NEW QUESTION # 60

For which type of documentation would you need a training needs analysis?

- A. Change Management

- B. Organizational Impact
- **C. Learning and Development**
- D. Cloud Application Implementation

Answer: C

NEW QUESTION # 61

Which activity might be included in an effective Hypercare strategy?

- A. Do not designate change champions.
- **B. Provide a clear base of operations for escalations.**
- C. Hide resources that might help end users.

Answer: B

Explanation:

Hypercare is the post-go-live support phase in OGL projects, aimed at stabilizing the system and addressing user issues swiftly. Providing a clear base of operations for escalations (option B) establishes a structured process for handling problems, ensuring support teams can respond effectively—a hallmark of an effective Hypercare strategy. Hiding resources (option A) contradicts support goals, and not designating change champions (option C) weakens advocacy and adoption, both being poor practices. Option B's focus on escalation clarity enhances user confidence and system reliability, making it the strategic choice for Hypercare success.

Fusion Security Roles (option B) is technical documentation, not change-focused.
