Refreshing the data pipeline for a functional area allows you to bring in incremental data immediately. Often, administrators execute this refresh option for ad hoc data uploads.

Are there any issues you must consider while executing the refresh option?

- B. Yes; executing an on-demand data refresh while working on the data may cause temporary inconsistencies.
- C. Yes; executing an on-demand data fresh brings in all data from the initial extract date. Since it brings in all data, it takes longer to execute.
