1Z0-1163-1 Valid Exam Duration & Real 1Z0-1163-1 Exam Answers

With high pass rate of 99% to 100% of our 1Z0-1163-1 training guide, obviously such positive pass rate will establish you confidence as well as strengthen your will to pass your exam. No other vendors can challenge our data in this market. At the same time, by studying with our 1Z0-1163-1 practice materials, you avoid wasting your precious time on randomly looking for the key point information, and being upset about the accuracy when you compare with the information with the exam content. Our 1Z0-1163-1 Training Materials provide a smooth road for you to success.

Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 Sample Questions (Q24-Q29):

NEW QUESTION # 24

Which feature in Oracle Fusion Cloud SCM ensures that supply planning recommendations reflect the latest supplier information?

- **A. Real-time Supplier Collaboration.**
- B. Implementing manual verification of supplier information.
- C. Using separate forecasting models for procurement and supply chain planning.
- D. Increasing reorder points in inventory management.

Answer: A

Explanation:

Real-time Supplier Collaboration (C) in Oracle Fusion Cloud SCM ensures supply planning reflects the latest supplier information by integrating live data-e.g., lead times, inventory availability-via tools like the Supplier Portal. If a supplier updates a lead time from 5 to 7 days, planning adjusts instantly. Option A (increasing reorder points) is a static fix, not real-time. Option B (manual verification) contradicts automation goals. Option D (separate models) fragments planning, reducing accuracy. For example, real-time updates might prevent a stockout by rescheduling a delayed shipment, enhancing agility and precision in supply plans.

NEW QUESTION # 25

How can Oracle Fusion Applications ensure that supply planning recommendations reflect the latest supplier information?

- A. Using separate forecasting models for procurement and supply chain planning.
- **B. By enabling real-time supplier collaboration to update supply planning with lead times and inventory availability.**
- C. Implementing manual verification of supplier information before updating supply plans.
- D. Increasing reorder points in inventory management.

Answer: B

Explanation:

Oracle Fusion Cloud SCM ensures supply planning recommendations are up-to-date by enabling real-time supplier collaboration through tools like the Supplier Portal and Supply Chain Collaboration features. This integration allows suppliers to provide current data on lead times and inventory availability, which is directly reflected in supply plans. Option A (manual verification) contradicts Oracle's automation-driven approach. Option B (increasing reorder points) is a reactive measure, not a solution for real-time updates. Option D (separate forecasting models) undermines the unified planning framework of Oracle Fusion. Real-time collaboration enhances planning accuracy and responsiveness.

NEW QUESTION # 26

What is a key benefit of Supplier Qualification Management in Oracle Fusion Cloud SCM?

- **A. It assesses and approves suppliers based on compliance and performance criteria.**
- B. It eliminates supplier performance reviews.
- C. It only tracks supplier payments.

Answer: A

Explanation:

Supplier Qualification Management in Oracle Fusion Cloud SCM evaluates and approves suppliers based on predefined compliance and performance criteria, ensuring reliable partnerships. Option A is incorrect as it focuses on payments, not qualification. Option C is wrong-performance reviews are integral to the process. This benefit mitigates risks and ensures quality suppliers.

NEW QUESTION # 27

Which metric is used to measure the effectiveness of the Demand to Management OMBP?

- A. Supplier Lead Time.
- **B. Forecast Accuracy.**
- C. Customer Acquisition Cost.
- D. Inventory Turnover.

Answer: B

Explanation:

Forecast Accuracy (C) measures the effectiveness of the Demand to Management OMBP by comparing predicted demand to actual demand, reflecting how well the process anticipates market needs. For example, if a forecast predicts 1,000 units and actual sales are 950, accuracy is 95%, indicating strong performance. Option A (Customer Acquisition Cost) is a marketing metric, unrelated to demand planning. Option B (Supplier Lead Time) assesses supplier performance, not forecasting. Option D (Inventory Turnover) measures stock movement, an outcome influenced by forecasting, not a direct metric. Accurate forecasts drive efficient inventory and production planning, reducing costs (e.g., avoiding \$10,000 in overstock) and ensuring customer satisfaction.

NEW QUESTION # 28

What is the primary function of the Available to Promise (ATP) process in Oracle Fusion Cloud SCM?

- A. It guarantees immediate shipment for all orders.
- **B. It ensures product availability commitments based on inventory and supply constraints.**
- C. It manages only supplier payments without impacting inventory levels.
- D. It eliminates the need for demand forecasting.

Answer: B

Explanation:

The Available to Promise (ATP) process (A) in Oracle Fusion Cloud SCM calculates the quantity of products available to commit to new customer orders by analyzing current inventory levels and supply constraints, such as production capacity, supplier lead times, and existing order commitments. For example, if a warehouse has 200 units of a product with 50 already promised, ATP indicates 150 units are available, ensuring accurate delivery promises. This real-time calculation prevents overpromising and aligns customer expectations with operational reality. Option B is incorrect-ATP does not guarantee immediate shipment but provides feasible timelines based on availability, not an unrealistic universal promise. Option C is false-demand forecasting complements ATP by informing supply planning; it doesn't eliminate it. Option D is irrelevant-supplier payments are managed by financial modules, not ATP, which focuses on inventory and supply. By ensuring reliable commitments, ATP enhances customer satisfaction, reduces order cancellations, and optimizes resource use across the supply chain.

NEW QUESTION # 29

.....

If you are boring about daily life and want to improve yourself, getting a practical Oracle certification will be a nice choice that will improve your promotion advantages. 1Z0-1163-1 exam study guide will be valid helper which will help you clear exams 100% for sure. Thousands of candidates successfully pass exams and get certifications you desire under the help of our Itcerttest's 1Z0-1163-1 Dumps PDF files.
