

1Z0-1151-25 Valid Exam Papers, 1Z0-1151-25 Valid Exam Guide

What's more, part of that Dumpexams 1Z0-1151-25 dumps now are free: https://drive.google.com/open?id=1hoxAIDq_eOL_savzldNiuozY8RxHOOWu

Desktop and web-based 1Z0-1151-25 practice exams are available at Dumpexams for thorough preparation. Going through these Oracle 1Z0-1151-25 mock exams boosts your learning and reduces mistakes in the Oracle 1Z0-1151-25 Test Preparation. Customization features of Oracle 1Z0-1151-25 practice tests allow you to change the settings of the 1Z0-1151-25 test sessions.

Oracle 1Z0-1151-25 Exam Syllabus Topics:

Topic	Details
Topic 1	Core OCI Services Overview: This section evaluates the knowledge of Identity and Database Administrators in managing OCI's core services for multi-cloud integration. It covers the implementation of identity federation between OCI Identity Domains and external identity providers, ensuring secure authentication across multiple cloud environments. Candidates will also gain expertise in configuring Virtual Cloud Network (VCN) components and administering OCI database services, including Base Databases, Autonomous Databases, and HeatWave, to support scalable multi-cloud deployments.
Topic 2	Introduction to Multicloud: This section of the exam measures the skills of Cloud Architects in understanding multicloud environments and their benefits. It covers the reasons organizations adopt multi-cloud strategies, including flexibility, cost optimization, and risk management. Candidates will learn about common multicloud use cases and how they are implemented in Oracle Cloud Infrastructure (OCI) to enhance interoperability and performance.
Topic 3	Implement Oracle Database@Google Cloud: This section measures the proficiency of Cloud Database Engineers in utilizing Oracle Database@Google Cloud. It explores the architecture and operational framework for running Oracle databases on Google Cloud. Candidates will learn about onboarding procedures, provisioning resources, and managing database services effectively to optimize performance and availability in a Google Cloud-integrated multi-cloud ecosystem.
Topic 4	Implement Oracle Database@Azure: This section tests the expertise of Database Solutions Architects in deploying and managing Oracle Database@Azure. It covers the architectural components and onboarding processes required for provisioning databases in Azure while maintaining Oracle's advanced database capabilities. Candidates will also focus on configuring high availability and disaster recovery strategies to ensure business continuity and data resilience in a multi-cloud setup.

Topic 5	• Configure Multicloud Connection Options: This section assesses the abilities of Network Engineers in configuring connectivity solutions for OCI multi-cloud environments. It includes setting up secure networking options such as Site-to-Site VPN and FastConnect for seamless cloud integration. Candidates will also learn how to implement Oracle Interconnect services for establishing direct, high-performance connections between OCI and third-party cloud providers like Microsoft Azure and Google Cloud.

Prominent Features of Oracle 1Z0-1151-25 Exam Practice Test Questions

Our company has successfully created ourselves famous brands in the past years, and more importantly, all of the 1Z0-1151-25 exam braindumps from our company have been authenticated by the international authoritative institutes and cater for the demands of all customers at the same time. We are attested that the quality of the 1Z0-1151-25 test prep from our company have won great faith and favor of customers. We persist in keeping close contact with international relative massive enterprise and have broad cooperation in order to create the best helpful and most suitable 1Z0-1151-25 study practice question for all customers. We can promise that our company will provide the authoritative study platform for all people who want to prepare for the exam. If you buy the 1Z0-1151-25 test prep from our company, we can assure to you that you will have the chance to enjoy the authoritative study platform provided by our company to improve your study efficiency.

Oracle Cloud Infrastructure 2025 Multicloud Architect Professional Sample Questions (Q11-Q16):

NEW QUESTION # 11

Which OCI native database service can be provisioned using Oracle Database at Google Cloud?

- A. Base Database Service
- B. Autonomous Database on Dedicated Infrastructure
- C. Autonomous Database Serverless
- D. HeatWave

Answer: A

Explanation:

Oracle Database@Google Cloud allows you to run Oracle databases directly on Google Cloud infrastructure. It primarily focuses on providing a managed environment for traditional Oracle Database deployments, which aligns with the Base Database Service offering in OCI.

Here's why the other options are not the primary focus:

Autonomous Database Serverless and Autonomous Database on Dedicated Infrastructure: These are Autonomous Database offerings, which are fully managed, self-driving database services. While Oracle Database@Google Cloud could potentially support aspects of Autonomous Database in the future, its initial focus is on bringing the core Oracle Database experience to Google Cloud, similar to Base Database Service.

HeatWave: HeatWave is an in-memory query accelerator for MySQL Database Service.

