

# 1z0-1127-24 Key Concepts, 1z0-1127-24 Test Engine Version

BONUS!!! Download part of ITexamReview 1z0-1127-24 dumps for free: [https://drive.google.com/open?id=1DRKAMGkaoq1MR\\_WLQpMG-YxytstaH2fr](https://drive.google.com/open?id=1DRKAMGkaoq1MR_WLQpMG-YxytstaH2fr)

Now you can pass 1z0-1127-24 exam without going through any hassle. You can only focus on 1z0-1127-24 exam dumps provided by the ITexamReview, and you will be able to pass the 1z0-1127-24 test in the first attempt. We provide high quality and easy to understand 1z0-1127-24 pdf dumps with verified 1z0-1127-24 for all the professionals who are looking to pass the 1z0-1127-24 exam in the first attempt. The 1z0-1127-24 training material package includes latest 1z0-1127-24 PDF questions and practice test software that will help you to pass the 1z0-1127-24 exam.

ITexamReview is a website to provide a targeted training for Oracle certification 1z0-1127-24 exam. ITexamReview is also a website which can not only make your expertise to get promoted, but also help you pass Oracle certification 1z0-1127-24 exam for just one time. The training materials of ITexamReview are developed by many IT experts' continuously using their experience and knowledge to study, and the quality is very good and have very high accuracy. Once you select our ITexamReview, we can not only help you pass Oracle Certification 1z0-1127-24 Exam and consolidate their IT expertise, but also have a one-year free after-sale Update Service.

## Free PDF The Best Oracle - 1z0-1127-24 - Oracle Cloud Infrastructure 2024 Generative AI Professional Key Concepts

Choosing our Oracle vce dumps means you can closer to success. We have rich experienced in the real questions of 1z0-1127-24 actual test. Our 1z0-1127-24 vce files are affordable, latest and best quality with detailed answers and explanations, which can overcome the difficulty of real exam. You will save lots of time and money with our 1z0-1127-24 Braindumps Torrent.

## Oracle Cloud Infrastructure 2024 Generative AI Professional Sample Questions (Q30-Q35):

### NEW QUESTION # 30

Which role does a "model end point" serve in the inference workflow of the OCI Generative AI service?

- A. Serves as a designated point for user requests and model responses
- B. Updates the weights of the base model during the fine-tuning process
- C. Evaluates the performance metrics of the custom model
- D. Hosts the training data for fine-tuning custom model

Answer: A

Explanation:

In the inference workflow of the OCI Generative AI service, a "model endpoint" is a critical component. It serves as a designated point for handling user requests and providing model responses. When users or applications send requests to the model endpoint, the endpoint processes these requests by passing them to the deployed model. The model then generates responses based on the input data, and these responses are returned to the user through the same endpoint. This setup facilitates efficient and scalable interaction with the AI model, ensuring that inference can be performed seamlessly and reliably.

### NEW QUESTION # 31

Given the following prompts used with a Large Language Model, classify each as employing the Chain-of-Thought, Least-to-most, or Step-Back prompting technique.

1. Calculate the total number of wheels needed for 3 cars. Cars have 4 wheels each. Then, use the total number of wheels to determine how many sets of wheels we can buy with \$200 if one set (4 wheels) costs \$50.

2. Solve a complex math problem by first identifying the formula needed, and then solve a simpler version of the problem before tackling the full question.

3. To understand the impact of greenhouse gases on climate change, let's start by defining what greenhouse gases are. Next, we'll explore how they trap heat in the Earth's atmosphere.

- A. 1:Least-to-most, 2 Chain-of-Thought, 3:Step-Back
- B. 1:Step-Back, 2:Chain-of-Thought, 3:Least-to-most
- C. 1:Chain-of-thought, 2: Least-to-most, 3:Step-Back
- D. 1:Chain-of-Thought ,2:Step-Back, 3:Least-to most

**Answer: C**

Explanation:

Chain-of-Thought: The first prompt calculates the total number of wheels and then uses that information to determine how many sets of wheels can be bought. This sequential reasoning process aligns with the Chain-of-Thought technique.

Least-to-most: The second prompt solves a complex problem by first identifying the needed formula and then solving a simpler version before tackling the full question. This incremental approach matches the Least-to-most technique.

Step-Back: The third prompt starts by defining greenhouse gases and then explores their impact on climate change, taking a step back to establish foundational knowledge before addressing the main question.

### NEW QUESTION # 32

Given the following code: `chain = prompt | llm`

- A. Which statement is true about LangChain Expression language (LCEL)?
- B. LCEL is a declarative and preferred way to compose chains together.
- C. LCEL is a programming language used to write documentation for LangChain.
- D. LCEL is a legacy method for creating chains in LangChain

**Answer: B**

Explanation:

LangChain Expression Language (LCEL) is a declarative language used to compose chains together in LangChain. It allows users to define the flow and interaction of different components in a clear and concise manner. By using LCEL, developers can easily specify how prompts, models, and other elements should interact, making the process of creating and managing chains more straightforward and efficient. This method is preferred due to its readability and ease of use, compared to more imperative or programmatic approaches.

### NEW QUESTION # 33

Which is the main characteristic of greedy decoding in the context of language model word prediction?

- A. It picks the most likely word email at each step of decoding.
- B. It chooses words randomly from the set of less probable candidates.
- C. It requires a large temperature setting to ensure diverse word selection.
- D. It selects words based on a flattened distribution over the vocabulary.

**Answer: A**

Explanation:

Greedy decoding in the context of language model word prediction refers to a decoding strategy where, at each step, the model selects the word with the highest probability (the most likely word). This approach is simple and straightforward but can sometimes lead to less diverse or creative outputs because it always opts for the most likely option without considering alternative sequences that might result in better overall sentences.

### NEW QUESTION # 34

Which is the main characteristic of greedy decoding in the context of language model word prediction?

- A. It picks the most likely word email at each step of decoding.
- B. It chooses words randomly from the set of less probable candidates.
- C. It requires a large temperature setting to ensure diverse word selection.
- D. It selects words based on a flattened distribution over the vocabulary.

**Answer: A**

### NEW QUESTION # 35

.....

The Oracle 1z0-1127-24 pdf questions learning material provided to the customers from ITexamReview is in three different formats. The first format is PDF format which is printable and portable. It means it can be accessed from tablets, laptops, and smartphones to prepare for the Oracle 1z0-1127-24 Exam. The Oracle 1z0-1127-24 PDF format can be used offline, and candidates can even prepare for it in the classroom or library by printing questions or on their smart devices.
