Oracle 1Z0-1126-1 Exam Syllabus Topics:

Topic	Details
Topic 1	Project Phase 1: Focus: This phase involves defining the OGL project plan, including governance structures that oversee implementation and ensure alignment with business objectives. OGL training, learning paths, and business processes play a vital role in equipping users with the necessary skills and knowledge for efficient adoption. Identifying essential resources, including key team members, lays the foundation for a successful rollout. OGL Cloud Service activation is a critical step, allowing organizations to manage users within the OGL console, ensuring secure and streamlined access. Proper documentation is essential for content building, testing, and customization, forming the basis for a structured and scalable deployment.

Topic 2	• Introduction to OGL Content: OGL plays a crucial role in enabling organizations to efficiently manage learning content, ensuring seamless deployment and accessibility. It provides a structured framework for organizing, delivering, and tracking learning materials to enhance workforce skills. The OGL Deployment approach outlines a structured implementation process that organizations follow to integrate OGL within their systems. Organizations nest within this deployment approach by aligning their training objectives, resources, and processes with OGL's capabilities, ensuring a smooth adoption and effective utilization of learning content.
Topic 3	• Project Phase 2: Refine: At this stage, organizations refine their project scope, estimate timelines, and ensure alignment with strategic objectives. Selecting appropriate OGL content from libraries helps tailor learning materials to organizational needs. Deployment considerations, including defining the environment, test users, and data requirements, ensure a robust testing phase before full implementation. The process of building, testing, and customizing OGL content is refined to optimize effectiveness. Planning for optional activities, such as activation and role conditions or display groups, ensures flexibility and adaptability in deployment.
Topic 4	• Project Phase 3: Enable: This phase focuses on finalizing resources, documentation, and deadlines for implementation sign-off. Deploying content to production is a crucial step, marking the transition from testing to live usage. Go-live support and hypercare processes are put in place to ensure a smooth transition, providing immediate assistance and troubleshooting to address any issues. This stage ensures that the OGL deployment is stable and fully functional, ready to deliver value to the organization.
Topic 5	• Continuous Improvement: Mature: Ongoing refinement is essential for maintaining the effectiveness of OGL content. Organizations plan for quarterly updates, refreshes, and necessary changes to keep learning materials relevant and up to date. Reviewing OGL analytics provides valuable insights into content performance, enabling continuous optimization and improvement. This phase ensures that the learning framework remains dynamic and aligned with evolving business needs, maximizing the long-term impact of OGL deployment.

Oracle Guided Learning Project Management Foundations Associate - Rel 1 Sample Questions (Q16-Q21):

NEW QUESTION # 16

Which is not a key issue to consider when capturing screenshots of OGL items?

- A. Multi-language deployments
- B. Data privacy
- C. Default images
- D. Activation conditions

Answer: D

Explanation:

When capturing screenshots for OGL items, key issues include default images (option A) for consistency, multi-language deployments (option B) for text accuracy, and data privacy (option C) to avoid sensitive information. Activation conditions (option

D), which govern when guides appear, are unrelated to screenshot content or capture process. This distinction ensures screenshots are relevant and secure, with activation being a separate configuration concern.

NEW QUESTION # 17

What inputs should be considered when defining your OGL project scope and timelines?

- A. Availability of test user accounts
- B. Email reminders from OGL console
- C. Team member work schedules
- D. Fusion quarterly release schedule

Answer: D

Explanation:

The Fusion quarterly release schedule (option A) is a critical input for defining OGL project scope and timelines, as it dictates content updates and testing windows. Email reminders (option B), test user availability (option C), and team schedules (option D) are secondary or logistical, not scope-defining. The release schedule ensures alignment with application changes, anchoring the project's temporal framework.

NEW QUESTION # 18

What is OGL on OGL an example of?

- A. Business Process Training
- B. Fusion Application
- C. OGL Training

Answer: C

Explanation:

"OGL on OGL" refers to using Oracle Guided Learning to train users on OGL itself, making it an example of OGL Training. It's not a Fusion Application (option A) or Business Process Training (option C), which focuses on broader processes rather than OGL-specific usage.

NEW QUESTION # 19

What is the standard use of a Base Guide?

- A. You want clear, step-by-step instructions for essential tasks.
- B. You want to familiarize the project team with overall business processes.
- C. You want targeted assistance for specific areas of the host application.

Answer: A

Explanation:

A Base Guide in Oracle Guided Learning (OGL) is a content type designed to deliver clear, step-by-step instructions for completing essential tasks within a host application. It differs from Business Process Training, which focuses on familiarizing teams with overarching processes (option A), and Use Cases, which provide targeted assistance for specific areas (option B). Base Guides are practical tools aimed at enabling end users to perform critical functions efficiently, making them a cornerstone of task-oriented guidance in OGL.

NEW QUESTION # 20

What type of information does Business Process Training deliver?

- A. Overview of generic business processes used in Oracle Cloud applications
- B. Tips, beacons, and personalized messages for specific areas
- C. Step-by-step instructions for common tasks across Oracle Fusion applications

Answer: A

Business Process Training (BPT) in Oracle Guided Learning is designed to provide a high-level overview of generic business processes utilized within Oracle Cloud applications, such as Oracle Fusion. This training aims to familiarize project teams and end users with the foundational workflows and operational frameworks that underpin the applications, rather than focusing on granular, task-specific instructions or contextual tips. Option A (step-by-step instructions) aligns more with Base Guides, which are task-oriented, while option B (tips and beacons) corresponds to Smart Tips or Use Cases, which offer targeted, situational guidance. BPT's purpose is educational and process-centric, helping teams understand the "big picture" of how processes like procurement, financials, or HR operate across Oracle Cloud, making option C the correct choice. This broad perspective supports content development and process refinement by establishing a common understanding among stakeholders.
