

# 1Z0-1163-1 Zertifizierungsantworten, 1Z0-1163-1 Lernhilfe

P.S. Kostenlose 2025 Oracle 1Z0-1163-1 Prüfungsfragen sind auf Google Drive freigegeben von It-Pruefung verfügbar:  
<https://drive.google.com/open?id=19WSIA5LKeA1UjsyPa05O7iIAOiV2Ba44>

Unser It-Pruefung ist eine Website, die eine lange Geschichte hinter sich hat. So genießt It-Pruefung einen guten Ruf in der IT-Branche. Und wir haben vielen Kandidaten geholfen, die Oracle 1Z0-1163-1 Prüfung zu bestehen. Die Fragen und Antworten zur Oracle 1Z0-1163-1 Zertifizierungsprüfung von It-Pruefung werden von den erfahrungsreichen Expertenteams nach ihren Kenntnissen und Erfahrungen bearbeitet. Wenn Sie an der Oracle 1Z0-1163-1 Zertifizierungsprüfung teilnehmen wollen, ist It-Pruefung zweifellos eine gute Wahl.

## Oracle 1Z0-1163-1 Prüfungsplan:

| Thema   | Einzelheiten                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|---------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Thema 1 | <ul style="list-style-type: none"><li>• OMBPs for Supply Chain Planning: This section assesses the knowledge of Supply Chain Planners in managing planning modules within Oracle SCM. It explains process flows, integration points, and how different planning modules work together. Candidates will learn about best practices for designing efficient planning workflows and key metrics used to measure supply chain responsiveness and effectiveness.</li></ul>          |
| Thema 2 | <ul style="list-style-type: none"><li>• OMBPs for Sustainability: This section assesses the knowledge of Sustainability Specialists in integrating environmental and social responsibility into supply chain and procurement processes. It focuses on the benefits of aligning sustainability goals with business operations, ensuring compliance with global regulations, and implementing eco-friendly best practices.</li></ul>                                             |
| Thema 3 | <ul style="list-style-type: none"><li>• OMBPs for Procurement: This section tests the abilities of Procurement Specialists in managing procurement operations within Oracle Cloud Applications. It covers the flow of procurement processes, integration points with other SCM modules, and best practices for improving procurement efficiency. Candidates will gain insights into the key metrics used to evaluate procurement performance and cost-effectiveness.</li></ul> |

|         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|---------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Thema 4 | <ul style="list-style-type: none"> <li>• OMBPs for Manufacturing: This section measures the skills of Manufacturing Operations Managers in utilizing Oracle Cloud's manufacturing capabilities. It explains the flow of manufacturing processes, module integration, and best practices that enhance operational efficiency. Candidates will analyze metrics that assess productivity, cost control, and overall manufacturing performance.</li> </ul>                                                                                       |
| Thema 5 | <ul style="list-style-type: none"> <li>• OMBPs for Innovation: This section evaluates the expertise of Supply Chain Innovation Analysts in leveraging SCM Innovation modules. It focuses on understanding the functionalities that drive product development and improving time-to-market. Candidates will explore key design considerations, best practices, and performance metrics that ensure faster product launches and enhanced innovation processes.</li> </ul>                                                                      |
| Thema 6 | <ul style="list-style-type: none"> <li>• Oracle Cloud Applications and Oracle Modern Best Practice (OMBP): This section of the exam measures the skills of Cloud Application Consultants in understanding Oracle Cloud Applications and their capabilities. It covers the key offerings within the Oracle Cloud ecosystem and highlights the features of the Oracle SCM suite. Candidates will learn about data flow between the SCM OMBPs and how these processes optimize supply chain management.</li> </ul>                              |
| Thema 7 | <ul style="list-style-type: none"> <li>• Oracle Cloud Success Navigator &amp; Oracle Cloud Quality Standards: This section evaluates the skills of Cloud Implementation Managers in leveraging Oracle Cloud Success Navigator and Quality Standards for cloud adoption. It explains how best practices are embedded into Oracle Cloud Applications and applied using Starter Configuration. Candidates will understand how to optimize cloud performance and ensure successful deployments following Oracle's quality guidelines.</li> </ul> |

## Neuester und gültiger 1Z0-1163-1 Test VCE Motoren-Dumps und 1Z0-1163-1 neueste Testfragen für die IT-Prüfungen

Die Fragenkataloge zur Oracle 1Z0-1163-1 Zertifizierungsprüfung von It-Prüfung sind die besten. Wenn Sie ein Oracle -Fachmann sind, sind sie Ihnen ganz notwendig. Sie sind ganz zuverlässig. Wir bieten speziell den 1Z0-1163-1 -Kandidaten die Schulungsunterlagen, die Prüfungsfragen und Antworten zur 1Z0-1163-1 Zertifizierung enthalten. Viele 1Z0-1163-1 -Fachleute streben danach, die Oracle 1Z0-1163-1 Prüfung zu bestehen. Die Erfolgsquote von It-Prüfung ist unglaublich hoch. Unser It-Prüfung setzt sich dafür ein, Ihnen zu helfen, den Erfolg zu erlangen.

## Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 1Z0-1163-1 Prüfungsfragen mit Lösungen (Q17-Q22):

### 17. Frage

What is a key benefit of Supplier Qualification Management in Oracle Fusion Cloud SCM?

