Pdf 1z0-1118-23 Pass Leader, 1z0-1118-23 Latest Exam Labs

We provide updated and real Oracle 1z0-1118-23 exam questions that are sufficient to clear the Oracle Cloud Fusion Analytics Warehouse 2023 Implementation Professional (1z0-1118-23) exam in one go. The product of SurePassExams is created by seasoned professionals and is frequently updated to reflect changes in the content of the 1z0-1118-23 Exam Questions.

Oracle Cloud Fusion Analytics Warehouse 2023 Implementation Professional Sample Questions (Q46-Q51):

NEW QUESTION # 46

During the creation of the FAW instance, you have to provide the Fusion Application connection details and authentication information.

Which method of authentication is recommended by Oracle?

- **A. JSON Web Token**
- B. Password-based
- C. Multi-factor authentication

Answer: A

Explanation:

Explanation

JSON Web Token (JWT) is the recommended method of authentication by Oracle for creating the FAW instance. JWT is a secure and self-contained way of transmitting information between parties as a JSON object. It is used to assert some number of claims

NEW QUESTION # 47

What is the typical use case of the Promote Objects feature?

- **A. To move your customization from one environment to another, such as from development to production to production**
- B. To replicate one instance to another
- C. To check the validity of your customization

Answer: A

Explanation:

Explanation

The typical use case of the Promote Objects feature is to move your customization from one environment to another, such as from development to production. The Promote Objects feature allows you to export and import your customizations of the semantic model, security configurations, and KPIs between different instances of FAW4. The Promote Objects feature is not used to check the validity of your customization or to replicate one instance to another.

NEW QUESTION # 48

You are in the process of implementing complex data security.

How would you secure your Fact table using data filters from different dimensions?

- A. Create multi-table data sets in OAC and create a custom report.
- **B. Use functional groups to combine the data filters using the OR and AND operators.**
- C. Currently, this scenario is not supported.

Answer: B

Explanation:

Explanation

The way that you would secure your Fact table using data filters from different dimensions is to use functional groups to combine the data filters using the OR and AND operators. Functional groups are logical groups of dimensions that can be used to apply data filters on a Fact table. You can use functional groups to specify complex filter criteria that involve multiple dimensions and operators³. You do not need to create multi-table data sets in OAC or accept that this scenario is not supported.

NEW QUESTION # 49

Refreshing the data pipeline for a functional area allows you to bring in incremental data immediately. Often, administrators execute this refresh option for ad hoc data uploads.

Are there any issues you must consider while executing the refresh option?

- A. Yes; executing an on-demand data refresh brings in all data from the initial extract date. Since it brings in all data, it takes longer to execute.
- B. No; executing an on-demand data refresh brings in incremental data. There are no issues/concerns to consider.
- **C. Yes; executing an on-demand data refresh while working on the data may cause temporary inconsistencies.**

Answer: C

Explanation:

Explanation

To perform data validation from the FAW console, you need to ensure that you have the same data security privileges in the FAW instance and the Oracle Transactional Business Intelligence (OTBI) instance. This will allow you to compare the metrics between the two instances and verify their accuracy. You do not need to have access to all data in the FAW instance or have the administrator privilege in the OTBI instance to perform data validation.

NEW QUESTION # 50

You are unable to locate some data elements in your FAW instance subject areas that exist in OTBI.

Which feature in FAW supports both data movement and semantic model extensibility to provide the missing data elements?

- A. Bundles
- B. OAC Data Flow
- C. Data Augmentation

Answer: C

Explanation:

Explanation

Data Augmentation is a feature in FAW that supports both data movement and semantic model extensibility to provide missing data elements. Data Augmentation allows you to extract data from additional data sources that are not part of the FAW data pipeline and load them into ADW. You can then use the data to customize the semantic model and create new dimensions, facts, and subject areas.

NEW QUESTION # 51

.....

1z0-1118-23 exam questions are being offered in three easy-to-use and compatible formats. The Oracle 1z0-1118-23 PDF dumps file, desktop practice test software, and web-based practice test software. All three 1z0-1118-23 Exam Questions format contain the Oracle 1z0-1118-23 actual questions and help you in 1z0-1118-23 exam preparation entirely.
