

# 1Z0-1122-25 Learning Materials | 1Z0-1122-25 Top Exam Dumps

P.S. Free & New 1Z0-1122-25 dumps are available on Google Drive shared by Pass4training: <https://drive.google.com/open?id=1Us09LEJJkko4UDM5EG3TAEjpfH3VGtx>

There are many benefits after you pass the 1Z0-1122-25 certification such as you can enter in the big company and double your wage. Our 1Z0-1122-25 study materials boost high passing rate and hit rate so that you needn't worry that you can't pass the test too much. We provide free tryout before the purchase to let you decide whether it is valuable or not by yourself. To further understand the merits and features of our 1Z0-1122-25 Practice Engine, you should try it first!

## Oracle 1Z0-1122-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>OCI Generative AI and Oracle 23ai: This section evaluates the skills of Cloud AI Architects in utilizing Oracle's generative AI capabilities. It includes a deep dive into OCI Generative AI services, Autonomous Database Select AI for enhanced data intelligence and Oracle Vector Search for efficient information retrieval in AI-driven applications.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Intro to OCI AI Services: This section tests the expertise of AI Solutions Engineers in working with OCI AI services and related APIs. It provides insights into key AI services such as language processing, computer vision, document understanding, and speech recognition, allowing professionals to leverage Oracle's AI ecosystem for building intelligent applications.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Intro to AI Foundations: This section of the exam measures the skills of AI Practitioners and Data Analysts in understanding the fundamentals of artificial intelligence. It covers key concepts, AI applications across industries, and the types of data used in AI models. It also explains the differences between artificial intelligence, machine learning, and deep learning, providing clarity on how these technologies interact and complement each other.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>Intro to Generative AI &amp; LLMs: This section tests the abilities of AI Developers to understand generative AI and large language models. It introduces the principles of generative AI, explains the fundamentals of large language models (LLMs), and discusses the core workings of transformers, prompt engineering, instruction tuning, and LLM fine-tuning for optimizing AI-generated content.</li></ul>
Topic 5	<ul style="list-style-type: none"><li>Intro to ML Foundations: This section evaluates the knowledge of Machine Learning Engineers in understanding machine learning principles and methodologies. It explores the basics of supervised learning, focusing on regression and classification techniques, along with unsupervised learning methods such as clustering and anomaly detection. It also introduces reinforcement learning fundamentals, helping professionals grasp the different approaches used to train AI models.</li></ul>

Topic 6	<ul style="list-style-type: none"> <li>Intro to DL Foundations: This section assesses the expertise of Deep Learning Engineers in understanding deep learning frameworks and architectures. It covers fundamental concepts of deep learning, introduces convolutional neural networks (CNN) for image processing, and explores sequence models like recurrent neural networks (RNN) and long short-term memory (LSTM) networks for handling sequential data.</li> </ul>

## 1Z0-1122-25 practice braindumps & 1Z0-1122-25 test prep cram

Do you want to pass the exam with the least time? If you do, you can choose us, we can do that for you. 1Z0-1122-25 exam cram is high-quality, and it can help you pass the exam just one time. You just need to spend about 48 to 72 hours on practicing that you can pass the exam. Besides, you can obtain the download link and password within ten minutes after payment for 1Z0-1122-25 Training Materials. In order to make you get the latest information for 1Z0-1122-25 training materials, we offer you free update for one year after buying, and the latest version for 1Z0-1122-25 exam materials will be sent to your email automatically.

## Oracle Cloud Infrastructure 2025 AI Foundations Associate Sample Questions (Q32-Q37):

### NEW QUESTION # 32

What is the difference between classification and regression in Supervised Machine Learning?

- A. Classification predicts continuous values, whereas regression assigns data points to categories.
- B. Classification assigns data points to categories, whereas regression predicts continuous values.
- C. Classification and regression both predict continuous values.
- D. Classification and regression both assign data points to categories.