It's not related to Oracle Database and therefore not relevant to Oracle Database@Google Cloud

NEW QUESTION # 12

Which of the following is NOT a benefit of using Oracle Interconnect for Azure compared to an IPsec VPN solution for connecting OCI and Azure?

- A. Simplified network management.
- B. Inherent encryption of all traffic traversing the connection.
- C. Dynamic routing with BGP.
- D. Higher bandwidth and lower latency.

Answer: B

Explanation:

While Oracle Interconnect for Azure provides a private, dedicated connection, it does not inherently encrypt the traffic. The connection itself is secure in the sense that it's not traversing the public internet, but data encryption needs to be implemented at higher layers (e.g., using TLS/SSL at the application level, or using IPsec VPNs over the Interconnect if needed).

Here's why the other options are benefits:

- a) Higher bandwidth and lower latency: FastConnect and ExpressRoute provide significantly higher bandwidth and lower latency compared to IPsec VPNs, which are limited by internet bandwidth and introduce more overhead.
- b) Dynamic routing with BGP: Oracle Interconnect for Azure uses BGP (Border Gateway Protocol) for dynamic routing between the two cloud environments.
- c) Simplified network management: With a dedicated connection and BGP, network management is generally simpler compared to managing multiple IPsec VPN tunnels, especially as network requirements scale.

NEW QUESTION # 13

What is required to configure Oracle Interconnect for Google Cloud?

- **A. Virtual Circuits on OCI and Partner Interconnects on GCP**
- B. Integration with Microsoft Active Directory
- C. A public subnet on both OCI and GCP
- D. Direct Internet connection

Answer: A

Explanation:

Configuring the Oracle Interconnect for Google Cloud requires Virtual Circuits on OCI (via FastConnect) and Partner Interconnects on GCP, establishing a private, high-speed link between the clouds. A direct internet connection (Option A) defeats the purpose of a private interconnect, while Microsoft Active Directory (Option B) is unrelated to network setup. Public subnets (Option D) are not required-private connectivity is the goal. This setup is detailed in Oracle's multicloud networking documentation.

NEW QUESTION # 14

In the architecture of Oracle Database@Google Cloud, where does the primary management and control plane for the Exadata Database Service reside?

- A. Within the customer's on-premises data center.
- **B. Within an Oracle-managed OCI region.**
- C. Partially in the customer's Google Cloud project and partially in an Oracle-managed OCI region.
- D. Within the customer's Google Cloud Project.

Answer: B

Explanation:

Even though the Exadata hardware resides within Google Cloud data centers, the management and control plane for the Exadata Database Service remains entirely within Oracle's domain, specifically within an Oracle-managed OCI region. This means that Oracle is responsible for:

Provisioning and managing the Exadata infrastructure.

Patching and upgrading the Exadata software and firmware.

Monitoring the health and performance of the Exadata systems.

The customer interacts with the Exadata Database Service primarily through the OCI console or APIs, even when accessing it from Google Cloud.

The other options are incorrect:

The customer's Google Cloud Project provides the network connectivity and application environment, but does not manage the Exadata service itself.

The management is not split between Google Cloud and OCI. It's solely within OCI.

The customer's on-premises data center is not involved in the management of the Exadata service in this cloud-based offering.

NEW QUESTION # 15

What is the main requirement for subscribing to Oracle Database@Azure?

- **A. Linked Azure and Oracle Cloud Infrastructure account**

- B. An existing Azure subscription
- C. Private interconnect between OCI and Azure
- D. Custom Identity domain

Answer: B

Explanation:

Oracle Database@Azure is offered within the Azure environment. 1 Therefore, having an active Azure subscription is a fundamental requirement to deploy and use this service. You're essentially deploying Oracle resources within your Azure tenancy Here's why the other options are not prerequisites:

B). Custom Identity domain: While identity management is important, a custom identity domain is not a strict prerequisite. Standard Azure identity mechanisms can be used.

C). Linked Azure and Oracle Cloud Infrastructure account: While the underlying technology involves connectivity between OCI and Azure, you don't need to explicitly link separate OCI and Azure accounts as a prerequisite. The integration is handled behind the scenes by Microsoft and Oracle.

D). Private interconnect between OCI and Azure: The Oracle Database@Azure service itself uses a private interconnect behind the scenes, but you, as the customer, don't need to set up a separate private interconnect as a prerequisite to subscribing to the service. The interconnect is part of the offering.

NEW QUESTION # 16

.....

Passing the 1Z0-1151-25 exam is your best career opportunity. The rich experience with relevant certificates is important for enterprises to open up a series of professional vacancies for your choices. Our website's 1Z0-1151-25 learning quiz bank and learning materials look up the latest questions and answers based on the topics you choose. This choice will serve as a breakthrough of your entire career, so prepared to be amazed by high quality and accuracy rate of our 1Z0-1151-25 Study Guide.
