Gott will, dass ich eine Person mit Fähigkeit, statt eine gute aussehende Puppe zu werden. Wenn ich IT-Branche wähle, habe ich dem Gott meine Fähigkeiten bewiesen. Aber der Gott ist mit nichts zufrieden. Er hat mich gezwungen, nach oben zu gehen. Die Oracle 1z0-1110-25 Zertifizierungsprüfung ist eine große Herausforderung in meinem Leben. So habe ich sehr hart gelernt. Aber das macht doch nichts, weil ich It-Pruefung die Fragenkataloge zur Oracle 1z0-1110-25 Zertifizierung gekauft habe. Mit ihr kann ich sicher die die Oracle 1z0-1110-25 Prüfung bestehen. Der Weg ist unter unseren Füßen, nur Sie können ihre Richtung entscheiden. Mit den Prüfungsmaterialien zur Oracle 1z0-1110-25 Prüfung von It-Pruefung können Sie sicher eine bessere Zukunft haben.

Die Fragenkataloge von It-Pruefung enthalten die Lernmaterialien und Simulationsfragen zur Oracle 1z0-1110-25 Zertifizierungsprüfung. Noch wichtiger bieten wir die originalen 1z0-1110-25 Fragen Und Antworten.

>> 1z0-1110-25 Praxisprüfung <<

1z0-1110-25 Prüfungsguide: Oracle Cloud Infrastructure 2025 Data Science Professional & 1z0-1110-25 echter Test & 1z0-1110-25 sicherlich-zu-bestehen

Jeder IT-Fachmann bemüht sich darum, entweder befördert zu werden oder ein höheres Gehalt zu beziehen. Das ist der Druck unserer Gesellschaft. Wir sollen uns mit unseren Fähigkeiten beweisen. Legen Sie bitte die Oracle 1z0-1110-25 Zertifizierungsprüfung ab. Eigentlich ist sie nicht so schwer wie man gedacht, solange Sie geeignete Dumps wählen. Die Dumps zur Oracle 1z0-1110-25 Zertifizierung von It-Pruefung sind die besten Dumps. Mit ihr können Sie etwas erzielen, wie Sie wollen.

Oracle 1z0-1110-25 Prüfungsplan:

Thema	Einzelheiten

Thema 1	• Create and Manage Projects and Notebook Sessions: This part assesses the skills of Cloud Data Scientists and focuses on setting up and managing projects and notebook sessions within OCI Data Science. It also covers managing Conda environments, integrating OCI Vault for credentials, using Git-based repositories for source code control, and organizing your development environment to support streamlined collaboration and reproducibility.
Thema 2	• OCI Data Science - Introduction & Configuration: This section of the exam measures the skills of Machine Learning Engineers and covers foundational concepts of Oracle Cloud Infrastructure (OCI) Data Science. It includes an overview of the platform, its architecture, and the capabilities offered by the Accelerated Data Science (ADS) SDK. It also addresses the initial configuration of tenancy and workspace setup to begin data science operations in OCI.
Thema 3	• Apply MLOps Practices: This domain targets the skills of Cloud Data Scientists and focuses on applying MLOps within the OCI ecosystem. It covers the architecture of OCI MLOps, managing custom jobs, leveraging autoscaling for deployed models, monitoring, logging, and automating ML workflows using pipelines to ensure scalable and production-ready deployments.
Thema 4	• Use Related OCI Services: This final section measures the competence of Machine Learning Engineers in utilizing OCI-integrated services to enhance data science capabilities. It includes creating Spark applications through OCI Data Flow, utilizing the OCI Open Data Service, and integrating other tools to optimize data handling and model execution workflows.
Thema 5	• Implement End-to-End Machine Learning Lifecycle: This section evaluates the abilities of Machine Learning Engineers and includes an end-to-end walkthrough of the ML lifecycle within OCI. It involves data acquisition from various sources, data preparation, visualization, profiling, model building with open-source libraries, Oracle AutoML, model evaluation, interpretability with global and local explanations, and deployment using the model catalog.

Oracle Cloud Infrastructure 2025 Data Science Professional 1z0-1110-25 Prüfungsfragen mit Lösungen (Q68-Q73):

68. Frage

What is a common maxim about data scientists?

- A. They spend 80% of their time analyzing data and 20% finding and preparing it.
- **B. They spend 80% of their time finding and preparing data and 20% analyzing it.**
- C. They spend 80% of their time on failed analytics projects and 20% doing useful work.

Antwort: B

Begründung:

Detailed Answer in Step-by-Step Solution:

* Objective: Identify a widely accepted maxim about data scientists' time allocation.

* Understand Data Science Workflow: Involves data collection, preparation, and analysis-time distribution is key.

* Evaluate Options:

* A: 80% on finding/preparing, 20% analyzing-Reflects the data wrangling challenge.

* B: 80% analyzing, 20% finding/preparing-Inverts the common perception.

* C: 80% on failed projects, 20% useful-Pessimistic, not a standard maxim.

* Reasoning: Industry consensus (e.g., "80/20 rule") emphasizes data prep as the bulk of effort due to messy real-world data.

* Conclusion: A is correct.

OCI Data Science documentation aligns with industry norms: "Data scientists typically spend 80% of their time finding, cleaning, and preparing data, and 20% on analysis and modeling, due to the complexity of raw data." B reverses this, and C isn't supported-only A reflects this widely cited maxim from sources like Forbes and OCI's practical guidance.

