1Z0-1114-25 Exam Review - 1Z0-1114-25 Exam Cram

We PDFDumps are built in years of 2010. Recent years we are offering reliable certification 1Z0-1114-25 exam torrent materials and gain new & old customers' praise based on our high pass rate. We put much emphasis on our 1Z0-1114-25 exam questions quality and we are trying to provide the best after-sale customer service on 1Z0-1114-25 training guide for buyers. If you are looking for professional & high-quality 1Z0-1114-25 preparation materials, you can trust us and choose our 1Z0-1114-25 study materials. Our 1Z0-1114-25 exam guide is able to help you clear exams at the first attempt.

Oracle 1Z0-1114-25 Exam Syllabus Topics:

Topic	Details
Topic 1	Designing and Developing Redwood Applications: This section measures the skills of Redwood Application Developers and Product Designers in designing and developing applications using Redwood patterns, templates, and components. It focuses on utilizing Redwood page templates, exploring specifications through the Redwood Reference Application, and building applications that align with Oracle's Redwood design system.

Topic 2	Configuring Oracle Fusion Cloud Extensions with Visual Builder Studio: This section evaluates the expertise of Fusion Application Developers and Cloud Extension Specialists in using Oracle Visual Builder Studio (VBS) as a development platform for creating and modifying Oracle SaaS applications. It covers extending existing SaaS pages, creating new Redwood pages or apps for SaaS data, and building mashup applications that integrate SaaS and external data sources.
Topic 3	Developing Fusion Apps with Visual Builder Studio: This section tests the knowledge of Fusion App Developers and Development Operations Engineers in leveraging Visual Builder Studio features. It includes configuring service connections, managing code with Git repositories, handling branches and merge requests, and managing builds, pipelines, and deployments to streamline application development workflows.
Topic 4	The Redwood Experience: This section of the exam measures the skills of UX Designers and Application Developers in understanding the need for a modern applications platform. It explains the building blocks of Oracle's Redwood design system, focusing on its role in delivering a consistent and intuitive user experience across applications.

Oracle Redwood Application 2025 Developer Associate Sample Questions (Q25-Q30):

NEW QUESTION # 25

Dave deployed an AppUI extension to an instance by mistake. How can he fix this?

- A. The extension can be redeployed by opening a service request
- B. The extension cannot be deleted once deployed
- C. The extension can be undeployed in the Visual Builder Studio's Environment tab
- D. The extension will be removed in the next quarterly update of Fusion Cloud Apps

Answer: C

Explanation:

Full Detailed in Depth Explanation:

In Visual Builder Studio, if an AppUI extension is deployed to a Fusion Apps instance by mistake, it can be undeployed using the Environment tab in VBS. This tab allows developers to manage deployments, including removing or rolling back extensions from specific instances (e.g., TEST or PROD). Option A is incorrect because quarterly updates don't automatically remove extensions—they're controlled by the developer. Option C is wrong as redeployment via a service request isn't the standard process; VBS provides self-service tools. Option D is false because VBS supports undeployment, making extensions reversible.

NEW QUESTION # 26

You are designing the UI to display information about a product and are asked to use the card layout, such that:

- * The card layout summarizes the available information about a product in a visually compact manner.
- * The card layout is used as an entry point from where users can access additional details.

Which card layout is suitable for the above requirements?

- A. Image Card
- B. Object Card
- C. Mini Card
- D. Scoreboard

Answer: B

Explanation:

Full Detailed in Depth Explanation:

Redwood offers various card layouts, each with specific use cases. The Object Card (Option A) is designed to summarize key information about an entity (e.g., a product) in a compact, visually appealing way while serving as an entry point to detailed views—perfectly matching the requirements. Mini Card (B) is too minimal for summarization, focusing on quick glances. Image Card (C) prioritizes visuals over data summary, and Scoreboard (D) is for metrics/KPIs, not product details.

NEW QUESTION # 27

Which business areas can benefit from Oracle Fusion Cloud Extensions with Visual Builder?

- A. Only the IT department
- B. None, as it is purely for entertainment purposes
- C. All business areas, regardless of their needs
- D. Any business area with specific application requirements

Answer: D

Explanation:

Full Detailed in Depth Explanation:

Fusion Cloud Extensions benefit areas with specific needs (D), not entertainment (A), all areas indiscriminately (B), or just IT (C).

NEW QUESTION # 28

The Redwood template your page is based on has a primary action button. How do you control what it does?

- A. You cannot. The functionality is determined by the original template
- B. Remove the existing button from the template and add your own
- C. Create an onAction action chain on that button
- D. Create an action chain mapped to the template's primary action event, at the template level

Answer: C

Explanation:

Full Detailed in Depth Explanation:

In VBS/Redwood, you control a button's behavior by attaching an onAction action chain (B). Templates aren't immutable (A), removal (C) is overkill, and D is less precise.

NEW QUESTION # 29

What is the correct sequence of steps to understand a problem while designing the Redwood Reference Application?

- A. Understand the problem, write user goals, describe the shape of data of your use case, gather feedback from product management and other stakeholders, and iterate until you achieve clarity
- B. Gather feedback from product management and other stakeholders, write user goals, describe the shape of data of your use case, understand the problem, and iterate until you achieve clarity
- C. Write user goals, describe the shape of data of your use case, understand the problem, gather feedback from product management and other stakeholders, and iterate until you achieve clarity
- D. Describe the shape of data of your use case, gather feedback from product management and other stakeholders, write user goals, understand the problem, and iterate until you achieve clarity

Answer: A

Explanation:

Full Detailed in Depth Explanation:

Redwood's design process starts with understanding the problem (C), followed by defining goals, data, feedback, and iteration. Other sequences (A, B, D) misalign with this logical flow.

NEW QUESTION # 30

.....

PDFDumps Oracle 1Z0-1114-25 Practice Test dumps can help you pass IT certification exam in a relaxed manner. In addition, if you first take the exam, you can use software version dumps. Because the SOFT version questions and answers completely simulate the actual exam. You can experience the feeling in the actual test in advance so that you will not feel anxious in the real exam. After you use the SOFT version, you can take your exam in a relaxed attitude which is beneficial to play your normal level.
