

1Z0-1163-1 Unterlagen mit echte Prüfungsfragen der Oracle Zertifizierung

Wollen Sie Ihre IT-Fähigkeiten beweisen? Möchten Sie mehr Anerkennung und Berufschancen bekommen? Die Prüfungszertifizierung der Oracle 1Z0-1163-1 ist ein bedeutendster Ausweis für Sie. Die Wichtigkeit der Zertifizierung der Oracle 1Z0-1163-1 wissen fast alle Angestellte aus IT-Branche. Die Tatkraft von Menschen ist limitiert. Wenn Sie in einer kurzen Zeit diese wichtige Oracle 1Z0-1163-1 Prüfung bestehende möchten, brauchen Sie unsere die Prüfungssoftware von uns Fast2test als Ihr bester Helfer für die Prüfungsvorbereitung. Umfassende Prüfungsaufgaben enthaltende und Mnemotechnik entsprechende Software kann Ihnen beim Erfolg der Oracle 1Z0-1163-1 gut helfen!

Oracle 1Z0-1163-1 Prüfungsplan:

Thema	Einzelheiten
Thema 1	OMBPs for Procurement: This section tests the abilities of Procurement Specialists in managing procurement operations within Oracle Cloud Applications. It covers the flow of procurement processes, integration points with other SCM modules, and best practices for improving procurement efficiency. Candidates will gain insights into the key metrics used to evaluate procurement performance and cost-effectiveness.

Thema 2	• OMBPs for Manufacturing: This section measures the skills of Manufacturing Operations Managers in utilizing Oracle Cloud's manufacturing capabilities. It explains the flow of manufacturing processes, module integration, and best practices that enhance operational efficiency. Candidates will analyze metrics that assess productivity, cost control, and overall manufacturing performance.
Thema 3	• OMBPs for Logistics: This section tests the expertise of Logistics Coordinators in optimizing logistics and transportation management within Oracle Cloud Applications. It covers the process flows, best practices for logistics operations, and integration of different logistics modules. Candidates will understand performance metrics that impact supply chain visibility, efficiency, and customer satisfaction.
Thema 4	• Oracle Cloud Applications and Oracle Modern Best Practice (OMB): This section of the exam measures the skills of Cloud Application Consultants in understanding Oracle Cloud Applications and their capabilities. It covers the key offerings within the Oracle Cloud ecosystem and highlights the features of the Oracle SCM suite. Candidates will learn about data flow between the SCM OMBPs and how these processes optimize supply chain management.
Thema 5	• OMBPs for Supply Chain Planning: This section assesses the knowledge of Supply Chain Planners in managing planning modules within Oracle SCM. It explains process flows, integration points, and how different planning modules work together. Candidates will learn about best practices for designing efficient planning workflows and key metrics used to measure supply chain responsiveness and effectiveness.
Thema 6	• OMBPs for Innovation: This section evaluates the expertise of Supply Chain Innovation Analysts in leveraging SCM Innovation modules. It focuses on understanding the functionalities that drive product development and improving time-to-market. Candidates will explore key design considerations, best practices, and performance metrics that ensure faster product launches and enhanced innovation processes.
Thema 7	• OMBPs for Order Management: This section evaluates the proficiency of Order Fulfillment Analysts in managing Oracle Cloud's order management modules. It covers the process flow and integration of different components to streamline order processing. Candidates will study key design considerations and metrics related to customer satisfaction, order fulfillment efficiency, and accuracy in managing customer demand.

1Z0-1163-1 Neuesten und qualitativ hochwertige Prüfungsmaterialien bietet - quizfragen und antworten

Fast2test ist ein Vorläufer in der IT-Branche bei der Bereitstellung von Oracle 1Z0-1163-1 IT-Zertifizierungsmaterialien, die Produkte von guter Qualität bieten. Die Prüfungsfragen und Antworten zur Oracle 1Z0-1163-1 Zertifizierungsprüfung von Fast2test führen Sie zum Erfolg. Sie werden exzellente Leistungen erzielen und Ihren Traum verwirklichen.

Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 1Z0-1163-1 Prüfungsfragen mit Lösungen (Q24-Q29):

24. Frage

What is a key advantage of the Production Order to Cost Update OMBP in Oracle Fusion Cloud SCM?

- A. It provides real-time cost updates, ensuring immediate financial benefits.
- B. It automates the production process, requiring minimal human supervision.
- C. It enhances customer relationship management, leading to effective cost analysis.
- D. It provides accurate cost calculations, leading to better decision-making and improved profitability.

Antwort: D

Begründung:

The Production Order to Cost Update process within Oracle Manufacturing Business Process (OMBP) in Oracle Fusion Cloud SCM ensures accurate cost calculations by capturing and updating costs associated with production orders, such as materials, labor, and overhead. This accuracy supports better decision-making and improves profitability by enabling precise cost analysis and pricing strategies. Option A is irrelevant as it ties to CRM, not cost updates. Option B exaggerates automation-human oversight remains necessary. Option D focuses on real-time updates, which is secondary to the primary benefit of accuracy emphasized in Oracle documentation.