**Answer: B**

Explanation:

In supervised machine learning, the key difference between classification and regression lies in the nature of the output they predict. Classification algorithms are used to assign data points to one of several predefined categories or classes, making it suitable for tasks like spam detection, where an email is classified as either "spam" or "not spam." On the other hand, regression algorithms predict continuous values, such as forecasting the price of a house based on features like size, location, and number of rooms. While classification answers "which category?" regression answers "how much?" or "what value?"

### NEW QUESTION # 33

Which statement best describes the relationship between Artificial Intelligence (AI), Machine Learning (ML), and Deep Learning (DL)?

- A. AI, ML, and DL are entirely separate fields with no overlap.
- B. DL is a subset of AI, and ML is a subset of DL.
- C. ML is a subset of AI, and DL is a subset of ML.
- D. AI is a subset of DL, which is a subset of ML.

**Answer: C**

Explanation:

Artificial Intelligence (AI) is the broadest field encompassing all technologies that enable machines to perform tasks that typically require human intelligence. Within AI, Machine Learning (ML) is a subset focused on the development of algorithms that allow systems to learn from and make predictions or decisions based on data. Deep Learning (DL) is a further subset of ML, characterized by the use of artificial neural networks with many layers (hence "deep").

In this hierarchy:

AI includes all methods to make machines intelligent.

ML refers to the methods within AI that focus on learning from data.

DL is a specialized field within ML that deals with deep neural networks.

### NEW QUESTION # 34

How does Oracle Cloud Infrastructure Document Understanding service facilitate business processes?

- A. By automating data extraction from documents
- B. By generating lifelike speech from documents
- C. By transcribing spoken language
- D. By analyzing sentiment in text documents

**Answer: A**

Explanation:

Explanation:

### NEW QUESTION # 35

What is the primary benefit of using the OCI Language service for text analysis?

- A. It provides image processing capabilities.
- B. It requires extensive machine learning expertise to use.
- C. It allows for text analysis at scale without machine learning expertise.
- D. It only works with structured data.

**Answer: C**

Explanation:

The primary benefit of using the OCI Language service for text analysis is its ability to scale text analysis without requiring users to have extensive machine learning expertise. The service abstracts the complexities of machine learning, allowing businesses to easily process and analyze large amounts of text data through pre-built models. This accessibility makes it possible for a broader range of users to leverage advanced text analysis capabilities, facilitating insights from textual data without needing to develop and train models from scratch.

### NEW QUESTION # 36

What is a key advantage of using dedicated AI clusters in the OCI Generative AI service?

- A. They allow access to unlimited database resources.
- B. They provide faster internet connection speeds.
- C. They are free of charge for all users.
- D. They provide high performance compute resources for fine-tuning tasks.

**Answer: D**

Explanation:

The primary advantage of using dedicated AI clusters in the Oracle Cloud Infrastructure (OCI) Generative AI service is the provision of high-performance compute resources that are specifically optimized for fine-tuning tasks. Fine-tuning is a critical step in the process of adapting pre-trained models to specific tasks, and it requires significant computational power. Dedicated AI clusters in OCI are designed to deliver the necessary performance and scalability to handle the intense workloads associated with fine-tuning large language models (LLMs) and other AI models, ensuring faster processing and more efficient training.

### NEW QUESTION # 37

.....

Developing your niche is very easy in the presence of the 1Z0-1122-25 dumps. The credentials are not very difficult to achieve because like 1Z0-1122-25 the acclaimed vendors are highly successful in the industry. If you need a boost in your career, then Pass4training is the site you have to opt for taking 1Z0-1122-25 Certification exams. Some of the vital features of the 1Z0-1122-25 dumps of Pass4training are given below. 1Z0-1122-25 dumps are the most verified and authentic braindumps that are used to pass the 1Z0-1122-25 certification exam. The whole 1Z0-1122-25 study material is approved by the expert.
