data ingestion, not specifically for HeatWave monitoring.

* E. OCI Functions: Executes serverless functions, not related to HeatWave metrics.

NEW QUESTION # 87

When considering autoscaling for provisioned throughput in NoSQL Database Cloud Service, which metric is LEAST relevant for determining when to scale up the capacity units?

- A. Number of rejected write requests due to insufficient WCUs.
- B. Number of rejected read requests due to insufficient RCUs.
- **C. CPU utilization of the compute instances hosting the database.**
- D. Latency of read and write operations.

Answer: C

Explanation:

A: CPU utilization of the compute instances hosting the database:

* Autoscaling in NoSQL Database Cloud Service primarily focuses on RCUs (Read Capacity Units) and WCUs (Write Capacity Units).

* The objective is to dynamically adjust capacity based on query workload, not on CPU utilization.

* Even if CPU usage is high, it might not necessarily indicate that the capacity units are inadequate.

Why the other options are more relevant:

* B. Rejected read requests (RCUs): Direct indicator that read capacity is insufficient, requiring scaling.

* C. Rejected write requests (WCUs): Indicates that the write throughput is inadequate, necessitating scaling.

* D. Latency of read and write operations: Increased latency often points to under-provisioned throughput.

NEW QUESTION # 88

Which two of the following describe capabilities of the Database Management service in relation to database parameter management?

- A. Database Management does not offer parameter management capabilities due to security concerns.
- **B. Database Management facilitates comparing parameter settings between different databases or across different points in time for a single database.**
- **C. Database Management provides recommendations for parameter tuning based on historical performance data.**
- D. Database Management can automatically detect and correct parameter settings that deviate from Oracle- recommended best practices, regardless of the database edition.

Answer: B,C

Explanation:

B: Recommendations for parameter tuning:

* Database Management analyzes historical performance data and provides tuning recommendations.

* These recommendations align with Oracle best practices to optimize database performance.

C: Comparison of parameter settings:

* The service allows users to compare parameter configurations between different databases or across time points for a single database.

* This is useful for identifying changes or discrepancies that could impact performance.

Why the other options are incorrect:

* A. Automatic correction of parameters: Database Management does not automatically correct parameters; changes require manual intervention.

* D. Lack of parameter management: Incorrect statement, as the service does offer parameter management features.

NEW QUESTION # 89

When enabling Database Management Service for a cloud database, which of the following is typically NOT a configurable parameter specific to the Database Management Service itself?

- A. The frequency at which performance metrics are collected.
- B. The maximum amount of storage space allocated for collected metrics.
- **C. The database version.**
- D. The specific metrics that are collected from the database.

Answer: C

Explanation:

D: The database version:

* The database version is not configurable through the Database Management Service.

* The version is determined during the database instance provisioning and is independent of the management service.

* The management service can monitor and manage databases of various versions, but it does not control or alter the version itself.

Why the other options are configurable:

* A. Frequency of metric collection: Can be adjusted to balance performance and data granularity.

* B. Specific metrics collected: Can be customized based on monitoring requirements.

* C. Storage space for metrics: Some configurations allow defining the retention and storage capacity for collected data.

NEW QUESTION # 90

Which of the following is the recommended approach for migrating a large, mission-critical database from an on-premises Exadata system to Exadata Database Service with minimal downtime?

- A. Traditional export/import using Data Pump over a public network.
- B. Using SQL Developer to copy the data over a VPN connection.
- C. Performing a full backup and restore to a new Exadata Database Service instance.
- **D. Creating a physical standby database using Data Guard and switching over to the standby in OCI.**

Answer: D

Explanation:

B: Using Data Guard for physical standby and switchover:

* This method enables minimal downtime migration.

* Steps:

* Configure Data Guard to synchronize the standby database with the primary on-premises database.

* Once synchronized, perform a switchover to make the standby the new primary.

* Downtime is limited to the switchover duration.

* This approach leverages real-time replication to minimize disruption.

Why the other options are incorrect:

* A. Export/Import with Data Pump: Too time-consuming for large databases.

* C. Full backup and restore: High downtime due to the time required for data transfer and restoration.

* D. Copying via SQL Developer: Not feasible for mission-critical and large databases due to slow transfer speeds.

NEW QUESTION # 91

.....

TestsDumps to provide you with the real exam environment to help you find the real Oracle 1z0-1093-25 exam preparation process. If you are a beginner or want to improve your professional skills, TestsDumps Oracle 1z0-1093-25 will help you, let you approach your desired step by step. If you have any questions on the exam question and answers, we will help you solve it. Within a year, we will offer free update.
