Success in the Oracle Cloud Infrastructure 2025 Observability Professional (1Z0-1111-25) certification exam helps people update their skills. Many aspirants don't find updated Oracle 1Z0-1111-25 practice test questions and fail the final test. This failure in the Oracle 1Z0-1111-25 Exam leads to a loss of money and time. If you are also planning to attempt the Oracle Cloud Infrastructure 2025 Observability Professional (1Z0-1111-25) exam and are confused about where to prepare yourself for it then you are at the right place.

You are lucky to be here with our 1Z0-1111-25 training materials for we are the exact vendor who devote ourselves to produce the best 1Z0-1111-25 exam questions and helping our customers successfully get their dreaming certification of 1Z0-1111-25 Real Exam. We own the first-class team of professional experts and customers' servers concentrating on the improvement of our 1Z0-1111-25 study guide. So your success is guaranteed.

Best 1Z0-1111-25 Preparation Materials, 1Z0-1111-25 Reliable Learning Materials

For offline practice, our Oracle Cloud Infrastructure 2025 Observability Professional (1Z0-1111-25) desktop practice test software is ideal. This Oracle Cloud Infrastructure 2025 Observability Professional (1Z0-1111-25) software runs on Windows computers. The Oracle Cloud Infrastructure 2025 Observability Professional (1Z0-1111-25) web-based practice exam is compatible with all browsers and operating systems. No software installation is required to go through the web-based Oracle Cloud Infrastructure 2025 Observability Professional (1Z0-1111-25) practice test.

Oracle Cloud Infrastructure 2025 Observability Professional Sample Questions (Q11-Q16):

NEW QUESTION # 11

Which two are use cases of Oracle Cloud Infrastructure (OCI) Events Service? (Choose two.)

- A. Perform configuration management for deploying, configuring, and managing servers
- **B. Process files when they are uploaded in an Object Storage bucket**
- **C. Perform cleanup tasks when an OCI resource is terminated**
- D. Migrate Events generated by OCI resources from a Source to Target services

Answer: B,C

Explanation:

The OCI Events Service enables event-driven automation by reacting to changes in OCI resources. Two valid use cases are: Process files when they are uploaded in an Object Storage bucket (A): You can create an event rule to trigger an action (e.g., invoking an Oracle Function) when an object is created (com.oraclecloud.objectstorage.createobject). The function could process the file (e.g., image resizing).

Perform cleanup tasks when an OCI resource is terminated (B): An event rule can detect resource termination (e.g., com.oraclecloud.computeapi.terminateinstance.end) and trigger a function to clean up associated resources (e.g., delete volumes). Why not C or D?

Migrate Events (C): Events Service doesn't "migrate" events; it triggers actions. Migration is more aligned with Service Connector Hub.

Configuration management (D): This is handled by services like Resource Manager or Ansible, not Events Service.

These use cases showcase the service's ability to automate workflows based on resource state changes.

NEW QUESTION # 12

You are part of the Cloud Operations team managing thousands of compute instances running in Oracle Cloud Infrastructure (OCI). The OCI Logging Service is configured to collect logs from these instances using a Unified Monitoring Agent. A requirement has been created to archive logging data into OCI Object Storage. Which OCI capability can help you achieve this requirement?

- A. ObjectCollectionRule
- B. IAM policy
- C. Logging Query
- **D. Service Connector**

Answer: D

Explanation:

To archive logs from OCI Logging Service to Object Storage, an automated data movement solution is needed:

Service Connector (A): Part of Service Connector Hub, this capability moves data between OCI services. A Service Connector can be configured with Logging as the source and Object Storage as the target, automatically transferring logs based on filters (e.g., log level) or schedules.

Why not B, C, or D?

ObjectCollectionRule (B): Used in Logging Analytics to ingest logs from Object Storage, not archive to it.

IAM policy (C): Governs permissions but doesn't perform data movement.

Logging Query (D): Analyzes logs within Logging Service, not for archiving.

Service Connector ensures seamless, scalable log archiving.

NEW QUESTION # 13

What are two examples of a Stack Monitoring deployment model? (Choose two.)

- A. Resources running on Management Gateway
- **B. Resources running on OCI compute instances**
- C. Resources running on a network appliance
- **D. Resources running on-premises**

Answer: B,D

Explanation:

Stack Monitoring monitors application stacks across environments:

Resources running on OCI compute instances (B): Monitors components (e.g., WebLogic, databases) on OCI VMs using Management Agents.

Resources running on-premises (D): Tracks on-premises resources (e.g., Oracle Databases) via Enterprise Manager Bridge or agents.

