

1z0-1093-25 Unlimited Exam Practice, 1z0-1093-25 Reliable Test Forum

What's more, part of that ITEXamSimulator 1z0-1093-25 dumps now are free: <https://drive.google.com/open?id=1-pJpZbdK9GzKFchFvAGCycySJ4XltnTs>

With the rapid development of the economy, the demands of society on us are getting higher and higher. If you can have 1z0-1093-25 certification, then you will be more competitive in society. We have chosen a large number of professionals to make 1z0-1093-25 learning question more professional, while allowing our study materials to keep up with the times. Of course, we do it all for you to get the information you want, and you can make faster progress. You can also get help from 1z0-1093-25 Exam Training professionals at any time when you encounter any problems. We can be sure that with the professional help of our 1z0-1093-25 test guide you will surely get a very good experience. Good materials and methods can help you to do more with less. Choose 1z0-1093-25 test guide to get you closer to success.

Oracle 1z0-1093-25 Exam Syllabus Topics:

Topic	Details

Topic 1	Base Database Service - VM (BaseDB): This section of the exam measures the skills of a Cloud Database Administrator and covers the foundational elements of Oracle's Base Database Service. It includes understanding what the BaseDB service is, how to provision and manage it, and lifecycle operations such as backups, recovery, patching, and upgrades. It also tests familiarity with monitoring and management interfaces used to control and observe the BaseDB environment.
Topic 2	NoSQL Database Service Technical Overview: This section of the exam measures the skills of a NoSQL Developer and explores Oracle's NoSQL Database Service. It includes understanding the basics of NoSQL architecture, handling table-level security, rate limiting, and data modeling. It also covers concepts like provisioned throughput and the usage of language SDKs for interacting with NoSQL services on Oracle Cloud.
Topic 3	Oracle Cloud Infrastructure Database Management Service: This section of the exam measures the skills of a Cloud Operations Analyst and provides insight into Oracle's Database Management Service on OCI. It focuses on enabling the service for databases, monitoring their performance, and performing diagnostic and tuning activities. It also covers tasks related to the administration of databases running on Oracle Cloud Infrastructure.
Topic 4	Exadata Database Service (ExaDB): This section of the exam measures the skills of a Database Infrastructure Engineer and focuses on the advanced Exadata Database Service. It includes the provisioning of Exadata systems, management of Exadata Cloud Infrastructure, and VM Cluster administration. It also evaluates knowledge of lifecycle management tasks and how to interact with various Exadata management utilities and interfaces.
Topic 5	MySQL HeatWave Technical Overview: This section of the exam measures the skills of a MySQL Cloud Specialist and introduces MySQL HeatWave, Oracle's high-performance analytics engine for MySQL. It includes provisioning, migrating existing MySQL databases to HeatWave, and working with its analytical and machine-learning capabilities. It also covers day-to-day operational activities within the MySQL HeatWave environment.

1z0-1093-25 Reliable Test Forum, New 1z0-1093-25 Real Exam

Our product boasts many advantages and varied functions to make your learning relaxing and efficient. The client can have a free download and tryout of our 1z0-1093-25 exam torrent before they purchase our product and can download our study materials immediately after the client pay successfully. 1z0-1093-25 exam question provides the free update and the discounts for the old client and our experts check whether our test bank has been updated on the whole day and if there is the update the system will send the update automatically to the client. Thus you can have an efficient learning and a good preparation of the exam. It is believed that our 1z0-1093-25 latest question is absolutely good choices for you

Oracle Cloud Database Services 2025 Professional Sample Questions (Q74-Q79):

NEW QUESTION # 74

Which two statements accurately describe the relationship between Database Management and metrics collected in OCI Monitoring service?

- A. Database Management directly queries the database for detailed performance data and supplements it with metrics from the OCI Monitoring service.
- B. Database Management relies on custom metrics uploaded to OCI Monitoring by the user in order to provide its monitoring features.
- C. Database Management retrieves performance data exclusively from the OCI Monitoring service and does not directly query the database.
- D. Database Management's data collection is completely independent of the OCI Monitoring service.

Answer: A,D

Explanation:

B:Database Management directly queries the database to gather performance data, such as SQL performance and active session history. It also integrates with OCI Monitoring for infrastructure-level metrics like CPU, memory, and storage utilization.

C:Database Management can function independently of OCI Monitoring since it has its own data collection mechanisms.

Why the other options are incorrect:

* A:Database Management does not rely solely on OCI Monitoring.

* D:It does not require custom metrics from the user.