Oracle Cloud Infrastructure Data Science Documentation, "Data Science WorkflowOverview".

69. Frage

Which statement accurately describes an aspect of machine learning models?

- A. Static predictions become increasingly accurate over time.
- **B. Model performance degrades over time due to changes in data.**
- C. Data models are more static and generally require fewer updates than software code.
- D. A high-quality model will not need to be retrained as new information is received.

Antwort: B

Begründung:

Detailed Answer in Step-by-Step Solution:

* Objective: Find a true statement about ML models.

* Evaluate Options:

* A: True-Data drift (changes in data distribution) degrades performance over time.

* B: False-Static predictions don't improve without retraining.

* C: False-Models need updates as data changes, unlike static software.

* D: False-Even high-quality models require retraining with new data.

* Reasoning: A reflects the reality of data drift, a common ML challenge.

* Conclusion: A is correct.

OCI documentation notes: "Model performance can degrade over time due to data drift, where the underlying data distribution changes, necessitating monitoring and retraining." B, C, and D contradict this-static predictions don't improve (B), models aren't static (C), and retraining is needed (D). A is the accurate aspect.

Oracle Cloud Infrastructure Data Science Documentation, "Model Monitoring and Drift".

70. Frage

Which of these options allow the sharing and loading back of ML models into a notebook session?

- **A. Model catalog**
- B. Model taxonomy
- C. Model provenance
- D. Model deployment

Antwort: A

Begründung:

Detailed Answer in Step-by-Step Solution:

* Objective: Identify the mechanism for sharing and reloading ML models in OCI Data Science.

* Evaluate Options:

* A. Model provenance: Tracks model origin-informative but not a sharing mechanism.

* B. Model taxonomy: Categorizes models (e.g., regression)-not for sharing/loading.

* C. Model deployment: Makes models accessible as endpoints, not for notebook reloading.

* D. Model catalog: Stores models and artifacts, enabling sharing and loading into sessions.

* Reasoning: The Model Catalog is OCI's centralized repository for saving, sharing, and retrieving models (e.g., via ADS SDK).

* Conclusion: D is the correct tool.

The OCI Model Catalog "enables data scientists to save trained models and their artifacts, share them with team members, and load them back into notebook sessions for further use or evaluation." Provenance (A) and taxonomy (B) are metadata, while deployment (C) serves inference, not notebook access. D is explicitly designed for this purpose.

Oracle Cloud Infrastructure Data Science Documentation, "Model Catalog Usage".

71. Frage

As a data scientist, you create models for cancer prediction based on mammographic images. The correct identification is very crucial in this case. After evaluating two models, you arrive at the following confusion matrix. Which model would you prefer and why?

* Model 1 has Test accuracy is 80% and recall is 70%

* Model 2 has Test accuracy is 75% and recall is 85%

- A. Model 1, because the test accuracy is high
- **B. Model 2, because recall has more impact on predictions in this use case**
- C. Model 1, because recall has lesser impact on predictions in this use case

- D. Model 2, because recall is high

Antwort: B

Begründung:

Detailed Answer in Step-by-Step Solution:

- * Objective: Choose the better model for cancer prediction based on metrics.
- * Understand Metrics:
- * Accuracy: Overall correct predictions.
- * Recall: True positives / (True positives + False negatives)-crucial for cancer (minimizing misses).
- * Context: Cancer prediction prioritizes recall-false negatives (missed cancers) are critical.
- * Evaluate Models:
- * Model 1: 80% accuracy, 70% recall-Misses more cancers.
- * Model 2: 75% accuracy, 85% recall-Misses fewer cancers.
- * Evaluate Options:
- * A: High recall-True, but lacks context.
- * B: High accuracy-Misses recall's importance.
- * C: Recall's impact-Correct for cancer use case-best.
- * D: Lesser recall impact-Incorrect for this priority.
- * Reasoning: C emphasizes recall's critical role-aligns with medical needs.
- * Conclusion: C is correct.

OCI documentation advises: "For critical predictions like cancer detection, prioritize recall (e.g., Model 2 at 85%) over accuracy (Model 1 at 80%) to minimize false negatives, as missing cases has severe consequences (C)." A is partial, B overlooks context, D reverses priority-only C fits OCI's ML evaluation guidance for this scenario.
Oracle Cloud Infrastructure Data Science Documentation, "Evaluating Classification Models".

72. Frage

You are given a task of writing a program that sorts document images by language. Which Oracle AI Service would you use?

- A. OCI Vision
- **B. OCI Language**
- C. OCI Speech
- D. Oracle Digital Assistant

Antwort: B

Begründung:

Detailed Answer in Step-by-Step Solution:

- * Objective: Select an OCI AI service to sort images by language.
- * Evaluate Options:
- * A: Digital Assistant-Chatbots, not image/language processing.
- * B: Vision-Image analysis (e.g., object detection), not language sorting.
- * C: Speech-Audio-to-text, not image-based.
- * D: Language-Text analysis (e.g., language detection) after OCR-correct.
- * Reasoning: Images need OCR (Vision) then language detection (Language)-D fits the sorting task.
- * Conclusion: D is correct.

OCI Language "detects and classifies languages in text," often paired with OCI Vision's OCR to process document images. Vision (B) extracts text, but Language (D) sorts by language-Digital Assistant (A) and Speech (C) don't apply. Documentation supports this workflow.

Oracle Cloud Infrastructure Language Documentation, "Language Detection".

73. Frage