25. Frage

What is the purpose of the Back-to-Back Order Fulfillment process in Oracle Fusion Cloud SCM?

- A. It links customer orders to supplier purchase orders for direct fulfillment.
- B. It eliminates the need for supplier collaboration.
- C. It prioritizes warehouse stock over supplier sourcing.
- D. It delays order fulfillment until inventory is replenished.

Antwort: A

Begründung:

The Back-to-Back Order Fulfillment process (D) links customer orders directly to supplier purchase orders, enabling direct fulfillment without relying solely on existing inventory. For example, a customer orders 50 custom widgets; the system generates a PO to the supplier, who ships directly or via the warehouse, reducing stock holding. Option A is incorrect-it favors supplier sourcing when stock is unavailable. Option B is false-it accelerates, not delays, fulfillment. Option C is wrong-supplier collaboration is essential. This process cuts inventory costs, speeds delivery, and supports make-to-order models efficiently.

26. Frage

What is the primary objective of the Order Promising process in Oracle Fusion Cloud SCM?

- A. It provides accurate order commitment dates based on supply and demand availability.
- B. It guarantees same-day shipping for all orders.
- C. It only manages orders for direct-to-customer deliveries.

Antwort: A

Begründung:

The Order Promising process in Oracle Fusion Cloud SCM, specifically through the Global Order Promising (GOP) module, aims to provide accurate and reliable order commitment dates by analyzing real-time supply and demand data. This process evaluates factors such as current inventory levels, production schedules, supplier lead times, and transportation constraints to determine feasible delivery dates for customer orders. It ensures businesses can promise delivery dates that align with actual capabilities, enhancing customer satisfaction and operational reliability. Option A is incorrect because Order Promising is not limited to direct-to-customer deliveries-it applies to all order types, including B2B and internal transfers. Option B is also wrong as it overpromises "same-day shipping," which is not guaranteed by Oracle Fusion SCM; instead, the system focuses on realistic commitments based on constraints. For example, if a customer orders a product with limited stock and a two-day production lead time, Order Promising calculates the earliest possible delivery date rather than assuming immediate shipment. This precision reduces overpromising and underdelivering, a common issue in manual systems.

27. Frage

Which process in Oracle Fusion Cloud SCM ensures that inventory levels are maintained efficiently?

- A. Cost Accounting.
- B. Manufacturing Execution.
- C. Supplier Qualification.
- D. Replenishment Planning.

Antwort: D

Begründung:

Replenishment Planning (D) in Oracle Fusion Cloud SCM ensures inventory levels are maintained efficiently by predicting demand and adjusting supply plans to replenish stock proactively. It uses forecasts and safety stock rules-e.g., ordering 300 units when stock

falls to 50 and demand is expected to rise-to prevent shortages or excess inventory. Option A (Supplier Qualification) focuses on supplier evaluation, not inventory maintenance. Option B (Cost Accounting) tracks financials, not stock levels. Option C (Manufacturing Execution) manages production, not replenishment. Replenishment Planning optimizes inventory turnover, reduces carrying costs, and ensures product availability, making it a proactive inventory management tool.

28. Frage

Which feature in Oracle Fusion Cloud SCM assesses and approves suppliers based on compliance and performance criteria?

- A. Cost Accounting.
- B. Manufacturing Execution.
- **C. Supplier Qualification Management.**
- D. Supplier Portal.

Antwort: C

Begründung:

Supplier Qualification Management (D) assesses and approves suppliers based on compliance (e.g., regulatory standards) and performance criteria (e.g., delivery reliability). For example, it might evaluate a supplier's 95% on-time delivery rate and ISO certification before approval. Option A (Cost Accounting) tracks costs, not supplier quality. Option B (Supplier Portal) facilitates communication, not qualification. Option C (Manufacturing Execution) manages production, not supplier vetting. This feature ensures reliable, high-quality suppliers, reducing supply chain risks and enhancing procurement outcomes.

Reference:

Below is the batch of questions formatted as requested, with comprehensive and detailed explanations verified against Oracle Fusion Cloud Applications SCM and Procurement documentation. Each explanation is extensive, covering the reasoning behind the correct answer, why other options are incorrect, practical examples, and the broader implications within the SCM or Procurement framework. All questions have four options, so the format includes A, B, C, and D. Note that Question 11 was included in this batch as it aligns with the pattern of your request.

29. Frage

.....

Heutzutage, wo Zeit in dieser Gesellschaft sehr geschätzt wird, schlage ich Ihnen vor, die effizienten Oracle 1Z0-1163-1 (Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1) Fragenkataloge von Fast2test zu wählen. Sie können mit weniger Zeit und Geld die Oracle 1Z0-1163-1 Zertifizierungsprüfung nur einmalig bestehen können.
