- C. Building and testing custom guides

**Answer: A**

### NEW QUESTION # 65

In the Refine phase, what is the Project Manager responsible for?

- A. Creating a project plan and timeline
- B. Publishing OGL in the production environment
- C. Building and testing custom guides

**Answer: A**

Explanation:

In the Refine phase, the Project Manager is responsible for creating a project plan and timeline (option A) to guide content optimization and final preparations for deployment. This phase focuses on refining content and processes, requiring a structured plan to coordinate testing, feedback integration, and sign-off. Publishing OGL in production (option B) occurs in the Publish phase, not Refine, while building and testing guides (option C) is typically handled by OGL Content Developers. The Project Manager's role here is strategic, ensuring all activities align with deadlines and objectives, making the plan and timeline foundational to Refine-phase success.

#### NEW QUESTION # 66

Which types of applications use JavaScript to enable OGL?

- A. Fusion applications
- **B. Non-Fusion and third-party applications**
- C. Oracle applications

**Answer: B**

Explanation:

Non-Fusion and third-party applications rely on JavaScript to integrate and enable OGL functionality, as they lack the native integration of Fusion applications. Fusion (option A) and broader Oracle applications (option B) typically use built-in mechanisms, not JavaScript alone.

#### NEW QUESTION # 67

Which phase includes the following key activities?

Understanding cloud application changes

Reviewing the OGL impact analysis

Preparing a coordinated testing strategy

- A. Update
- **B. Prepare**
- C. Test
- D. Publish

**Answer: B**

Explanation:

The Prepare phase includes understanding cloud application changes, reviewing the OGL impact analysis, and preparing a testing strategy (option C). This initial phase sets the stage for subsequent actions by assessing updates and planning responses. Update (option A) modifies content, Publish (option B) deploys it, and Test (option D) validates it—none encompass preparation. Prepare's proactive focus ensures teams are ready for the update cycle, aligning resources and strategies effectively.

#### NEW QUESTION # 68

What are recommended agenda items for the OGL kickoff?

- A. Focus on business outcomes, leverage best practices, and continuously improve.
- B. Start developing content, deploy OGL in production, and define Hypercare solutions
- **C. Get an overview of the OGL cloud service and implementation process, identify key roles and responsibilities, and review the training plan and digital learning assignments.**

**Answer: C**

Explanation:

The OGL kickoff agenda typically includes an overview of the cloud service and implementation process, identifying roles and responsibilities, and reviewing the training plan. These set the foundation for the project. Option A involves later-stage activities, and option C is too vague for a kickoff focus.
