Exam 1Z0-1111-25 Passing Score, Pass4sure 1Z0-1111-25 Dumps Pdf

As we know, if you can obtain the job qualification 1Z0-1111-25 certificate, which shows you have acquired many skills. In this way, your value is greatly increased in your company. Then sooner or later you will be promoted by your boss. Our 1Z0-1111-25 Preparation exam really suits you best for your requirement. We have been considered to be the best friend for helping numerous of our customers successfully get their according 1Z0-1111-25 certification.

Oracle Cloud Infrastructure 2025 Observability Professional Sample Questions (Q22-Q27):

NEW QUESTION # 22

Which of the following is required to enable Stack Monitoring?

- A. Machine Learning group for resource associations
- B. User group for VCN collection

- C. Dynamic group for discovery service

Answer: C

Explanation:

To enable Stack Monitoring:

Dynamic group for discovery service (A): A dynamic group defines resources (e.g., compute instances) that Stack Monitoring can discover and monitor. A policy granting permissions to this group is also required.

Why not B or C?

Machine Learning group (B): Not a valid OCI concept for Stack Monitoring.

User group for VCN collection (C): User groups manage human access, not service discovery.

This setup ensures Stack Monitoring can access and monitor resources.

NEW QUESTION # 23

Which response contains rich information to process for analytics?

- A. Database Audit Logs
- B. Entity types
- C. Logging Analytic Entities
- D. Log Sources

Answer: A

Explanation:

For analytics, the data source must provide detailed, actionable information.

Database Audit Logs (C): These logs contain rich data like user actions, SQL queries, timestamps, and security events, making them ideal for performance, security, and compliance analysis in Logging Analytics.

Why not A, B, or D?

Entity types (A): These are metadata definitions, not data for analytics.

Log Sources (B): These are configurations for log parsing, not the logs themselves.

Logging Analytic Entities (D): Entities are resource representations, not the data content.

Database Audit Logs offer the depth needed for meaningful insights.

NEW QUESTION # 24

What is the purpose of using Resolution in a Monitoring Query Language expression?

- A. Resolution defines the start time of each time window
- B. Resolution automatically resolves the alarm which is Firing state
- C. Resolution is used with suppression to pause alarm during system maintenance
- D. Resolution controls the total length of each time window

Answer: D

Explanation:

In OCI Monitoring's Monitoring Query Language (MQL), Resolution affects data aggregation:

Resolution controls the total length of each time window (A): It specifies the time interval (e.g., 1m for 1 minute) over which metric data is aggregated (e.g., averaged, summed), determining query granularity.

Why not B, C, or D?

B: Start time is set by the query's time range, not Resolution.

C: Resolution doesn't affect alarm states; that's a separate mechanism.

D: Suppression is an alarm feature, unrelated to Resolution.

Resolution fine-tunes metric analysis precision.

NEW QUESTION # 25

In Application Performance Monitoring (APM), a distributed tracing user initiates a request through a browser. What is the first span called?

- A. Trace ID

- B. Ajax call
- C. Root span

Answer: C

Explanation:

In distributed tracing within OCI APM:

Root span (C): The first span in a trace, representing the entry point of a user request (e.g., an HTTP request from a browser). It has no parent span and initiates the chain of subsequent spans across services.

Why not A or B?

Ajax call (A): A type of request, not a span term.

Trace ID (B): A unique identifier for the entire trace, not a span.

The root span is foundational to tracing a request's journey.

NEW QUESTION # 26

Which of the following statements is NOT valid regarding Management Agent Cloud Service?

- A. Management Agent Cloud Service is self-monitored.
- B. Management Agent Cloud Service transports customer data to Logging Analytics, OCI Monitoring, or even a custom endpoint hosted in OCI.
- C. Management Agent Cloud Service allows OCI services to collect data from on-premises and cloud assets, except that it can only transport data into AWS or GCS.
- D. Management Agent Cloud Service enables on-demand execution of operations against monitored resources.

Answer: C

Explanation:

The Management Agent Cloud Service collects and transports data from resources to OCI services. Let's evaluate:

Invalid statement: Can only transport data into AWS or GCS (A): This is false. Management Agents transport data to OCI services (e.g., Logging Analytics, Monitoring) or custom OCI endpoints, not AWS or Google Cloud Storage (GCS).

Why B, C, and D are valid:

Self-monitored (B): Agents monitor their own health and report to OCI.

Transports to OCI services (C): Supports Logging Analytics, Monitoring, and custom OCI endpoints.

On-demand operations (D): Allows tasks like metric collection or log uploads on demand.

Management Agents are OCI-centric, not limited to external clouds.

NEW QUESTION # 27

.....

Before clients purchase our Oracle Cloud Infrastructure 2025 Observability Professional test torrent they can download and try out our product freely to see if it is worthy to buy our product. You can visit the pages of our product on the website which provides the demo of our 1Z0-1111-25 study torrent and you can see parts of the titles and the form of our software. On the pages of our 1Z0-1111-25 study tool, you can see the version of the product, the updated time, the quantity of the questions and answers, the characteristics and merits of the product, the price of our product, the discounts to the client, the details and the guarantee of our 1Z0-1111-25 study torrent, the methods to contact us, the evaluations of the client on our product, the related exams and other information about our Oracle Cloud Infrastructure 2025 Observability Professional test torrent.
