

1z0-1093-25 Reliable Test Question, 1z0-1093-25 Well Prep

DOWNLOAD the newest VCE4Plus 1z0-1093-25 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1GhwClp0Y1e1ThCKdb100KSWpe5zq24-L>

Our 1z0-1093-25 exam guide can stand the test of market as well as customers of various needs with passing rate up to 98 to 100 percent, which is a strong proof that attest to their efficacy. Our 1z0-1093-25 practice materials can provide the evidence of your working proficiency, and the high-efficiency of them are provided by our company can effectively advance your pace of making progress and speed up your pace of reviving it. So our 1z0-1093-25 Practice Engine is your ideal choice.

Oracle 1z0-1093-25 Exam Syllabus Topics:

Topic	Details
Topic 1	NoSQL Database Service Technical Overview: This section of the exam measures the skills of a NoSQL Developer and explores Oracle's NoSQL Database Service. It includes understanding the basics of NoSQL architecture, handling table-level security, rate limiting, and data modeling. It also covers concepts like provisioned throughput and the usage of language SDKs for interacting with NoSQL services on Oracle Cloud.
Topic 2	Exadata Database Service (ExaDB): This section of the exam measures the skills of a Database Infrastructure Engineer and focuses on the advanced Exadata Database Service. It includes the provisioning of Exadata systems, management of Exadata Cloud Infrastructure, and VM Cluster administration. It also evaluates knowledge of lifecycle management tasks and how to interact with various Exadata management utilities and interfaces.
Topic 3	MySQL HeatWave Technical Overview: This section of the exam measures the skills of a MySQL Cloud Specialist and introduces MySQL HeatWave, Oracle's high-performance analytics engine for MySQL. It includes provisioning, migrating existing MySQL databases to HeatWave, and working with its analytical and machine-learning capabilities. It also covers day-to-day operational activities within the MySQL HeatWave environment.

Topic 4	• Oracle Cloud Infrastructure Database Management Service: This section of the exam measures the skills of a Cloud Operations Analyst and provides insight into Oracle's Database Management Service on OCI. It focuses on enabling the service for databases, monitoring their performance, and performing diagnostic and tuning activities. It also covers tasks related to the administration of databases running on Oracle Cloud Infrastructure.
Topic 5	• Base Database Service - VM (BaseDB): This section of the exam measures the skills of a Cloud Database Administrator and covers the foundational elements of Oracle's Base Database Service. It includes understanding what the BaseDB service is, how to provision and manage it, and lifecycle operations such as backups, recovery, patching, and upgrades. It also tests familiarity with monitoring and management interfaces used to control and observe the BaseDB environment.

>> 1z0-1093-25 Reliable Test Question <<

100% Pass 2025 Oracle 1z0-1093-25 –High-quality Reliable Test Question

Nowadays a lot of people start to attach importance to the demo of the study materials, because many people do not know whether the 1z0-1093-25 guide dump they want to buy are useful for them or not, so providing the demo of the study materials for all people is very important for all customers. A lot of can have a good chance to learn more about the 1z0-1093-25 certification guide that they hope to buy. Luckily, we are going to tell you a good new that the demo of the 1z0-1093-25 Study Materials are easily available in our company. If you buy the study materials from our company, we are glad to offer you with the best demo of our study materials. You will have a deep understanding of the 1z0-1093-25 exam files from our company, and then you will find that the study materials from our company will very useful and suitable for you to prepare for you 1z0-1093-25 exam.

Oracle Cloud Database Services 2025 Professional Sample Questions (Q51-Q56):

NEW QUESTION # 51

Which two functionalities can be accomplished using the Performance Hub within Database Management for monitoring?

- A. Upgrade the database to a newer version.
- B. Identify blocking sessions that are impacting database performance.
- C. Execute ADDM (Automatic Database Diagnostic Monitor) analysis on a historical workload.
- D. Directly modify database initialization parameters.

Answer: B,C

Explanation:

A: Execute ADDM (Automatic Database Diagnostic Monitor) analysis on a historical workload:

* Performance Hub allows users to analyze performance data collected over time.

* ADDM analysis provides insights into performance bottlenecks and recommendations for tuning.

C: Identify blocking sessions that are impacting database performance:

* Performance Hub helps identify active blocking sessions, enabling quick resolution of performance issues.

* It provides real-time and historical data for better troubleshooting.

Why the other options are incorrect:

* B. Modify database parameters: Performance Hub does not have the ability to change database configurations directly.

* D. Upgrade the database: Upgrades are managed through other tools, such as Database Upgrade Assistant (DBUA).

NEW QUESTION # 52

Which aspect of NoSQL Database Cloud Service is LEAST impacted by the choice of SDK used in an application?

- A. Method for authenticating with the service.
- B. Syntax for querying data.
- C. Error handling mechanisms.
- D. Underlying database architecture and scalability characteristics.

