Oracle Data Platform 2025 Foundations Associate Sample Questions (Q40-Q45):

NEW QUESTION # 40

Which migration type uses Datapump and GoldenGate tools?

- A. Direct Connection
- B. Indirect Connection
- C. Physical Migration
- **D. Logical Migration**

Answer: D

Explanation:

"Logical Migration" (B) uses "Datapump" for exporting/importing database objects and "GoldenGate" for real-time replication, focusing on data and schema transfer rather than physical structures. "Physical Migration" (A) involves moving entire database files (e.g., RMAN), while "Direct Connection" (C) and "Indirect Connection" (D) are not standard migration types. Oracle's migration guides associate Datapump and GoldenGate with logical methods.

NEW QUESTION # 41

What are the two main features of APEX's low code platform?

- **A. Use graphical user interfaces and configuration**
- **B. Focus on business requirements**
- C. Limited productivity
- D. Use traditional computer programming paradigms
- E. Simplified core-based licensing
- F. Build scalable web apps for MongoDB

Answer: A,B

Explanation:

Full Detailed In-Depth Explanation: Oracle APEX (Application Express) is a leading low-code platform designed to simplify and accelerate application development, particularly within the Oracle ecosystem. The two main features of APEX's low-code platform are "Use graphical user interfaces and configuration" (D) and "Focus on business requirements" (F). Option D reflects APEX's core strength: it provides a browser-based, declarative development environment with drag-and-drop functionality, wizards, and visual UI tools, allowing developers and business users to build applications with minimal coding. This reduces complexity and speeds up development, aligning with the low-code philosophy. Option F highlights APEX's emphasis on enabling users to address business needs directly, rather than getting bogged down in technical intricacies, by offering prebuilt components and templates tailored to solve real-world problems efficiently. "Limited productivity" (A) is incorrect, as APEX enhances productivity significantly. "Build scalable web apps for MongoDB" (B) is false, as APEX is optimized for Oracle Database, not MongoDB. "Simplified core-based licensing" (C) is a licensing aspect, not a development feature, and "Use traditional computer programming paradigms" (E) contradicts APEX's low-code approach, which minimizes hand-coding. Oracle's official APEX documentation emphasizes its graphical, business-focused design as key differentiators.

NEW QUESTION # 42

What self-service tools are available with the Autonomous Database?

- **A. Low-Code App Dev, APEX**
- B. Business Objects
- **C. Oracle Machine Learning**
- D. Encryption only in Object Storage

Answer: A,C

Explanation:

The "Autonomous Database" offers self-service tools like "Oracle Machine Learning" (B), enabling users to build ML models directly in the database, and "Low-Code App Dev, APEX" (C), allowing rapid application development via Oracle APEX. "Business Objects" (A) is a third-party BI tool, not native to ADB, and "Encryption only in Object Storage" (D) is a feature, not a tool, and inaccurate (encryption is broader). Oracle's documentation highlights OML and APEX as key self-service capabilities.

NEW QUESTION # 43

Which statement is true about Autonomous Transaction Processing?

- A. It is used for analytic workloads
- B. Data is stored in columnar format
- C. It is used with data marts and machine learning
- **D. It is used for OLTP and mixed workloads**

Answer: D

Explanation:

"Autonomous Transaction Processing" (ATP) is "used for OLTP and mixed workloads" (A), designed for high-performance transactional processing and hybrid workloads. "Data is stored in columnar format" (B) applies to Autonomous Data Warehouse, not ATP. "Used for analytic workloads" (C) is ADW's focus, and "Used with data marts and machine learning" (D) is more ADW-specific. Oracle's ATP documentation confirms its OLTP focus.

NEW QUESTION # 44

What interconnect solutions are available to connect Oracle Cloud to other cloud providers?

- **A. FastConnect**
- B. Virtual Private Cloud
- C. Virtual Cloud Network
- D. Cloud Router

Answer: A

Explanation:

"FastConnect" (D) is the interconnect solution to connect Oracle Cloud Infrastructure (OCI) to other cloud providers (e.g., Azure, AWS) via dedicated, high-speed links. "Virtual Cloud Network" (A) is an OCI internal network, "Virtual Private Cloud" (B) is an AWS term, and "Cloud Router" (C) is not a specific OCI offering (though third-party routers like Megaport exist). Oracle's documentation confirms FastConnect for multicloud connectivity.