- A. It eliminates supplier performance reviews.
- B. It only tracks supplier payments.
- C. It assesses and approves suppliers based on compliance and performance criteria.

**Antwort: C**

Begründung:

Supplier Qualification Management in Oracle Fusion Cloud SCM evaluates and approves suppliers based on predefined compliance and performance criteria, ensuring reliable partnerships. Option A is incorrect as it focuses on payments, not qualification. Option C is wrong-performance reviews are integral to the process. This benefit mitigates risks and ensures quality suppliers.

### 18. Frage

What is the purpose of the Back-to-Back Order Fulfillment process in Oracle Fusion Cloud SCM?

- A. It prioritizes warehouse stock over supplier sourcing.

- B. It delays order fulfillment until inventory is replenished.
- **C. It links customer orders to supplier purchase orders for direct fulfillment.**
- D. It eliminates the need for supplier collaboration.

**Antwort: C**

Begründung:

The Back-to-Back Order Fulfillment process (D) links customer orders directly to supplier purchase orders, enabling direct fulfillment without relying solely on existing inventory. For example, a customer orders 50 custom widgets; the system generates a PO to the supplier, who ships directly or via the warehouse, reducing stock holding. Option A is incorrect-it favors supplier sourcing when stock is unavailable. Option B is false-it accelerates, not delays, fulfillment. Option C is wrong-supplier collaboration is essential. This process cuts inventory costs, speeds delivery, and supports make-to-order models efficiently.

## 19. Frage

What is a key feature of the Supply Chain Orchestration process in Oracle Fusion Cloud SCM?

- A. It only manages warehouse operations without linking to procurement or manufacturing.
- B. It provides a manual approach to tracking supply chain transactions.
- **C. It automates the execution of supply chain tasks across different applications, ensuring end-to-end process integration.**

**Antwort: C**

Begründung:

The Supply Chain Orchestration (SCO) process in Oracle Fusion Cloud SCM is a pivotal feature that automates the execution of supply chain tasks across multiple applications, including procurement, manufacturing, and inventory management. It ensures seamless end-to-end process integration by coordinating activities like order fulfillment, material transfers, and production scheduling. Option A is incorrect because SCO extends beyond warehouse operations to integrate with procurement and manufacturing. Option C is also inaccurate as SCO eliminates manual tracking by leveraging automation, improving efficiency and visibility across the supply chain. This capability reduces delays and enhances coordination, aligning with Oracle's goal of a connected supply chain ecosystem.

## 20. Frage

Which feature in Oracle Fusion Cloud Procurement automates the creation of purchase orders from contracts?

- A. Intelligent Document Recognition (IDR).
- B. Supplier Portal.
- **C. Contract Fulfillment Automation.**
- D. Receipt Accounting.

**Antwort: C**

Begründung:

Contract Fulfillment Automation (C) in Oracle Fusion Cloud Procurement automates the creation of purchase orders (POs) directly from contract terms, streamlining the procurement process. This feature uses predefined contract details-such as items, quantities, pricing, and delivery schedules-to generate POs without manual intervention. For example, if a contract stipulates 1,000 units of a product at \$10 each over six months, Contract Fulfillment Automation triggers POs as needed (e.g., 200 units monthly), ensuring accuracy and compliance with the agreement. Option A (Receipt Accounting) records goods received, not PO creation. Option B (Supplier Portal) enables supplier interaction but doesn't automate PO generation from contracts. Option D (IDR) extracts data from documents like invoices, not contracts for PO creation. This automation reduces errors (e.g., mismatched quantities), saves time, and ensures procurement aligns with negotiated terms, enhancing efficiency and supplier relationships.

## 21. Frage

Which feature in Oracle Fusion Cloud SCM tracks and manages real-time production processes?

- A. Inventory Management.
- B. Cost Accounting.
- **C. Manufacturing Execution.**
- D. Supplier Qualification.

**Antwort: C**

Begründung:

Manufacturing Execution (C) in Oracle Fusion Cloud SCM tracks and manages real-time production processes on the shop floor, capturing data like work order progress, material usage, and labor hours. For example, if a worker completes 100 units, the system logs the time, resources consumed (e.g., 50 kg of steel), and any delays (e.g., machine downtime), providing live visibility. Option A (Supplier Qualification) evaluates suppliers, not production. Option B (Cost Accounting) analyzes costs post-production, not real-time processes. Option D (Inventory Management) tracks stock, not manufacturing activities. This feature ensures production aligns with schedules, identifies bottlenecks instantly, and feeds data into cost and quality systems, enhancing operational control.

## 22. Frage

• • • • •

Jeder IT-Fachmann bemüht sich darum, entweder befördert zu werden oder ein höheres Gehalt zu beziehen. Das ist der Druck unserer Gesellschaft. Wir sollen uns mit unseren Fähigkeiten beweisen. Legen Sie bitte die Oracle 1Z0-1163-1 Zertifizierungsprüfung ab. Eigentlich ist sie nicht so schwer wie man gedacht, solange Sie geeignete Dumps wählen. Die Dumps zur Oracle 1Z0-1163-1 Zertifizierung von It-Pruefung sind die besten Dumps. Mit ihr können Sie etwas erzielen, wie Sie wollen.