NEW QUESTION # 75

Which of the following DOES NOT directly contribute to the calculation of provisioned read capacity units (RCUs) required for a NoSQL Database Cloud Service table?

- A. Number of reads expected per second.
- B. Average record size being read.
- C. Data consistency requirements.
- **D. Complexity of the security roles defined on the table.**

Answer: D

Explanation:

RCU Calculation:

Read Capacity Units (RCUs) are determined based on data size (average record size), read frequency (number of reads per second), and consistency level (eventual vs. strong consistency). Complex security roles do not impact the calculation because they do not directly influence the amount of data read or the frequency of access.

Why the other options are correct:

* A:Larger record sizes increase RCU requirements.

* B:Higher read frequency demands more RCUs.

* D:Strong consistency requires more read operations compared to eventual consistency.

NEW QUESTION # 76

Which two requirements must be met before you can create an Exadata Database Service VM Cluster?

- **A. An Exadata Infrastructure resource must be created first.**
- B. A valid support identifier (SI) associated with the OCI account.
- C. A configured Exadata Cloud@Customer infrastructure.
- **D. A Virtual Cloud Network (VCN) with necessary subnets for client access and backups.**
- E. A configured Oracle Cloud Infrastructure (OCI) Vault and Key.

Answer: A,D

Explanation:

* B. VCN and Subnets:Exadata Database Service VM Clusters require a VCN to provide network connectivity for database instances, client access, and backups. Proper subnets are essential for this network setup.

* E. Exadata Infrastructure Resource:Before creating a VM Cluster, an Exadata Infrastructure resource must be provisioned. The VM Cluster resides within this infrastructure.

Why the other options are incorrect:

* A:OCI Vault and Key are used for encryption but not mandatory for VM Cluster creation.

* C:A valid SI is needed for support but not a technical requirement for VM cluster creation.

* D:Exadata Cloud@Customer is a separate service from Exadata Database Service.

NEW QUESTION # 77

You are tasked with monitoring the I/O performance of an Exadata Database Service (ExaDB) using the exadcli utility. You need to retrieve detailed statistics on Smart Flash Cache usage, including read and write operations, at the storage cell level. Which exadcli command will provide the most comprehensive information?

- A. `exadcli list metriccurrent -cell -metricname "cell.*"`
- **B. `exadcli list metricdetail -cell -metricname "flashcache.*"`**

- C. `exadcli list metriccurrent -cell -metricname "IOPS,MBPS"`
- D. `exadcli list metrichistory -cell -metricname "flashcache_read_iops,flashcache_write_iops"`

Answer: B

Explanation:

Detailed Flash Cache Monitoring:

The command `exadcli list metricdetail -cell -metricname "flashcache.*"` provides a comprehensive overview of all metrics related to Smart Flash Cache. This includes both read and write operations, hit ratios, and IOPS statistics.

* The `metricdetail` option retrieves in-depth data, crucial for performance troubleshooting.

* The `flashcache.*` wildcard captures all relevant metrics associated with the Flash Cache subsystem.

Why the other options are incorrect:

* A: Limited to current IOPS and throughput, not specifically flash cache.

* C: Too broad, as it includes general cell metrics.

* D: Focuses only on historical read/write IOPS, not comprehensive.

NEW QUESTION # 78

During the provisioning of a Base Database Service (BaseDB) virtual machine (VM), what is the significance of the "Compute Shape" selection?

- A. It defines the CPU, memory, and network bandwidth allocated to the VM.
- B. It determines the maximum number of databases that can be created on the VM.
- C. It specifies the pre-installed database software version.
- D. It dictates the availability domain in which the VM will be created.

Answer: A

Explanation:

C: Defines CPU, memory, and network bandwidth:

* The `Compute Shape` specifies the resources allocated to the VM.

* Shapes vary in the number of OCPUs, amount of RAM, and network performance.

* Selecting an appropriate shape ensures the database has enough computational power and memory to meet workload demands.

Why the other options are incorrect:

* A. Number of databases: Limited by storage and resource capacity, not the shape itself.

* B. Availability domain: Chosen separately during provisioning.

* D. Pre-installed software version: The shape does not determine the database version.

NEW QUESTION # 79

.....

There are totally three versions of 1z0-1093-25 practice materials which are the most suitable versions for you: PDF, software and app versions. We promise ourselves and exam candidates to make these 1z0-1093-25 preparation prep top notch. So if you are in a dark space, our 1z0-1093-25 Study Guide can inspire you make great improvements. With the high pass rate of our 1z0-1093-25 learning engine as 98% to 100%, you can be confident and ready to pass the exam easily.