Why not A or C?

A: Management Gateway is a proxy, not a resource host.

C: Network appliances aren't typical Stack Monitoring targets.

These models cover cloud and on-premises stacks.

NEW QUESTION # 14

Your team has been tasked with debugging a Cloud Native application developed using the following Oracle Cloud Infrastructure (OCI) services: Object Storage, Events, Functions, API Gateway, and Autonomous Database. Which of these is NOT a valid option for troubleshooting issues in OCI?

- A. View service metric information from the OCI Monitoring service.
- B. Configure a Service Connector to automatically send logs into the OCI Logging Analytics service.
- C. Configure the application to send logs into OCI Logging service.
- **D. Leverage OCI Cloud Guard to extract and visualize debug logs generated by your application.**
- E. Trace performance issues in OCI Application Performance Monitoring service by enabling Function traces.

Answer: D

Explanation:

Troubleshooting a cloud-native app leverages OCI observability tools:

Invalid: Leverage OCI Cloud Guard to extract and visualize debug logs (D): Cloud Guard is a security posture management and threat detection service, not designed for extracting or visualizing application debug logs.

Why A, B, C, and E are valid:

A: Monitoring provides service metrics (e.g., Function invocation latency).

B: Service Connector moves logs to Logging Analytics for analysis.

C: APM traces Functions performance issues.

E: Logging Service collects app logs directly.

Cloud Guard focuses on security, not debugging.

NEW QUESTION # 15

You have configured an Alarm Definition in the Oracle Cloud Infrastructure (OCI) Monitoring service to send notifications through email. The alarm should resend notifications at specified intervals if the alarm continues to be in the firing state. A subscriber in the Notifications Topic complains about not receiving multiple emails upon failures. Which of the following could be the possible cause of this issue?

- A. Trigger Condition was not configured while defining the Alarm.
- B. OCI Monitoring service can send only one notification per Alarm Definition when the alarm condition is met.
- C. Resending notifications depends on the total metric streams returned from the query.
- **D. Repeat notification was not enabled while creating the Alarm.**

Answer: D

Explanation:

For repeated notifications in OCI Monitoring:

Repeat notification was not enabled while creating the Alarm (B): The "Repeat Notification" option must be enabled in the alarm definition, specifying an interval (e.g., every 5 minutes). If disabled, only one notification is sent when the alarm fires, explaining the subscriber's issue.

Why not A, C, or D?

A: False; OCI supports repeat notifications if configured.

C: Trigger condition is mandatory for any alarm; this isn't the issue.

D: Notification frequency isn't tied to metric streams, only the repeat setting.

Repeat Notification ensures ongoing alerts.

NEW QUESTION # 16

.....

Maybe you are determined to pass the 1Z0-1111-25 exam, but if you want to study by yourself, the efficiency of going it alone is very low, and it is easy to go to a dead end. You really need a helper. Take a look at the development of 1Z0-1111-25 Guide quiz and you will certainly be attracted to it. And you can just free download the demos to try it out. The advantages of 1Z0-1111-25 study materials are numerous and they are all you need!

Best 1Z0-1111-25 Preparation Materials: <https://www.certkingdompdf.com/1Z0-1111-25-latest-certkingdom-dumps.html>

Oracle 1Z0-1111-25 Valid Exam Test For busy workers, you can make the best of your time on railway or bus, mastering one question and answers every time will be great, Oracle 1Z0-1111-25 Valid Exam Test Assessment records are saved for easy tracking. Get access to our testing engine and have a number of practice exams that are far more valuable than APP files offered by 1Z0-1111-25 exam vendor, Oracle 1Z0-1111-25 Valid Exam Test You will stop worrying when you read this entry, because you have found the most authoritative professional provider of IT exam dumps.

With iMovie HD, you can import video from a video camera, Have you ever recorded 1Z0-1111-25 Exam Price a macro, For busy workers, you can make the best of your time on railway or bus, mastering one question and answers every time will be great.

100% Pass Quiz Professional Oracle - 1Z0-1111-25 Valid Exam Test

Assessment records are saved for easy tracking. Get access to our testing engine and have a number of practice exams that are far more valuable than APP files offered by 1Z0-1111-25 Exam vendor.

You will stop worrying when you read this entry, because 1Z0-1111-25 you have found the most authoritative professional provider of IT exam dumps, As to some exam candidate are desperately eager for useful 1Z0-1111-25 actual tests, our products help you and other customer who are having an acute shortage of efficient practice materials.
