As is known to us, a good product is not only reflected in the strict management system, complete quality guarantee system but also the fine pre-sale and after-sale service system. In order to provide the best 1Z0-182 study materials for all people, our company already established the integrate quality manage system, before sell serve and promise after sale. If you buy the 1Z0-182 Study Materials from our company, we can make sure that you will have the right to enjoy the 24 hours full-time online service.

Oracle 1Z0-182 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Introduction to Performance: This section evaluates the expertise of Performance Analysts in summarizing Oracle database performance management techniques. It includes measuring database performance using SQL execution plans, directives, and advisors to ensure optimal system efficiency.
Topic 2	<ul style="list-style-type: none">Moving Data: This section evaluates the expertise of Data Migration Specialists in moving data within Oracle databases. It includes using external tables, executing Oracle Data Pump operations, and distinguishing SQL*Loader commands for importing data efficiently.
Topic 3	<ul style="list-style-type: none">Managing Storage: This section tests the knowledge of Storage Engineers in managing storage features such as resumable space allocation, segment space-saving, and block space management. It also includes defining segment characteristics to optimize storage utilization.
Topic 4	<ul style="list-style-type: none">Configuring Oracle Net Services: This section measures the skills of Network Administrators and Database Administrators in configuring Oracle Net Services. It includes identifying administration components, describing connection methods, and ensuring seamless communication between clients and databases.

Topic 5	<ul style="list-style-type: none"> • Displaying Creating and Managing PDBs: This section assesses the knowledge of Cloud Database Architects in creating pluggable databases (PDBs) from seeds or other techniques. It also covers modifying PDB modes and attributes to meet specific application requirements.
Topic 6	<ul style="list-style-type: none"> • Introduction to Auditing: This domain tests the abilities of Compliance Specialists in implementing database auditing practices. It includes creating, modifying, and maintaining auditing policies while applying value-based auditing techniques like Fine-Grained Auditing (FGA).
Topic 7	<ul style="list-style-type: none"> • Managing Tablespaces and Datafiles: This section assesses the abilities of Storage Administrators in creating, modifying, and describing tablespaces. It also covers recognizing data storage requirements and understanding datafile placement for efficient storage management.
Topic 8	<ul style="list-style-type: none"> • Automated Maintenance: This section measures the skills of Database Administrators in describing automated maintenance tasks within Oracle databases. It focuses on applying automated features to streamline routine maintenance activities.
Topic 9	<ul style="list-style-type: none"> • Managing Users, Roles, and Privileges: This domain evaluates the expertise of Security Administrators in implementing user security measures. It focuses on creating and managing users, roles, and privileges to ensure secure access to Oracle databases.

Latest 1Z0-182 Exam Simulator, Valid 1Z0-182 Test Answers

Test your knowledge of the Oracle Database 23ai Administration Associate (1Z0-182) exam dumps with ActualVCE Oracle Database 23ai Administration Associate (1Z0-182) practice questions. The software is designed to help with Oracle Database 23ai Administration Associate (1Z0-182) exam dumps preparation. Oracle 1Z0-182 practice test software can be used on devices that range from mobile devices to desktop computers.

Oracle Database 23ai Administration Associate Sample Questions (Q79-Q84):

NEW QUESTION # 79

Which three functions are performed by dispatchers in a shared server configuration?

- A. Receiving inbound requests from processes using shared server connections.
- B. Writing inbound requests to the common request queue from all shared server connections.
- C. Sending shared server session responses back to requesters on the appropriate connection.
- D. True. Dispatchers monitor the response queue.
- E. Sending each connection input request to the appropriate shared server input queue.
- F. Broadcasting shared server session responses back to requesters on all connections.
- G. Checking for outbound shared server responses on the common outbound response queue.

Answer: A,C,G

Explanation:

A :True. Dispatchers return responses to clients.
 B :False. Dispatchers manage queues, not write directly.
 C :False. Responses are connection-specific, not broadcast.
 D :True. Dispatchers receive client requests.
 E :False. Queues are common, not per-connection.

NEW QUESTION # 80

You unplugged a PDB to plug it into another CDB with the following command: SQL> ALTER PLUGGABLE DATABASE pdb1 UNPLUG INTO '/tmp/pdb1.pdb'; Which statement is true prior to plugging the PDB into the other CDB?

- A. The PDB archive file must be copied to the target CDB.
- B. PDB archive file and only the user-defined tablespaces must be copied to the target CDB.
- C. The PDB manifest, the data files, and the PDB archive file must be copied to the target CDB.
- D. The PDB manifest and all the datafiles must be copied to the target CDB.

Answer: C

Explanation:

D.True. The .pdb file (archive) contains the manifest and data files; all must be copied to the target CDB for plugging.

A-C .False. The archive alone isn't enough; all components are needed.

NEW QUESTION # 81

In one of your databases, the user HR has the password HRMGR. You want to connect to a database instance whose listener listens on port 1531 by using this statement: CONNECT HR/HRMGR@orcl. No name server is used. Which statement is true about ORCL?

- A. It must resolve to a valid connect descriptor in the server's tnsnames.ora file.
- B. It must be the value of the SERVICE_NAMES parameter on the client side.
- C. It must be the name of the database to whose instance HR wishes to connect.
- D. It must be the name of the server running the database to whose instance HR wishes to connect.
- E. It must resolve to a valid connect descriptor in the client's tnsnames.ora file.

Answer: E

Explanation:

A .False. ORCL is a TNS alias, not necessarily the DB name.

B .True. Must map to a connect descriptor (e.g., HOST=... PORT=1531) in tnsnames.ora.

C .False. It's not the server name but a network alias.

D .False. Client-side tnsnames.ora is used, not server-side.

E .False. SERVICE_NAMES is server-side, not client-side.

NEW QUESTION # 82

Which two statements are true about the UNLIMITED TABLESPACE system privilege and space quota?

- A. It is overridden by a space quota specified for the user.
- B. By default, users have no quota on their default permanent tablespace.
- C. It allows a user to have unlimited space in any tablespace in the database.
- D. It allows a user to have unlimited space only in their default permanent tablespace.
- E. It allows a role to have unlimited space in any tablespace in the database.

Answer: A,C

Explanation:

A .True. Grants unlimited space across all tablespaces.

B .True. Explicit quotas override the privilege.

C .False. Not limited to default tablespace.

D .False. Roles can't have this privilege directly.

E .False. Default is zero quota unless specified.

NEW QUESTION # 83

Which of the following is true about the status of a PDB that has been unplugged from a CDB?

- A. The STATUS column in CDB_PDBS of the unplugged PDB will be UNAVAILABLE.
- B. The STATUS column in CDB_PDBS of the unplugged PDB will be REMOVED.
- C. The STATUS column in CDB_PDBS of the unplugged PDB will be DISABLED.
- D. The STATUS column in CDB_PDBS of the unplugged PDB will be UNPLUGGED.

Answer: D

Explanation:

- A .True. After ALTER PLUGGABLE DATABASE ... UNPLUG, CDB_PDBS.STATUS shows UNPLUGGED.
- B .False. UNAVAILABLE isn't a valid status here.
- C .False. REMOVED isn't used; UNPLUGGED persists until dropped.
- D .False. DISABLED isn't a PDB state in this context.

NEW QUESTION # 84

Our PDF version of 1Z0-182 training materials is legible to read and remember, and support printing request. Software version of 1Z0-182 practice materials supports simulation test system, and give times of setup has no restriction. Remember this version support Windows system users only. App online version of 1Z0-182 Exam Questions is suitable to all kinds of equipment or digital devices and supportive to offline exercise on the condition that you practice it without mobile data.