Answer: D

Explanation:

C: Underlying database architecture and scalability characteristics:

* The architecture and scalability of Oracle NoSQL Database Cloud Service are inherent to the platform and do not change based on the SDK.

* SDKs are designed to provide language-specific interfaces for data interaction but do not alter the core architecture.

* Whether using Java, Python, or another SDK, the database's sharding, replication, and consistency characteristics remain constant.

Why the other options are impacted:

* A. Query syntax: SDKs may offer different syntax or query formats.

* B. Authentication method: Varies between SDKs, e.g., API keys vs. IAM tokens.

* D. Error handling: Each SDK may implement error handling differently, influencing how exceptions are processed.

NEW QUESTION # 53

You need to implement a backup and recovery strategy for your MySQL HeatWave Database System. What is the recommended method for backing up and restoring your HeatWave cluster?

- A. Using the OCI Object Storage service for storing manual database dumps.
- B. Manually copying the data files from the HeatWave cluster's storage.
- **C. Utilizing OCI Database backups, which include both the MySQL Database System and the HeatWave cluster.**
- D. Relying solely on MySQL replication to another MySQL instance.
- E. Using the MySQL Enterprise Backup tool directly on the HeatWave nodes.

Answer: C

Explanation:

C: Utilizing OCI Database backups:

* Integrated with Oracle Cloud Infrastructure (OCI), providing consistent and complete backups.

* Supports both the MySQL Database System and the HeatWave cluster, ensuring data integrity.

* Automates backup scheduling and retention policies.

* Facilitates easy restoration in case of data loss or corruption.

Why the other options are incorrect:

* A. Manual copying: Prone to errors and lacks consistency.

* B. Manual dumps to Object Storage: Labor-intensive and not automated.

* D. MySQL replication: Suitable for high availability, but not a substitute for regular backups.

* E. MySQL Enterprise Backup on nodes: Complex and not designed for HeatWave's distributed environment.

NEW QUESTION # 54

What is the MOST effective method to minimize the recovery time objective (RTO) for a BaseDB database in the event of a complete DB system failure, assuming both cost and complexity are important considerations?

- A. Using Oracle Data Guard with synchronous replication to a remote region.
- B. Relying solely on regular full database backups.
- C. Performing frequent incremental backups with block change tracking enabled.
- **D. Using Oracle Data Guard with asynchronous replication to a different availability domain within the same region.**
- E. Implementing a custom script to regularly copy data files to a secondary block volume.

Answer: D

Explanation:

C: Using Oracle Data Guard with asynchronous replication to a different availability domain within the same region.

Asynchronous Replication:

* Minimizes performance impact while ensuring data protection.

* Placing standby in the same region reduces latency and cost.

* Fast switchover reduces RTO.

Why the other options are less effective:

* A. Full backups: Time-consuming for recovery.

* B. Synchronous to a remote region: Increases latency and cost.

* D. Incremental backups: Slower recovery process.

* E. Custom script:Complex and less reliable than Data Guard.

NEW QUESTION # 55

While operating a MySQL HeatWave cluster, you need to resize the HeatWave cluster to accommodate an increased workload. Which method is the most efficient and recommended way to scale the HeatWave cluster?

- **A. Using the OCI CLI or Console to adjust the HeatWave cluster's shape and node count.**
- B. Manually altering the innodb_buffer_pool_size and restarting the MySQL server.
- C. Recreating the HeatWave cluster with the desired size.
- D. Modifying the underlying VM shapes of the MySQL Database System.
- E. Performing a manual data export and import into a new, larger MySQL Database System.

Answer: A

Explanation:

Scaling HeatWave Efficiently:

The OCI CLI or Console provides a streamlined way to scale the HeatWave cluster. You can easily change the shape and node count through the console without significant downtime. The system handles the necessary data redistribution and configuration updates automatically.

* This method minimizes disruption and is significantly faster than manual reconfiguration.

* OCI's automated scaling ensures that the cluster maintains optimal performance throughout the operation.

Why the other options are incorrect:

* A: Adjusting buffer size affects memory, not cluster size.

* C: Changing VM shapes does not directly affect HeatWave.

* D: Recreating the cluster is inefficient and time-consuming.

* E: Manual export/import introduces downtime and is not efficient for scaling.

NEW QUESTION # 56

.....

By choosing a good training site, you can achieve remarkable results. VCE4Plus has committed to provide all real Oracle 1z0-1093-25 practice tests. VCE4Plus Oracle 1z0-1093-25 exam dumps authorized by the supplier, with wide coverage can save a lot of time for you. Guarantee your success in the first attempt. If you do not pass the Oracle Business Solutions 1z0-1093-25 Exam on your first attempt we will give you a FULL REFUND of your purchasing fee. Failing an Exam won't damage you financially as we provide 100% refund on claim.
