The ExamcollectionPass is one of the top-rated and trusted platforms that are committed to making the Oracle Redwood Application 2025 Developer Associate (1Z0-1114-25) certification exam journey successful. To achieve this objective ExamcollectionPass has hired a team of experienced and qualified Oracle 1Z0-1114-25 Exam trainers. They work together and put all their expertise to maintain the top standard of 1Z0-1114-25 practice test all the time.

Oracle 1Z0-1114-25 Exam Syllabus Topics:

| Topic | Details |
|---------|--|
| Topic 1 | <ul style="list-style-type: none">The Redwood Experience: This section of the exam measures the skills of UX Designers and Application Developers in understanding the need for a modern applications platform. It explains the building blocks of Oracle's Redwood design system, focusing on its role in delivering a consistent and intuitive user experience across applications. |
| Topic 2 | <ul style="list-style-type: none">Configuring Oracle Fusion Cloud Extensions with Visual Builder Studio: This section evaluates the expertise of Fusion Application Developers and Cloud Extension Specialists in using Oracle Visual Builder Studio (VBS) as a development platform for creating and modifying Oracle SaaS applications. It covers extending existing SaaS pages, creating new Redwood pages or apps for SaaS data, and building mashup applications that integrate SaaS and external data sources. |
| Topic 3 | <ul style="list-style-type: none">Designing and Developing Redwood Applications: This section measures the skills of Redwood Application Developers and Product Designers in designing and developing applications using Redwood patterns, templates, and components. It focuses on utilizing Redwood page templates, exploring specifications through the Redwood Reference Application, and building applications that align with Oracle's Redwood design system. |

| | |
|---------|--|
| Topic 4 | <ul style="list-style-type: none"> Developing Fusion Apps with Visual Builder Studio: This section tests the knowledge of Fusion App Developers and Development Operations Engineers in leveraging Visual Builder Studio features. It includes configuring service connections, managing code with Git repositories, handling branches and merge requests, and managing builds, pipelines, and deployments to streamline application development workflows. |

1Z0-1114-25 Valid Test Tips & New 1Z0-1114-25 Test Sample

The ExamcollectionPass is a leading platform that is committed to making the 1Z0-1114-25 exam dumps preparation simple, quick, and successful. To achieve this objective ExamcollectionPass is offering real, valid, and updated Oracle 1Z0-1114-25 practice questions in three different formats. These formats are ExamcollectionPass Oracle 1Z0-1114-25 PDF Dumps Files, desktop practice test software, and web-based practice test software. All these ExamcollectionPass Oracle Redwood Application 2025 Developer Associate exam questions formats are easy to use and compatible with all web browsers, operating systems, and devices.

Oracle Redwood Application 2025 Developer Associate Sample Questions (Q23-Q28):

NEW QUESTION # 23

What is the minimum and maximum number of steps that can be configured on a Guided Process?

- A. Minimum 1 and maximum 10
- B. Minimum 2 and maximum 25
- C. Minimum 4 and maximum 10
- D. Minimum 1 and maximum 50

Answer: D

Explanation:

Full Detailed in Depth Explanation:

The Guided Process template in Redwood (and VBS) allows users to configure a sequence of steps for task flows. The minimum is 1 step (a single task), and the maximum is 50 steps, providing flexibility for complex processes. Option B's maximum of 10 is too restrictive, Option C's minimum of 4 is incorrect, and Option D's maximum of 25 underestimates the capacity.

NEW QUESTION # 24

Which are the three out-of-the-box functionalities provided by Redwood for developing an application? (Choose three.)

- A. Responsiveness
- B. Telemetry and feedback
- C. Caching services
- D. Accessibility
- E. Localization

Answer: A,D,E

Explanation:

Full Detailed in Depth Explanation:

Redwood offers Localization (A), Responsiveness (C), and Accessibility (D) as core features. Caching (B) and Telemetry (E) are not standard out-of-the-box functionalities.

NEW QUESTION # 25

In which three cases would you need a Visual Builder service instance to deploy your app to? (Choose three.)

- A. When the app needs to be accessed by users who do not have Fusion Apps access

- B. For gaining access to an external database through a REST service requiring basic auth
- C. For gaining access to Oracle Fusion Apps REST services
- D. When there is an application that is accessible from a vanity URL (custom domain)
- E. For enabling the app to be integrated into the Fusion Cloud Apps menu

Answer: A,B,D

Explanation:

Full Detailed in Depth Explanation:

A Visual Builder (VB) service instance is a stand-alone runtime environment separate from Fusion Apps. Option A is correct because external users without Fusion access require a VB instance to host the app. Option B is valid as VB instances support REST integrations with external databases using basic authentication. Option C is accurate because vanity URLs are supported by VB instances for custom domains. Option D is incorrect because Fusion Apps REST services are typically accessed via AppUI extensions within Fusion, not a separate VB instance. Option E is wrong as integration into Fusion menus relies on AppUI extensions, not a stand-alone VB instance.

NEW QUESTION # 26

You created a page based on the Foldout layout template. How do you ensure that your customer can access it from a mobile phone?

- A. Develop a separate application for mobile devices with a different layout
- B. Do nothing. Responsive behavior will render the page properly on the device
- C. Add JavaScript to add responsive design to your page
- D. Switch to a new template that will fit into a mobile device size

Answer: B

Explanation:

Full Detailed in Depth Explanation:

Redwood templates, like Foldout, are inherently responsive (A), adapting to mobile devices without extra effort. Options B, C, and D are unnecessary.

NEW QUESTION # 27

What is the correct sequence of steps to understand a problem while designing the Redwood Reference Application?

- A. Understand the problem, write user goals, describe the shape of data of your use case, gather feedback from product management and other stakeholders, and iterate until you achieve clarity
- B. Write user goals, describe the shape of data of your use case, understand the problem, gather feedback from product management and other stakeholders, and iterate until you achieve clarity
- C. Describe the shape of data of your use case, gather feedback from product management and other stakeholders, write user goals, understand the problem, and iterate until you achieve clarity
- D. Gather feedback from product management and other stakeholders, write user goals, describe the shape of data of your use case, understand the problem, and iterate until you achieve clarity

Answer: A

Explanation:

Full Detailed in Depth Explanation:

Redwood's design process starts with understanding the problem (C), followed by defining goals, data, feedback, and iteration. Other sequences (A, B, D) misalign with this logical flow.

NEW QUESTION # 28

.....

To assimilate those useful knowledge better, many customers eager to have some kinds of 1Z0-1114-25 practice materials worth practicing. All content is clear and easily understood in our 1Z0-1114-25 practice materials. They are accessible with reasonable prices and various versions for your option. All content are in compliance with regulations of the 1Z0-1114-25 Exam. As long as you are determined to succeed, our 1Z0-1114-25 study guide will be your best reliance.
